8 July 2019

Dear Sir,

TOWN AND COUNTRY PLANNING ACT 1990 – SECTION 77
APPLICATION MADE BY DAVID WILSON HOMES EASTERN
LAND EAST OF GLENEAGLES WAY, HATFIELD PEVEREL, CM3 2JT
APPLICATION REF: 16/02156/OUT

1. I am directed by the Secretary of State to say that consideration has been given to the report of Brian Cook BA (Hons) DipTP MRTPI, who held a public local inquiry from 12 December 2017 to 30 January 2018 into your client's application for outline planning permission for residential development of up to 120 dwellings, together with associated open space, landscaping, highways and drainage infrastructure works on land east of Gleneagles Way, Hatfield Peverel in accordance with application ref: 16/02156/OUT, dated 16 December 2016.

2. On 12 July 2017, the Secretary of State directed, in pursuance of Section 77 of the Town and Country Planning Act 1990, that your client's application be referred to him instead of being dealt with by the local planning authority.

Inspector's recommendation and summary of the decision

3. The Inspector recommended that that planning permission be granted subject to conditions.

4. For the reasons given below, the Secretary of State agrees with the Inspector's conclusions, except where stated and agrees with his recommendation. He has decided to grant planning permission subject to conditions. A copy of the Inspector's report (IR) is enclosed. All references to paragraph numbers, unless otherwise stated, are to that report.

Procedural matters

5. On 21 June 2018 the Secretary of State wrote to the main parties to afford them an opportunity to comment on the implications, if any, of the judgement of the Court of

Ministry of Housing, Communities & Local Government
Andrew Lynch, Decision Officer
Planning Casework Unit
3rd Floor Fry Building
2 Marsham Street
London SW1P 4DF
Tel: 0303 444 43594
Email: PCC@communities.gov.uk

Justice of the European Union (CJEU) in Case C-323/17 People Over Wind and Sweetman v Coillte Teoranta on the correct application of the Habitats Directive 92/43/EEC, which was handed down on 12 April 2018.

6. On 1 August 2018, the Secretary of State wrote further to the main parties, to afford them an opportunity to make representations on the implications, if any, on the new National Planning Policy Framework, which was published on 24 July 2018.

7. On 2 October 2018, the Secretary of State wrote further to the main parties, to afford them an opportunity to make representations on the implications, if any, on the revised guidance on how councils should assess their housing need, which was published on 13 September 2018, and on new household projections for England published by the Office of National Statistics on 20 September 2018.

8. On 5 March 2019, the Secretary of State wrote to the main parties, to afford them an opportunity to make representations on the implications, if any, on the following documentation:

    - Written Ministerial Statement (WMS) on housing and planning issued on 19 February 2019

    - 2018 Housing Delivery Test measurement data published on 19 February 2019

    - The Government's response to the technical consultation on updates to national planning policy and guidance, dealing with the calculation of Local Housing Need and other matters, including the People Over Wind and Sweetman v Coillte Teoranta issue, published 19 February 2019.

    - Revised National Planning Policy Framework, published on 19 February 2019.

    - Updated guidance for council's on how to assess their housing needs (document).

    - Braintree District Council's latest published 5 year supply statement, January 2019 (see also paragraphs 36 to 43 of this letter).

    - Latest position statement with regard to the emerging Hatfield Peverel Neighbourhood Plan, and weight to be attached to that.

    - Three recent planning casework decisions (brought to the Secretary of State's attention by the Stone Path Meadow Residents Group - SPMRG).

9. A list of representations received in response to these letters, is set out at Annex A. Copies of these letters may be obtained on written request to the address at the foot of the first page of this letter.

10. In addition, a number of representations were received following the close of the inquiry. These raised a variety of issues, and are dealt with under the considerations of main issues below. The Secretary of State is satisfied that the issues raised do not affect his decision, and no other new issues were raised in this correspondence to warrant further investigation or necessitate additional referrals back to parties. A list of representations which have been received since the inquiry is also at Annex A. Copies of these letters may be obtained on written request to the address at the foot of the first page of this letter.

Policy and statutory considerations

11. In reaching his decision, the Secretary of State has had regard to section 38(6) of the Planning and Compulsory Purchase Act 2004 which requires that proposals be determined in accordance with the development plan unless material considerations indicate otherwise.

12. In this case the development plan consists of the saved policies of the Braintree District Local Plan Review (LPR) adopted in 2005 and the Braintree District Core Strategy (CS), adopted in 2011. The Secretary of State considers that the development plan policies of most relevance to this case are those set out at IR25-32.

13. Other material considerations which the Secretary of State has taken into account include the National Planning Policy Framework ('the Framework') and associated planning guidance ('the Guidance'). The revised National Planning Policy Framework was published on 24 July 2018 and further revised in February 2019. Unless otherwise specified, any references to the Framework in this letter are to the revised Framework.

Emerging plan

14. The emerging plan comprises the Braintree New Local Plan (BNLP) and the Hatfield Peverel Neighbourhood Development Plan (NDP). The Secretary of State considers that the emerging BNLP policies of most relevance to this case include those set out in IR34-38 and the emerging NDP policies of most relevance are HPE1, HPE2 and HPE6 as described at IR41-42.

15. Paragraph 48 of the Framework states that decision makers may give weight to relevant policies in emerging plans according to: (1) the stage of preparation of the emerging plan; (2) the extent to which there are unresolved objections to relevant policies in the emerging plan; and (3) the degree of consistency of relevant policies to the policies in the Framework.

16. At the time of the Inquiry the examination hearings into part 1 of the BNLP were due to commence in January 2018, with Part 2 to follow at a later date. The Secretary of State notes that on 8 June 2018, the Inspector for the emerging Local Plan wrote to the three local planning authority areas covered by the Part 1 Examination, setting out his views as to the further steps he considered necessary in order for the Section 1 Plan to be made sound and legally-compliant, and seeking views on options to pursue these matters. A joint response from the three authorities dated 19 October proposed suspending the Examination until February 2019, with a view to sitting again in June. In the light of these letters, and for the reasons given in IR425-428, the Secretary of State agrees with the Inspector that only limited weight should be given to the BNLP.

17. The Secretary of State notes that while some progress has been made with regard to the NDP since the close of the Inquiry, the further examination of the NDP has not yet concluded. For the above reasons, and for the reasons given in IR429-431, the

Secretary of State agrees with the Inspector that very limited weight can be given to the NDP at this stage.

Main issues

Policies in the Framework on delivering a wide choice of high quality homes

18. For the reasons given in IR420-422, the Secretary of State agrees with the Inspector that the Green Infrastructure Plan and Design and Access Statement set important context and establish important principles at this outline application stage, and that there is no evidence to suggest that the application site will not provide a range of high quality homes.

The extent to which the proposed development is consistent with the development plan for the area

19. For the reasons given in IR435-437, the Secretary of State agrees with the Inspector that although as a policy for the supply of housing policy CS1 should be considered out of date, the spatial strategy within it should still be afforded some weight, and he considers that a moderate weighting is appropriate. The Secretary of State further agrees with the Inspector for the reasons in IR435-437 that the appeal proposals would be in accordance with the spatial strategy. For the reasons given in IR438-446, the Secretary of State further agrees with the Inspector that there is a conflict with adopted development plan policies RLP2 and CS5, concerning development outside of defined boundaries of settlements, where countryside policies apply. The Secretary of State further agrees with the Inspector that the conflict with policies RLP2 and CS5 should attract moderate weight when it comes to the overall planning balance, given that they would act to restrict the supply of housing and frustrate the aim of the Framework paragraph 59. He notes that the local planning authority in their representation of 22 October 2018 share his view as to the weight to be attached to policies RLP2 and CS5 at this time.

The effect of the development on the landscape character of the area and the visual impact that the development would have

20. The Secretary of State agrees with the Inspector's view in IR448 that it is necessary to take into account the context of the appeal site**,** and notes the historic pattern of growth described in IR 448-449. For the reasons given in IR450-458 the Secretary of State agrees with the Inspector at IR459 that the studies presented set an important context for an assessment of the effect of the development proposed on the character of the landscape, and that none of the studies suggest that suitably designed development could not be accommodated. However, the Secretary of State also acknowledges that the development would have some adverse effect on landscape character by the replacement of a small arable field with a housing development. The impact however would be very localised and limited.

21. In terms of visual impact, for the reasons given in IR461-472, the Secretary of State agrees with the Inspector's assessments of the impact of the development on views

across the site to the landscape beyond and views back towards the settlement edge from distance.

22. For the reasons given in IR473-478 the Secretary of State agrees with the Inspector that the development would not be detrimental to any distinctive landscape features and would integrate successfully into the local landscape, and enhance the settlement edge as it appears as a feature in the landscape. He finds no conflict with the landscape elements of policy RLP 80, or of the third paragraph of policy CS8.

23. For the reasons given in IR479, the Secretary of State agrees with the Inspector that while harm in relation to visual impact has been identified, this can only attract limited weight. In particular, he agrees with the Inspector's view on the very limited weight to be attached to policy HPE6 of the emerging NDP concerning protected views, given concerns around the evidence base supporting that policy as well as the more general point around progress on that plan.

The effect of the development on community infrastructure

Education

24. The Secretary of State notes that by virtue of his decision on this case and on the proposals at land off Stone Path Drive, Hatfield Peverel, that the four residential developments listed in the letter attached to the Education Statement of Common Ground (Inquiry Document ID1.8) are now being taken forward. There is therefore a need for additional primary school capacity. While the issue will resolve itself over time through the operation of the admissions policy, there would be a short term impact which is most likely to manifest itself through additional journeys to school, either by bus or private car.

Health

25. The Secretary of State notes the Inspector's summary of evidence submitted on health matters at IR487-489, and has considered the subsequent closure of the Sydney House and Laurels surgeries to new registrations.

26. The Secretary of State remains of the view, for the reasons set out by the Inspector in IR490-492, that in terms of both health and education, the Appellant has entered into planning obligations to make all the contributions that have been requested to mitigate any effect from the appeal scheme, and that a finding of conflict with policy CS11 in those circumstances would not be appropriate.

Erosion of gap between Hatfield and Witham

27. For the reasons given in IR493-494, the Secretary of State agrees with the Inspector that this matter has "material planning consideration" status, and that there would be a conflict with emerging NDP policy HPE1. He notes the current position with the emerging BNLP described in IR495, and the matters at IR497-498 which could fall to be addressed by the appointed examiner for the emerging NDP.

28. For the reasons given in IR500-504, the Secretary of State agrees with the Inspector that the loss of the field to residential development would have no perceptible effect on the effective gap between Hatfield Peverel and Witham, and that only very limited weight can be given to the conflict with policy HPE1.

Loss of best and most versatile agricultural land

29. All parties were content to proceed on the basis that the application site should be considered to be best and most versatile agricultural land. For the reasons given in IR505-509, the Secretary of State agrees that the application proposal would not protect best and most versatile agricultural land as required by policy CS8, and also that policy CS8 is inconsistent with paragraphs 170, 171 and footnote 53 of the Framework. In accordance with Framework paragraph 213, the Secretary of State finds that limited weight should be given to the conflict with policy CS8.

Other matters

30. A post-inquiry representation referred to the cancellation of one bus route that served Hatfield Peverel. The Secretary of State has taken this into account, but remains of the view that Hatfield Peverel still demonstrates good public transport links.

Appropriate Assessment

31. Following the reference back to parties exercise described in paragraph 5 of this letter, the Secretary of State has concluded that the screening assessment undertaken for the purposes of this application and presented to the inquiry is no longer legally sound.

32. Therefore, as competent authority for the purposes of the Conservation of Habitats and Species Regulations 2010, the Secretary of State has carried out a new screening. He has concluded on the basis of this screening that an Appropriate Assessment is required, and has carried out that assessment, consulting Natural England as the appropriate nature conservation body. Both the screening and appropriate assessment are attached to this decision letter at Annex C. On the basis of his appropriate assessment, and for the reasons set out in that assessment, the Secretary of State considers that he can safely conclude that the proposed development would not adversely affect the integrity of any European site.

33. The Secretary of State notes that under paragraph 177 of the Framework, the presumption in favour of sustainable development does not apply where a plan or project is likely to have a significant effect on a habitats site (either alone or in combination with other plans or projects), unless an appropriate assessment has concluded that the that the plan or project will not adversely affect the integrity of the habitats site.

Five year housing land supply

34. The Secretary of State has considered the Inspector's findings as regards housing land supply at IR512-516. However, following the publication of the revised Framework, guidance on the calculation of local housing need, and revised household forecasts, he has set out his own conclusions below.

35. Paragraph 73 of the Framework indicates that in the circumstances of this case, local housing need should be applied. The Secretary of State has therefore calculated the local housing need figure based on the methodology published alongside the revised Framework 19 February 2019.

36. On 11 April 2019, the local authority published an Addendum to their Monitoring Report, and a 5 Year Supply Site Trajectory. This reflected the Housing Delivery Test 2018 data

published in February 2019; new affordability ratios published by the Office for National Statistics on 28 March 2019, and additional information relating to supply of sites.

37. In summary, the Addendum set out a 5 year land supply position for the authority of 5.29 years. While the version of the monitoring statement on which the Secretary of State referred back to parties was published on 15 January 2019, given the minor change in the authority's assessment from 5.42 years supply to 5.29 years, and given his conclusions below, the Secretary of State did not consider it necessary to further refer back to parties on this issue.

38. The Secretary of State has reviewed the material published on 11 April 2019, and has also considered the representations of parties made on this issue in response to his letter of 5 March 2019 and, subsequent emails recirculating representations that had been received.

39. Planning Practice Guidance states that in principle an authority will need to be able to demonstrate a 5 year land supply at any point to deal with applications and appeals, unless it is choosing to confirm its 5 year land supply, in which case it need demonstrate it only once per year. *Paragraph: 038 Reference ID: 3-038-20180913*

40. In this case, the authority has not chosen to confirm its 5 year land supply. Paragraph 74 of the National Planning Policy Framework sets out that this can only be carried out through a recently adopted plan (defined in footnote 38 of the Framework) or subsequent annual position statement. In the circumstances, the Secretary of State has therefore considered the latest evidence before him.

41. Having reviewed the housing trajectory published on 11 April 2019, the Secretary of State considers that the evidence provided to support some of the claimed supply in respect of sites with outline planning permission of 10 dwellings or more, and sites without planning permission does not meet the requirement in the Framework Glossary definition of "deliverable" that there be clear evidence that housing completions will begin on site within five years. He has therefore removed 10 sites from the housing trajectory, these are listed at Annex D to this letter.

42. The Secretary of State considers that, bearing this definition in mind, the authority are able to demonstrate around 4.15 years supply.

43. The Secretary of State has therefore concluded that the authority is unable to demonstrate a 5 year housing land supply. Given this finding, and the objective of significantly boosting the supply of new homes, he attaches great weight to the provision of housing.

Planning conditions

44. The Secretary of State has given consideration to the Inspector's analysis at IR394-413, the recommended conditions set out at the end of the IR and the reasons for them, and to national policy in paragraph 55 of the Framework and the relevant Guidance. He is satisfied that the conditions recommended by the Inspector comply with the policy tests set out at paragraph 55 of the Framework and that the conditions set out at Annex B should form part of his decision.

Planning obligations

45. Having had regard to the Inspector's analysis at IR414-417, the planning obligation dated 8 January 2018, paragraph 56 of the Framework, the Guidance and the Community Infrastructure Levy Regulations 2010, as amended, the Secretary of State agrees with the Inspector's conclusion for the reasons given in IR418 that the obligation complies with Regulation 122 of the CIL Regulations and the tests at paragraph 56 of the Framework.

46. The Secretary of State has taken into account the number of planning obligations which have been entered into on or after 6 April 2010 which provide for the funding or provision of a project or type of infrastructure for which an obligation has been proposed in relation to the application. Having had regard to the Inspector's analysis at IR414-417, the Secretary of State concludes that the obligations are compliant with Regulations 123(3), as amended.

Planning balance and overall conclusion

47. For the reasons given above, the Secretary of State considers that the appeal scheme is not in accordance with Policies RLP 2 and CS5 of the development plan, and is not in accordance with the development plan overall. He has gone on to consider whether there are material considerations which indicate that the proposal should be determined other than in accordance with the development plan.

48. The Secretary of State has concluded that the authority is not able to demonstrate a 5-year supply of housing land, therefore the presumption in favour of sustainable development applies because of the effect of paragraph 177 of the revised Framework (as set out in paragraph 33 of this letter above).

49. The Secretary of State considers that the housing benefits of the proposal carry great weight, and the economic benefits in terms of jobs and increased expenditure carry moderate weight. He attaches limited weight to the enhanced biodiversity arising from the new boundary planting.

50. The Secretary of State considers that the conflict with the adopted development plan policies attract moderate weight, and that harm caused in relation to visual impact is limited. He further concludes that only very limited weight can be attached to conflict with policy HPE6 of the emerging NDP. He attaches very limited weight to the conflict with emerging policy HPE1 which seeks to address the coalescence of settlements and limited weight to the conflict with policy CS8 (BMVL).

51. Overall, the Secretary of State concludes that there are material considerations that indicate that the proposal should be determined other than in accordance with the development plan. He therefore concludes that planning permission should be granted.

Formal decision

52. Accordingly, for the reasons given above, the Secretary of State agrees with the Inspector's recommendation. He hereby grants outline planning permission subject to the conditions set out in Annex B of this decision letter for residential development of up to 120 dwellings, together with associated open space, landscaping, highways and drainage infrastructure works on land east of Gleneagles Way, Hatfield Peverel in accordance with application ref: 16/02156/OUT, dated 16 December 2016.

53. This letter does not convey any approval or consent which may be required under any enactment, bye-law, order or regulation other than section 57 of the Town and Country Planning Act 1990.

Right to challenge the decision

54. A separate note is attached setting out the circumstances in which the validity of the Secretary of State's decision may be challenged. This must be done by making an application to the High Court within 6 weeks from the day after the date of this letter for leave to bring a statutory review under section 288 of the Town and Country Planning Act 1990.

55. An applicant for any consent, agreement or approval required by a condition of this permission for agreement of reserved matters has a statutory right of appeal to the Secretary of State if consent, agreement or approval is refused or granted conditionally or if the Local Planning Authority fail to give notice of their decision within the prescribed period.

56. A copy of this letter has been sent to Braintree District Council and notification has been sent to others who asked to be informed of the decision.

Yours faithfully

Andrew Lynch

Andrew Lynch
Authorised by the Secretary of State to sign in that behalf

Annex A – Schedule of representations

General representations

Party	Date
Mr East	14 and 26 March, 23 May and 7 September 2018
Rt Hon Priti Patel MP, encl correspondence from Mr East and Mr Ellison	15 March 2018
Mr Kearns	22 March, 18 April and 5 June 2018
Cllr Derrick	6 April 2018
Mr Simmonds	6 June 2018
Rt Hon Priti Patel MP	2 October 2018
Hatfield Peverel Parish Council	12 November 2018 and 18 February 2019

Representations received in response to the Secretary of State's reference back letter of 21 June 2018

Party	Date
Hatfield Peverel Parish Council	6 August (x3) 2018

Representations received in response to the Secretary of State's reference back letter of 1 August 2018

Party	Date
Hatfield Peverel Parish Council	14 and 29 August (x2) and 5 September 2018
Savills	15 August 2018

Representations received in response to the Secretary of State's reference back letter of 2 October 2018

Party	Date
Hatfield Peverel Parish Council	10 and 22 October 2018
Savills	11 and 19 October 2018
Braintree District Council	22 October 2018

Representations received in response to the Secretary of State's reference back letter of 5 March 2019

Party	Date
Hatfield Peverel Parish Council	25 March, 2 and 18 April 2019
Savills	25 March (x3) and 2 April (x2) 2019
Braintree District Council	26 March 2019

Annex B List of conditions

1) Details of the appearance, landscaping, layout, and scale, (hereinafter called "the reserved matters") shall be submitted to and approved in writing by the local planning authority before any development takes place and the development shall be carried out as approved.

2) Application for approval of the reserved matters shall be made to the local planning authority not later than 2 years from the date of this permission.

3) The development hereby permitted shall take place not later than 2 years from the date of approval of the last of the reserved matters to be approved.

4) The submission of reserved matters applications pursuant to this outline planning permission shall together provide for no more than 120 dwellings, parking, public open space, landscaping, surface water attenuation and associated infrastructure and demonstrate compliance with the approved plans listed below and broad compliance with the approved plans listed below:
Approved Plans:

Location Plan:	1296/01 FINAL
Access Details:	45604-P-SK205

5) Prior to first occupation of the development hereby permitted the provision of the following works shall have been completed, details of which shall have been submitted to and approved in writing by the local planning authority prior to implementation:
- The access to the application site shown in principle on drawing 45604-P-SK205
- The cycle/pedestrian access between Gleneagles Way and Glebefield Road as shown in principle on Drawing 45604-P-SK200
- Improved no entry signage at the end of the A12 southbound off-slip for drivers on The Street, plus improved speed limit signs and road markings for drivers leaving the A12 as show in principle on Drawing 45604-P-SK202
- Improvements to the visibility splay from Gleneagles Way towards the A12 southbound off-slip shown on Drawing 45604-P-SK20 to include trimming/removal of vegetation/trees, relocation/replacement of signs/street furniture/lamp column(s), regrading/hardening of highway land.
- A footway and (A12) road signage improvements at The Street/A12 north bound on-slip junction as shown in principle on Drawing 45604-P-SK201.
- Improvements to the (A12) road signage, kerb alignment and road markings at The Street/Maldon Road as shown in principle on Drawing 45604-P-SK201.
- The provision of dropped kerbs and associated works where the footway from Hatfield Peverel to Witham crosses the A12 northbound on-slip to the south of the Petrol Filling Station (former Lynfield Motors site), Hatfield Road, Witham.
- The provision of a zebra crossing on B1019 Maldon Road in the approximate position shown on Drawing 45604-P-SK207

6) No building erected on the site shall exceed two storeys in height or have a maximum ridge height of more than 9 metres.

7) Any Reserved Matters application relating to scale or layout shall be accompanied by full details of the finished levels, above ordnance datum, of the ground floor(s) of the proposed building(s), in relation to existing ground levels.

The details shall be provided in the form of site plans showing sections across the site at regular intervals with the finished floor levels of all proposed buildings and adjoining buildings. The development shall be carried out in accordance with the approved levels.

8) Together with any submission of reserved matters, details of sound insulation measures must be submitted to and approved in writing by the local planning authority. The details must demonstrate that internal noise levels do not exceed 35 dB LAeq 16 hour in living rooms during the daytime (07:00 - 23:00) and also do not exceed 30 dB LAeq 8 hour in bedrooms during the night-time period (23:00 - 07:00) as set out in BS 8233: 2014. In addition, the details must demonstrate that maximum night-time noise levels in bedrooms should not exceed 42 dB LAmax more than 10 to 15 times per night. The development must be carried out in accordance with the approved details.

9) Together with any submission of reserved matters, details of the proposed boundary mitigation (noise barrier) must be submitted to and approved in writing by the local planning authority. The details must demonstrate that external noise levels will not exceed 55 dB LAeq 16 hour in any of the private residential gardens. The development must be carried out in accordance with the approved details.

10) Prior to the commencement of development hereby permitted, a wildlife protection plan shall be submitted and approved by the local planning authority identifying appropriate measures for the safeguarding of protected species and their habitats within that Phase. The plan shall include:

    an appropriate scale plan showing protection zones where any construction activities are restricted and where protective measures will be installed or implemented;

    details of protective measures (both physical measures and sensitive working practices) to avoid impacts during construction;

    details of how development work will be planned to mitigate potential impacts on protected species, as informed by the project ecologist;

    a person responsible for:

    a) compliance with legal consents relating to nature conservation;
    b) compliance with planning conditions relating to nature conservation;
    c) installation of physical protection measures during construction;
    d) implementation of sensitive working practices during construction;
    e) regular inspection and maintenance of physical protection measures and monitoring of working practices during construction; and
    f) provision of training and information about the importance of "Wildlife Protection Zones" to all construction personnel on site.

    All construction activities shall be implemented in accordance with the approved details and timing of the plan unless otherwise approved in writing by the local planning authority.

11) Any Reserved Matters application relating to landscaping as required by Condition 1 of this permission shall incorporate for the written approval of the local planning authority a detailed specification of hard and soft landscaping works for each phase of the development. This shall include plant/tree types and sizes, plant numbers and distances, soil specification, seeding and turfing treatment, colour and type of material for all hard surface areas and method of laying, refuse storage, signs and

lighting. The scheme and details shall be implemented as approved. The scheme and details shall provide for the following:

All areas of hardstanding shall be constructed using porous materials laid on a permeable base.

All planting, seeding or turfing contained in the approved details of the landscaping scheme shall be carried out in phases to be agreed as part of that scheme by the local planning authority.

Prior to the occupation of each dwelling, the hardstanding associated with that dwelling shall be fully laid out.

Any trees or plants which die, are removed, or become seriously damaged or diseased within a period of 5 years from the completion of the development, shall be replaced in the next planting season with others of a similar size and species.

Any Reserved Matters application relating to landscaping shall be accompanied by cross section drawings showing the relative heights of the proposed dwellings in association with landscape features.

12) No development shall commence, including any groundworks, until a Construction Method Statement has been submitted to, and approved in writing by the local planning authority. The Statement shall be implemented as approved. The Statement shall provide for:

- Safe access to/from the site including details of any temporary haul routes and the means by which these will be closed off following the completion of the construction of the development;

- The parking of vehicles of site operatives and visitors;

- The loading and unloading of plant and materials;

- The storage of plant and materials used in constructing the development;

- The erection and maintenance of security hoarding including decorative displays and facilities for public viewing, where appropriate;

- Wheel washing facilities;

- Measures to control the emission of dust and dirt during construction;

- A scheme for recycling/disposing of waste resulting from demolition and construction works.

- A scheme to control noise and vibration during the construction phase

- Provision of a dedicated telephone number(s) for members of the public to raise concerns/complaints, and a strategy for pre-warning residents of noisy activities/sensitive working hours.

13) Demolition or construction works, including starting of machinery and delivery to and removal of materials from the site shall take place only between 08.00 hours and 18.00 hours on Monday to Friday; 08.00 hours to 13.00 hours on Saturday; and shall not take place at any time on Sundays or on Bank or Public Holidays.

14) Details of any proposed external lighting to the site for each phase of the development shall be submitted to, and approved in writing by, the local planning authority as part of any Reserved Matters application. The details shall include a layout plan with beam orientation and a schedule of equipment in the design (luminaire type, mounting height, aiming angles, luminaire profiles and energy efficiency measures). For the avoidance of doubt the details shall also:

    - identify those areas/features on site that are particularly sensitive for bats and that are likely to cause disturbance in or around their breeding sites and resting places or along important routes used to access key areas of their territory, for example, for foraging; and

    - show how and where external lighting will be installed (through the provision of appropriate lighting contour plans and technical specifications) so that it can be clearly demonstrated that areas to be lit will not disturb or prevent the above species using their territory or having access to their breeding sites and resting places.

    All lighting shall be installed, maintained and operated in accordance with the approved details.

15) No piling shall be undertaken on the site in connection with the construction of the development until details of a system of piling and resultant noise and vibration levels has been submitted to and approved in writing by the local planning authority. The approved details shall be adhered to throughout the construction process.

16) No development or preliminary groundworks shall commence until a programme of archaeological evaluation has been secured and undertaken in accordance with a written scheme of investigation which has been submitted to and approved in writing by the local planning authority.

    A mitigation strategy detailing the excavation/preservation strategy shall be submitted to the local planning authority following completion of the programme of archaeological evaluation as approved within the written scheme of investigation.

    No development or preliminary groundworks shall commence on those areas containing archaeological deposits until the satisfactory completion of fieldwork, as detailed in the mitigation strategy, and which has been approved in writing by the local planning authority.

    Within 6 months of the completion of fieldwork a post-excavation assessment shall be submitted to the local planning authority. This will result in the completion of post-excavation analysis, preparation of a full site archive and report ready for deposition at the local museum and submission of a publication report.

17) No development shall commence until a detailed surface water drainage scheme for the site, based on sustainable drainage principles and an assessment of the hydrological and hydro geological context of the development, has been submitted

to and approved in writing by the local planning authority. The approved scheme shall subsequently be implemented prior to occupation.

The scheme shall include but not be limited to:

- Limiting discharge rate to 1.25l/s/ha;

- Providing sufficient storage to manage the 1 in 100 year + 40% climate change storm event on site with no flooding of the formal drainage system during the 1 in 30 year event. Provide sufficient storage so that no flooding will occur during the 1 in 30 year event in the case of pump failure;

- Provide adequate treatment across all elements of the development.

18) No development shall commence until a Maintenance Plan detailing the maintenance arrangements for each phase of the development, including who is responsible for different elements of the surface water drainage system and the maintenance activities/frequencies, has been submitted to and approved in writing by the local planning authority. The Maintenance Plan shall be implemented as approved.

The applicant or any successor in title or adopting authority shall maintain yearly logs of maintenance which shall be carried out in accordance with any approved Maintenance Plan for each phase of the development. These shall be available for inspection upon a request by the local planning authority.

19) No development shall commence until a scheme to minimise the risk of offsite flooding caused by surface water run-off and groundwater during construction works has been submitted to and approved in writing by the local planning authority. The scheme shall be implemented as approved.

20) No development shall commence until a foul water strategy has been submitted to and approved in writing by the local planning authority. No dwellings shall be occupied until the works have been carried out in accordance with the foul water strategy so approved unless otherwise approved in writing by the local planning authority.

21) As part of the submission of the first reserved matters application as detailed within Condition 1, an Arboricultural Method Statement (AMS) shall be submitted and approved in writing by the local planning authority. The AMS will include a Detailed Tree Protection Plan (DTPP) indicating retained trees, trees to be removed, the precise location and design of protective barriers and ground protection, service routing and specifications, areas designated for structural landscaping to be protected and suitable space for access, site storage and other construction related facilities. The AMS and DTPP shall include details of the appointment of a suitably qualified Project Arboricultural Consultant who will be responsible for monitoring the implementation of the approved DTPP, along with details of how they propose to monitor the site (to include frequency of visits; and key works which will need to be monitored) and how they will record their monitoring and supervision of the site.

The development shall be carried out in accordance with the approved details.

Following each site inspection during the construction period the Project Arboricultural Consultant shall submit a short report to the local planning authority.

The approved means of protection shall be installed prior to the commencement of any building, engineering works or other activities within that Phase of the development and shall remain in place until after the completion of the development.

The local planning authority shall be notified in writing at least 5 working days prior to the commencement of development on site.

22) No above ground works shall commence in the relevant phase of the development until details of the location of refuse bins, recycling materials storage areas and collection points shall be submitted to and approved in writing by the local planning authority. The development shall be implemented in accordance with the approved details prior to the first occupation of each respective unit of the development and thereafter so retained.

23) No clearance of trees, shrubs or hedges in preparation for (or during the course of) development shall take place during the bird nesting season (March - August inclusive) unless a bird nesting survey has been submitted to and approved in writing by the local planning authority to establish whether the site is utilised for bird nesting. Should the survey reveal the presence of any nesting species, then no development shall take place within those areas identified as being used for nesting during the period specified above.

24) Prior to the commencement of above ground construction of the relevant phase of the development details of a scheme for the provision of nest and roost sites for birds and bats shall be submitted to and approved in writing by the local planning authority. Development shall be implemented in accordance with the approved details prior to the first occupation of the dwellinghouses and thereafter so retained.

25) Prior to submission of the first application for Reserved Matters pursuant to this planning permission an updated survey of the application site will have been carried out by a suitably qualified and experienced ecologist to investigate the potential presence on the application site of badgers, bats, reptiles and Great Crested Newts.

Details of the methodology, findings and conclusions of the survey shall be submitted to the local planning authority for approval as part of the first application for Reserved Matters pursuant to this planning permission.

26) In the event that development is not commenced (or, having commenced, is suspended for more than 12 months) within three years of the planning consent, further surveys for Great Crested Newts as necessary shall be undertaken of all suitable ponds within 500 metres of the application site. Details of the methodology, findings and conclusions of the survey shall be submitted to the local planning authority within 8 months of the completion of the survey and a mitigation/compensation scheme, if required shall be provided for approval prior to the commencement of development. Mitigation/compensation works shall be carried out in accordance with the approved scheme.

27) Prior to the submission of the first reserved matters application, details must be submitted to demonstrate that ambient concentrations of nitrogen dioxide will not exceed the UK annual mean objective concentration of 40µg/m3 at any residential property location within the development.

28) Prior to first occupation of the development hereby approved, the Developer shall be responsible for the provision and implementation of a Residents' Travel

Information Pack for sustainable transport, approved by the local planning authority, (to include six one day travel vouchers for use with the relevant local public transport operator).

29) Prior to the first occupation of the development hereby permitted the overhead electricity cables crossing the site east /west shall be diverted underground.

Annex C – Screening & Appropriate Assessment

RECORD OF THE HABITATS REGULATIONS ASSESSMENT UNDERTAKEN UNDER REGULATION 61 OF THE CONSERVATION OF HABITATS AND SPECIES REGULATIONS 2017 AS AMENDED FOR AN APPLICATION UNDER THE TOWN AND COUNTRY PLANNING ACT 1990

Project Title and Location: Called-In planning application No. APP/Z1510/V/17/3180729 Land east of Gleneagles Way, Hatfield Peverel CM3 2JT

Project description:- erection of 120 dwellings, together with associated public open space, landscaping, highways and drainage infrastructure works. (Planning Application Ref: 16/02156/OUT, dated 16 December 2016.)

Completion Date: November 2018

Project description – further information

1. The project site and surroundings are described at paragraphs 19 – 24 of the Inspector's report arising from a public inquiry held into this application between 12 December 2017 and 30 January 2018. The project proposal is described at paragraphs 44 – 45 of that report, in the planning application documentation and in the Environmental Statement. A copy of the inspector's report is attached to this assessment.

Competent authority

2. The above project, having been called-in by the Secretary of State for Housing, Communities and Local Government, is to be determined by him using his powers under section 77 of the Town and County Planning Act 1990. The Secretary of State is therefore the 'competent authority' for the purposes of the Conservation of Habitats and Species Regulations 2017.

Part 1 - Screening

3. A Screening Opinion provided to the Inquiry (produced by Braintree District Council took account of mitigation measures at the screening stage and concluded that no Appropriate Assessment was required. A judgment in the Court of Justice of the European Union (CJEU) in *People Over Wind and Sweetman* and *Coillte Teoranta* (12 April 2018) means this assessment is no longer legally sound.

4. It will now fall to the Secretary of State to take a screening decision for this application, taking into account any relevant information. As part of this process, a reference back to parties was undertaken, to enable further relevant evidence to be addressed by parties to the Inquiry.

Screening Assessment

Relevant documentation

5. The Secretary of State has taken into account the document "Habitats Regulations Assessment Report Land North East of Gleneagles Way, Hatfield Peverel, Essex" ("HRA Report") dated June 2018 In this Screening, all references to sections, unless otherwise stated, are to that document. He has also taken into account comments made by parties to whom this document was circulated on 12 July 2018, namely the local planning authority, Rule 6 parties to the Inquiry, and the developer in the cases heard at the same Inquiry, Refs: APP/Z1510/W/16/3162004 and APP/Z1510/V/17/3180725: both on Land off Stone Path Drive, Hatfield Peverel, CM3 2LG.

6. The Secretary of State notes and agrees with sections 1 and 2 of the HRA Report, which set out relevant background and context, the legislative and policy background, factual information about the SAC, SPA and RAMSAR site and its relation to the application site, and the conservation status of the SAC, SPA and RAMSAR site.

7. With regard to the issue raised by Hatfield Peverel Parish Council at paragraph 11.c of their response, he has considered the new Zones of Influence set out in the RAMS update provided by SPMRG in their response to the Stone Path Drive cases, and has had particular regard to the methodology used for arriving at these zones. He is content that it is appropriate to consider only the Blackwater Estuary SPA and the relevant part of the Essex Estuaries SAC for the purposes of this Assessment.

Consideration and Conclusions

8. In screening the proposals before him, the Secretary of State needs to conclude whether they would be likely to have a significant effect on the internationally important interest features of the site, either alone, or in combination with other projects.

9. The conservation objectives for the Essex Estuaries Special Area of Conservation are:

> **Ensure that the integrity of the site is maintained or restored as appropriate, and ensure that the site contributes to achieving the Favourable Conservation Status of its Qualifying Features, by maintaining or restoring;**
>
> - **The extent and distribution of qualifying natural habitats**
> - **The structure and function (including typical species) of qualifying natural habitats, and**
> - **The supporting processes on which qualifying natural habitats rely**

10. The conservation objectives for the Blackwater Estuary (Mid-Essex Coast Phase 4) Special Protection Area are:

Ensure that the integrity of the site is maintained or restored as appropriate, and ensure that the site contributes to achieving the aims of the Wild Birds Directive, by maintaining or restoring;

- **The extent and distribution of the habitats of the qualifying features**
- **The structure and function of the habitats of the qualifying features**
- **The supporting processes on which the habitats of the qualifying features rely**
- **The population of each of the qualifying features, and,**
- **The distribution of the qualifying features within the site.**

11. The Secretary of State has carefully considered section 3 of the HRA Report on Potential Adverse Impacts, in particular 3.4 and 3.5. He concludes that the development proposals, with proposed conditions 4, 17, 18 and 19, should have no significant impact on designated sites in respect of urbanisation, atmospheric pollution, water abstraction and water quality.

12. The Secretary of State considers that, in the absence of mitigation or avoidance measures, there would be the potential for the application proposal to give rise to a likely significant effect due to increased disturbance from recreational activities, namely walking and dog-walking. He considers that the distance from the designated sites means that regular visits from new residents would be unlikely, and that the public open space provided as an integral element of the proposals, together with links to the existing public right of way would provide opportunities for informal recreation for both new and existing residents. He therefore concludes that the proposals are not likely to have a significant effect on the interest features of the SAC, SPA, or RAMSAR site, when considered in isolation.

13. The Secretary of State does however find that the proposal, in the absence of avoidance or mitigation measures, would have potential to contribute towards a significant effect on the interest features for which the SAC, SPA and RAMSAR site has been classified, when considered in combination with other plans and projects.

14. He has considered the issues raised by Hatfield Peverel Parish Council at paragraph 11.e of their response, concerning whether a median or worst-case estimate should form the basis of estimates of impact.

15. While he has found potential to contribute towards a significant effect on the interest features for which the SAC, SPA and RAMSAR site has been classified, through walking, dog walking and informal recreation, when considered in combination with other plans and projects, the Secretary of State disagrees that a worst-case scenario should be used for the purposes of this assessment. The test at this screening stage is one of a likely significant effect. In the Secretary of State's opinion, this test requires estimating the most likely impact based on available evidence, rather than the worst potential impact.

Overall conclusions

16. The Secretary of State has concluded that the proposal, in the absence of avoidance or mitigation measures, would have potential to contribute towards a significant effect on the interest features for which the SAC, SPA and RAMSAR site has been classified, when considered in combination with other plans and projects.

17. In light of that conclusion the Secretary of State considers that, in light of the judgment of the CJEU mentioned above, the correct course of action is to undertake an Appropriate Assessment.

18. As the competent authority in this case, he has gone on to carry out such an assessment in Part 2 of this document.

Part 2 – Appropriate Assessment

19. The Secretary of State has identified at the screening stage potential to contribute towards a significant effect on the interest features for which the SAC, SPA and RAMSAR site has been classified, when considered in combination with other plans and projects, and has determined that an Appropriate Assessment is required.

20. In accordance with the *People Over Wind and Sweetman* and *Coillte Teoranta* ruling, avoidance or mitigation measures can only be considered at this Appropriate Assessment stage. This Appropriate Assessment now needs to consider whether it can be concluded that the proposal will not adversely affect the integrity of the site. In the event it is concluded that the mitigated project will adversely affect the integrity of the protected sites considered, the Appropriate Assessment will need to consider whether it can be demonstrated that there are no alternatives and there are imperative reasons of over-riding public interest as to why it must proceed.

Relevant documentation

21. The Secretary of State has had regard to the previously mentioned document "Habitats Regulations Assessment Report Land North East of Gleneagles Way, Hatfield Peverel, Essex" dated June 2018,("the HRA Report") and the responses received thereto following reference back to parties. In addition, he has also had regard to documents considered at the Public Inquiry, as set out in Annex A of the Inspector's report, in particular Core Documents Set C, "Documents submitted by David Wilson Homes Eastern" and "Documents submitted during the Inquiry by the parties".

22. The Secretary of State's appropriate assessment has not simply relied on and adopted the above information and responses to it. Rather, the Secretary of State has considered the relevant information independently, and reached his own conclusions. He has also sought the views of Natural England as the appropriate nature conservation body on a draft of this assessment, which are summarised at paragraph(s) 31-32 of this Appropriate Assessment.

Consideration

23. At the prior screening stage, the Secretary of State has already concluded that the application proposals would not be likely to have a significant effect on the SAC, SPA and RAMSAR site other than in respect of disturbance effects. In respect of disturbance effects, the Secretary of State has considered the proposed measures to avoid / mitigate the potential for significant impact on the SAC, SPA and RAMSAR site, set out in sections 4.1 and 4.2 of the HRA report.

24. The Secretary of State agrees that the provision of public open space and access to the Public Right of Way (PROW) network will provide opportunities for informal recreation and alleviate both existing and potential increased recreation at the SPA / RAMSAR site. He recognises that this provision is an integral part of the scheme, and not a proposed mitigation measure.

25. The Secretary of State also considers that the provision of information to support the use of the local footpath network, together with a proportionate financial contribution towards improvements to the PROW network will also serve to encourage new residents to utilise existing public rights of way in the vicinity, and support the diversion of visitors away from the designated sites.

26. The Secretary of State further agrees that the financial contribution towards the Essex Recreation Disturbance Avoidance Monitoring Strategy (RAMS) visitor monitoring surveys at the Blackwater Estuary will help to identify any management measures which may be necessary to mitigate and manage for potential impacts at the designated site.

27. He has paid close attention to the case made by Hatfield Peverel Parish Council in their response, in which they cite Case C-142/16 Commission v Germany contending that monitoring is not mitigation. The Secretary of State notes that in paragraph 37 of the report of Case C-142/16, that the impact assessment proposing the mitigation measure in question did not contain definitive data regarding its effectiveness, and merely stated that its effectiveness could only be confirmed following several years of monitoring.

28. The Secretary of State has considered the precise wording of the signed and dated S106 Agreement provided to the Inquiry, which was the subject of discussion at a round table session on the final sitting day of the Inquiry. The Blackwater Estuary Mitigation Contribution Purposes are defined as being used towards:

> "…the provision of visitor management measures (which may include surveys) to raise awareness of the effects of visitor disturbance at the Blackwater Estuary SPA/RAMSAR site"

29. The Secretary of State considers that this envisages that the contribution could be used towards other measures, and has taken into account the note on the RAMS update provided by SPMRG in their response which states at paragraph 4.4.3 that the three most common forms of generic mitigation are: habitat creation, education and communication, all of which would seem to be allowable under the wording of the S106 Agreement. He therefore concludes that in this case, there is sufficient certainty that a robust mitigation will be provided if required.

30. For the above reasons, the Secretary of State considers that the proposed package of on and off-site measures would be sufficient to ensure no likely significant adverse effect on the SAC / SPA / RAMSAR site, either in isolation or in combination with other plans or proposals.

Natural England's advice

31. Natural England have advised, consistent with their previous comments that a financial contribution towards 'offsite' mitigation measures at the Blackwater Estuary would be required. The mitigation measures that will be funded are consistent with the aims and aspirations of the emerging Essex Coast disturbance Avoidance and Mitigation Strategy (RAMS).

32. Provided the contribution is fully secured, Natural England agree that the proposal would not have an adverse effect on the integrity (AEoI) of the Essex Estuaries SAC and Blackwater SPA and Ramsar site, either when considered alone or in combination with other plans or projects.

Consideration and Conclusions

33. Having concluded that the proposal will not adversely affect the integrity of the SAC / SPA / RAMSAR site, and having given careful consideration to the advice of Natural England the Secretary of State has considered how the proposed mitigation / avoidance measures

needed to ensure the acceptability of the proposal are to be secured should the application be granted.

34. Promoting the local footpath network by supplying all new residents with a map and guide to local (circular) walking routes is secured by Condition 28.

35. The “green infrastructure” package for this development, including public access to the adjacent PROW which will provide a link to a circular walk to the PROW network to be available all year round is an integral part of the proposals. Taken together with a financial contribution towards improvements to the Public Rights of Way (PRoW) network within the vicinity of Hatfield Peverel, secured by Schedule 10 of the s106 agreement dated 8 January 2018, the Secretary of State is satisfied that these will provide an opportunity for dog walkers in close proximity to the development site, thus diverting them away from visiting the Blackwater Estuary (Mid-Essex Coast Phase 4) SPA & Ramsar site.

36. The financial contribution towards the Essex Recreation Disturbance Avoidance Monitoring Strategy (RAMS) is secured by Schedule 9 of the s106 agreement dated 8 January 2018.

37. Accordingly, the Secretary of State is satisfied that if the application were granted outline planning permission, the mitigation and avoidance measures he has deemed necessary to make the application proposal acceptable could be secured. In the light of this conclusion, he has not needed to go on to consider whether it can be demonstrated that there are no alternatives and there are imperative reasons of over-riding public interest as to why it must proceed.

38. Copies of the technical information and correspondence referred to in this Assessment may be obtained by application to the address at the bottom of the first page of the decision letter.

The Planning Inspectorate

Report to the Secretary of State for Housing, Communities and Local Government

by Brian Cook BA (Hons) DipTP MRTPI

an Inspector appointed by the Secretary of State

Date: 20 March 2018

THE TOWN AND COUNTRY PLANNING ACT 1990

BRAINTREE DISTRICT COUNCIL

APPLICATION BY

DAVID WILSON HOMES EASTERN

Inquiry Held on 12 December 2017

Land east of Gleneagles Way, Hatfield Peverel CM3 2JT

File Ref(s): APP/Z1510/V/17/3180729

File Ref: APP/Z1510/V/17/3180729
Land east of Gleneagles Way, Hatfield Peverel CM3 2JT

- The application was called in for decision by the Secretary of State by a direction, made under section 77 of the Town and Country Planning Act 1990, on 12 July 2017.
- The application is made by David Wilson Homes Eastern to Braintree District Council.
- The application Ref 16/02156/OUT is dated 16 December 2016.
- The development proposed is erection of 120 dwellings, together with associated public open space, landscaping, highways and drainage infrastructure works.

Summary of Recommendation: The application be approved.

Procedural Matters

Matters common to all three schemes considered at the Inquiry

1. The Inquiry opened on 12 December 2017 and sat for eight days. I carried out an unaccompanied visit to the site and a tour of the surrounding area on 3 January which included viewpoints to which I was directed by the parties. Closing submissions were made in writing in sequence during January. The Inquiry was closed in writing on 30 January 2018 following receipt of all outstanding documents including obligations entered into under s106 of the principal Act.

2. Three schemes were considered at the Inquiry; the application listed in the summary details above; an appeal against the refusal of an application by Gladman Developments Ltd (GDL) for outline planning permission for up to 80 dwellings (including up to 40% affordable housing), introduction of structural planting and landscaping, informal public open space and children's play area, surface water flood mitigation and attenuation, primary vehicular access off Stone Path Drive, and associated ancillary works on Land off Stone Path Drive, Hatfield Peverel, Essex (ref: APP/Z1510/W/16/3162004); and an outline application in the same terms but for up to 140 dwellings at the same address and submitted by the same applicant (ref: APP/Z1510/V/17/3180725).

3. In each case all matters except access are reserved for future determination.

4. The two applications were called in for determination by the Secretary of State on 12 July 2017. In each case the reason given was that he wished to be informed about:
   i) Policies in the National Planning Policy Framework (Framework) on delivering a wide choice of high quality homes;
   ii) The extent to which the proposed development is consistent with the development plan for the area; and
   iii) Any other matters the Inspector considers relevant.

5. The appeal was recovered for determination by the Secretary of State on 12 October 2017. In this case the reason given for the direction under s79 of the principal Act was that, having called in application 16/01813/OUT (file ref: APP/Z1510/V/17/3180725) which affects the same site, the Secretary of State wishes to re-determine the appeal himself so that he can consider both proposals at the same time. The appeal was therefore recovered because of the particular circumstances.

6. No pre-Inquiry meeting was held. Instead, I issued two pre-Inquiry notes on 8 November 2017 (INSP1) and 5 December 2017 (INSP2) and a further email dated 7 December 2017 relating specifically to housing land supply issues (INSP3).

7. In response to these notes three documents were produced on behalf of both GDL and David Wilson Homes Eastern (DWH). These are Cumulative Air Quality Impact Assessment (ID1.4), a Transport/Highways Note (ID1.5) and a Statement of Common Ground (SOCG) with Essex County Council (ECC) on education issues (ID1.8). A further Briefing Note: Clarification of Presentation Provided by Mr John Webb (ID20) was produced following the submissions from interested persons on the first day of the Inquiry.

8. Some evidence was common to all three schemes. This included that on housing land supply which was heard, at the parties' request, by way of a round table discussion. Much of the policy evidence was also common to all three schemes.

9. I issued a further note following the close of the Inquiry sessions (INSP4). This concerned a heritage matter that is not relevant to this application and also sought clarification of the submissions made in respect of Core Strategy policy CS1. In short, I asked whether it was the whole policy that should be considered to be out of date or just that part of it relating to housing numbers and, depending on the answer to that, whether the spatial strategy embedded in the policy could still be considered current if the settlement boundaries predicated upon out of date housing supply numbers could not. The clarifications provided have been taken into account.

10. In a further response before the close of the Inquiry the Parish Council advised that a Habitats Regulation Assessment Screening Report was submitted to Natural England on 18 December 2017 and, further, that Natural England's comments were received by the Council on 25 January 2018. Although the comments have not been made available to the Inquiry, the Parish Council states '…at face value the comments appear positive enabling the Neighbourhood Development Plan to progress.' It further advises that a meeting has been arranged for 5 February with the Council to discuss the way forward and '…to agree how to expedite the Plan.'

11. GDL co-ordinated the core documents listed in Annex A. Although there are three sets, one for each GDL scheme and another for the conjoined Inquiry, all three sets are listed in each report since reference was made throughout to all three sets. DWH prepared its own core documents specific to the scheme that is the subject of this report. The documents listed as being submitted during the Inquiry relate to all three schemes. It is perhaps worth noting that only a limited number of the documents listed was referred to in the written and oral evidence.

Matters specific to this application

12. Before the Inquiry the Planning Inspectorate agreed to the request made by Hatfield Peverel Parish Council (HPPC) to be a made Rule 6 (6) party.

13. The application was supported by a number of documents which are listed as SAV1 to SAV28 inclusive in Annex A.

14. DWH has prepared and submitted a SOCG with each of the Council and HPPC (SOCG4 and SOCG 5 respectively). Each follows the same format. Among the

matters that are agreed are the relevant policies of the adopted and emerging development plan, the application site and its surroundings, the application proposal and the position on a wide range of detailed considerations that are listed. Although the precise terms of each agreement is different (for example SOCG5 with HPPC does not acknowledge that the scheme would make a substantial contribution to the shortfall in five year housing land supply), each agrees that the Council cannot currently demonstrate a five year supply of housing land.

15. The SOCG between DWH and the Council records DWH's view that the objectively assessed housing need (OAHN) for market and affordable housing is higher than that proposed by the Council in the emerging development plan. In the event, this dispute was not pursued. DWH also records that it expects to contest the conclusions of the Council's updated five year housing land supply assessment when it is published.

16. There are five matters in dispute between DWH and HPPC. These are:
    a. The weight to be given to relevant polices in the adopted and emerging development plans;
    b. The weight to be given to the conflict with the spatial strategy of the development plan;
    c. The degree of harm to the rural character of the area and the landscape setting of the village and the weight to be given to that harm;
    d. Whether the proposal would result in a loss of part of the significant gap of open countryside between the settlements of Hatfield Peverel and Witham such as to harm the identities of these separate settlements; and
    e. Whether the adverse impacts of the scheme would significantly and demonstrably outweigh the benefits when assessed against the policies in the Framework as a whole.

17. An Obligation pursuant to s106 of the Act was entered into by DWH and the Council and a completed document (ID59) was submitted before the close of the Inquiry.

18. The Council issued a Screening Opinion on 28 August 2015 to the effect that a development of approximately 140 dwellings was not EIA development (paragraph 4.1 SOCG4). The Secretary of State came to the same view having considered the scheme both on its own and in combination with others.

The Site and Surroundings

19. The application site is about 5.2ha in extent and is situated on the north eastern side of Hatfield Peverel. To the north east again is the town of Witham.

20. The topography of the site, which is currently in use as arable farmland together with associated field margins, is generally flat. To the north east of the site is agricultural land and, beyond that, a fishing lake introduced following mineral extraction.

21. It is thus a greenfield site located outside but adjoining the built-up area of the village. In that respect it is bounded to the west by existing residential

development at Gleneagles Way, Wentworth Close, Birkdale Rise, Ferndown Way, Woodham Drive and Vicarage Crescent with the village beyond. A single private dwelling (Small Acres) lies immediately to the south. To the north is The Street (B1137) and the A12 slip road. The A12 links Ipswich, Colchester and Chelmsford to the M25 and east and central London beyond.

22. Agricultural vehicles use a break in the hedge in the south east corner to access the land. Other vehicular accesses are available from Birkdale Rise and Ferndown Way. A public right of way links Maldon Road to the south west of the application site with agricultural land to the north west. At present this path does not connect to the application site.

23. The site does not contain nor does it form part of any heritage asset or setting of any heritage asset. It lies within Flood Zone 1, the lowest probability of flooding.

24. The site is within the designated Hatfield Peverel Neighbourhood Plan (NDP) Area. The village is a Key Service Village (KSV) identified in the adopted development plan. Although slightly renamed, that status is maintained in the emerging plan. There is a good range of services and facilities in the village centre which is close to the application site. There are four bus stops within 0.5km of the application site used by various bus services. There are frequent services to Witham, Colchester, Chelmsford and other nearby settlements with less frequent services on Sundays. Trains run from the village to London Liverpool Street, Colchester, Braintree and other destinations.

Planning Policy

Adopted development plan

25. The adopted development plan for the area includes the saved policies of the Braintree District Local Plan Review (LPR) adopted in 2005 and the Braintree District Core Strategy (CS), adopted in 2011. Included in the SOCGs is a lengthy list of what are termed policies relevant to the application. Included in CD11.1, set B and CD10.1, set B are those policies and the supporting text that are of particular relevance to the determination of this application.

The LPR

26. Policy RLP 2 states that new development will be confined to the areas within town development boundaries and village envelopes. Outside these areas countryside policies will apply although exceptions may be made for affordable housing schemes which comply with LPR policy RLP 6. Such considerations do not apply in this case. Policy RLP 3 sets out a number of criteria that all residential development within development boundaries and village envelopes must meet.

27. RLP 80 addresses landscape features and habitats. In essence it requires applicants to assess the impact of a proposed development on wildlife and distinctive landscape features and for proposals in mitigation of any impacts to be put forward. Development that would not integrate successfully into the local landscape will not be permitted.

28. Other LPR policies listed in the SOCG are in a form designed to ensure that the technical requirements of statutory and other consultees are given policy force.

The wording is generally in the form of not allowing development unless required measures are secured.

The CS

29. Policy CS1 sets out the housing provision that will be made over the period 2009 to 2026. It also sets out where those new dwellings will be located. These include KSVs; Hatfield Peverel is such a village. Policy CS2 sets out the requirement for developments to provide affordable housing with the target percentage being determined by the location of the proposed development. A target of 40% applies on sites in rural areas.

30. The precise wording of policy CS5 is as follows:

> *Development outside town development boundaries, village envelopes and industrial development limits will be strictly controlled to uses appropriate to the countryside, in order to protect and enhance the landscape character and biodiversity, geodiversity and amenity of the countryside.*

31. The natural environment and biodiversity is addressed by policy CS8. This is a policy that covers almost two sides of A4. The gist however is that developers are required to have regard to, or to take account of, the impact of the proposed development on a wide range of factors. Of relevance to this proposal are the protection and enhancement of the natural environment in the widest sense, the protection of the best and most versatile agricultural land, the character of the landscape and its sensitivity to change and the minimisation of exposure to flood risk.

32. Policy CS9 is in many respects a general design principles policy. A good provision of high quality and accessible green space including accessible natural green space to meet, among other things, amenity needs is secured by policy CS10. Policy CS11 sets out, in essence, that development contributions towards necessary infrastructure services and facilities will be secured through, among other things, planning obligations.

Emerging development plan

Braintree New Local Plan (BNLP)

33. The BNLP was submitted to the Secretary of State in October 2017. The examination has therefore commenced. It is in two parts. Part 1 (CD12.3 set B) plans strategically across three local planning authority areas. At the time of the Inquiry the examination hearings were due to commence in January 2018. Part 2 (CD12.4 set B) relates to the Council area only. Hearing dates have yet to be arranged. There are a substantial number of representations raising fundamental issues with both parts of the BNLP. Those made by GDL are at CD33.1, set C.

34. Although in Part 1 policy SP 2 continues a spatial strategy for North Essex that seeks to accommodate development within or adjoining settlements according to their scale, sustainability and role, it also proposes three new garden communities one of which would be to the west of Braintree. Policy SP 3 sets out housing needs which for Braintree are 14,320 dwellings over the period 2013 to 2033 on the basis of an OAHN of 716 dwellings per annum.

35. Turning to part 2, the broad spatial strategy for the Council area is to concentrate development on the town of Braintree, planned new garden communities, Witham and the A12/Great Eastern Mainline corridor and Halstead. Hatfield Peverel lies within the A12/Great Eastern Mainline corridor and is identified as a KSV. Policy LPP 1 states:

> *Within development boundaries, development will be permitted where it satisfies amenity, design, environmental and highway criteria and where it can take place without material adverse detriment to the existing character and historic interest of the settlement.*
> *Development outside development boundaries will be strictly controlled to uses appropriate to the countryside to protect the intrinsic character and beauty of the countryside.*

36. Policy LPP 31 proposes a comprehensive redevelopment area on land between the A12 and the Great Eastern Main Line. This comprises four areas; the former Arla Dairy site; Sorrell's Field; Bury Farm; and a smaller site to the rear of Station Road. Among the list of things that the development will be expected to provide are financial contributions to early years and childcare provision, contributions towards primary and secondary education facilities and contributions to other community facilities including health provision as required by the NHS.

37. Landscape character and features are subject to policy LPP 71. This requires, in broad summary, applications for development to demonstrate an understanding of the landscape character of the area and show how the development proposed would fit in. Development that would not successfully integrate into the local landscape will not be permitted.

38. Green buffers are proposed through policy LPP 72 where it is considered desirable to prevent coalescence of two settlements. No green buffer is proposed between Hatfield Peverel and any other settlement such as Witham.

Hatfield Peverel Neighbourhood Development Plan (NDP)

39. The NDP (CD15.2, set B) has been submitted for examination and the examiner appointed. At Appendices MR23 to MR 25 of Mr Renow's proof (HPPC1) is the exchange of letters between the examiner and HPPC. On 5 September 2017 the examiner set out the two 'important' matters about which she had 'serious concerns in respect of the progress of the examination and the (HP)NDP meeting the statutory Basic Conditions' (MR23). Having considered the reply dated 13 September 2017 from HPPC (MR24), she wrote again on 20 September declining to continue the examination while the necessary additional work was undertaken (MR25). The reason given was '…the issues raised are sufficiently substantive that I feel to do so runs the risk of undertaking work that could later be found to be abortive and incur unnecessary costs to the local authority.'

40. The NDP is subject to unresolved objections including those from GDL (CD33.2, set C) and DWH (SAV50 and SAV52).

41. Policy HPE1 creates a green wedge along the eastern development boundary of Hatfield Peverel to avoid coalescence with Witham. The policy sets out those types of development that would be permitted within the green wedge provided that the open nature of the area is maintained. The list is very similar to those

listed in Framework paragraph 89. However, the 'very special circumstances' caveat set out in Framework paragraph 87 is not included.

42. The retention of existing trees, hedgerows and habitats, the mitigation of their loss and the retention of natural boundary treatments and the provision of new areas through new development is the subject of policy HPE2. The protection of the landscape setting of the village through the preservation and enhancement of views identified by the community and the Hatfield Peverel Landscape Character Assessment is achieved through policy HPE6.

Relevant Planning History

43. An outline application for the erection of up to 145 dwellings and associated infrastructure was refused planning permission in April 2016.

The Proposals

44. The application has been submitted in outline with all matters except access reserved for future approval. Access would be via Birkdale Rise. Up to 120 dwellings would be provided with 40% being affordable housing.

45. The application was accompanied by a Design and Access statement (SAV7) and a Parameters Plan (SAV4). Both are illustrative only and not therefore for approval. They do however indicate how the development might be implemented.

The cases put by the parties

46. Although three separate developments were being considered at the Inquiry, that was not, in the main, how the evidence was presented and tested. This was inevitable and the most efficient use of Inquiry time as there was a significant degree of commonality in, for example, the evidence given on policy and housing land supply topics. Counsel for GDL adopted the submissions of Mr Tucker in respect of both these matters. Similarly, Mr Tucker adopted the submissions of Ms Osmund-Smith in a limited number of matters and the case made by GDL in that respect is therefore set out below.

47. Although Stone Path Meadow Residents Group (SPMRG) has no interest in this application, Ms Scott did call evidence and make submissions about both policy and housing land supply. Those are included below for completeness since Mr Tucker refers to them in his submissions on these matters. Relevant SPMRG documents are also listed in Annex A.

48. Closing submissions were submitted in the same sequence as they would have been presented at the Inquiry. The usual convention whereby the scheme promoter hears the cases against the proposal before making its case was thus observed. As will be clear, Mr Tucker has responded to points made by other advocates.

49. It is fair to say that he is quite critical of the way in which some arguments have been put by Mr Graham for HPPC and, to a much lesser extent, Ms Scott for SPMRG. In short, the criticisms are that the case has been developed, if not actually changed, from that trailed in the statement of case; evidence from witnesses has been misrepresented and concessions in cross examination ignored.

50. I believe there is some substance to all of those criticisms and I have had regard to that in coming to my conclusions. While I have recorded the flavour of the criticisms in presenting the case set out, the exact, sometimes robust, phrasing used has not been included. Each closing submission is nevertheless listed and available to read in full.

The case for David Wilson Homes Eastern

Introduction

51. The land use issues raised against the DWH scheme are comparatively modest and are accepted by the Council not to be sufficient to outweigh the benefits of the scheme. This, in the context of a District where there is agreed to be an immediate need for additional housing land. Moreover, whilst HPPC and a handful of residents from the Gleneagles Estate have challenged the DWH case, it is perhaps of note that most of the time at this inquiry has been spent on the merits of the GDL schemes; the site specific merits of the DWH site were discussed and challenged in less than a day.

52. It was stated in opening that this is a comparatively straightforward proposal. In reality nothing which has been presented over the course of the Inquiry to change that position.

53. It is agreed with the Council that there is a significant deficit against the required 5 Year Land Supply (5YHLS) and there therefore is an immediate need for additional housing, which will necessarily have to include land that is presently undeveloped.

54. It is agreed that there is an immediate need for additional affordable housing.

55. There is no statutory consultee who has objected to the application scheme.

56. The only policy objections (albeit not raised by the Council) relating to the DWH proposals relate to:
    i) breach of 'in principle' countryside policies which are based upon settlement boundaries which are agreed by the HPPC's planning witness to be out of date; and
    ii) breach of policies in respect of a draft and flawed NDP which can only be afforded the most limited weight;

57. Requested contributions to infrastructure etc. are provided for in full in the s106 obligation.

58. The application site is located in a sustainable location (in this respect DWH acknowledges and adopts the case made by GDL) and relates well to the settlement of Hatfield Peverel which it is agreed will need to accommodate additional growth.

5 year housing land supply

59. Framework paragraph 47 directs that local planning authorities must identify and update a "supply of specific deliverable sites" to provide 5 years' worth of housing against their housing requirements. Deliverable is defined in footnote 11:

> *To be considered deliverable, sites should be available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered on the site within 5 years and in particular, that development of the site is viable. Sites with planning permission should be considered deliverable until permission expires, unless there is clear evidence that schemes will not be implemented within five years, for example they will not be viable, there is no longer a demand for the type of units or sites have long term phasing plans.*

60. In *St Modwen Developments Ltd v SOSCLG* [2017] EWCA Civ 1643 (paragraph 38, CD32.18 set C) the approach that should be taken to assessing whether a site is "deliverable" in the context of the footnote 11 definition is confirmed. Properly understood the judgment does no more than reiterate the ordinary and natural meaning of the words of the footnote. It does not, as Mr Graham sought to argue for HPPC, reduce the threshold for assessing yield from deliverable sites. In that case the Appellant was contending that only those sites with planning permission should be considered to be deliverable. Self-evidently, whether or not a site is counted into the exercise as "deliverable" is only the first step of the exercise - the crucial issue in this case is what comprises the likely yield of the deliverable sites. Doubtless this important distinction will be clear to the Secretary of State.

61. It appears from his closing submissions that Mr Graham has misinterpreted this important judgment. In response to HPPC's closing submissions, (paragraph 5, ID48) there is no judicial authority that "deliverable" means, as Mr Graham submits, 'non-fanciful'. The judgment of Lindblom LJ is clear that "deliverable" in the context of Framework paragraph 47 is defined solely by footnote 11. Mr Graham's submission in this regard is simply wrong.

62. To the minimum requirement to demonstrate a 5YHLS must be added a buffer of 5% or 20% depending upon whether there has "been a record of persistent under delivery". The courts have clarified what is meant by "persistent under delivery" in *Cotswold DC v SOSCLG* [2013] EWHC 3719 (paragraph 47, ID1.15). Essentially, whether under delivery has been persistent is a matter of planning judgment, considering a reasonable period of time for analysis and against a justifiable housing requirement which can include consideration of what is proposed in an adopted plan and evidence of need. Addressed below is why it is considered that a 20% buffer is appropriate.

63. The starting point for the numerical calculation of the 5YHLS is to identify an appropriate requirement against which to judge the available supply of deliverable sites. In this case the requirement of the adopted CS is based upon a hopelessly out of date figure derived from the "policy on" content of the long defunct Regional Spatial Strategy. In those circumstances it is agreed with all parties that it is appropriate to identify the OAHN based upon the most up to date evidence, without any policy adjustment.

64. What figure comprises the OAHN will be a matter of intense debate at the forthcoming examination in public of the emerging BNLP, to which there is intense dispute. That debate will take place in January 2018. However, given that the decisions of the Secretary of State will be made after this debate has taken place GDL/DWH in this Inquiry have taken the pragmatic decision not to use the Inquiry as a dry run for those arguments, but rather to accept for the

purposes of the Inquiry that the Council's figure is the correct one. Should compelling evidence arise to support a contrary position prior to the decision of the Secretary of State then that will be drawn to his attention in advance of that decision.

65. Thus, for the purposes of the Inquiry, Mr Spry adopts the Council's estimated OAHN of 716 dpa derived from the evidence base from the emerging BNLP. There is no disagreement between any of the parties to this Inquiry that this approach is reasonable and thus, this is the appropriate starting point.

66. The disagreement between the parties relates to the following areas:
    i) Liverpool or Sedgefield approach for addressing the shortfall:- The applicants and the Council have agreed, again for the purpose of this Inquiry, that the correct approach is Sedgefield. It is noted that the Council is pursuing the Liverpool methodology at their Local Plan examination, however it properly accepts, that without specific support from the examining Inspector, it could not reasonably support such an approach for the purpose of this Inquiry;
    ii) 5% or 20% buffer;
    iii) The supply of deliverable sites - There is a dispute between SPMRG and GDL/DWH on the sites that should be considered to be deliverable and therefore included in the supply with SPMRG arguing for the inclusion of draft local plan allocations. That position is expressly rejected by the Council which does not consider that those sites should be afforded sufficient weight to be included, given the stage in the process and the degree of unresolved controversy which relates to them. There is then the more important debate about the likely yield from a handful of disputed sites as between the Council and Mr Spry. This disagreement on yield on those sites is essentially one of judgment based upon agreed facts and is covered in detail in ID1.14 where the difference between the parties is reduced to a yield of 68 dwellings.

67. HPPC lead no evidence on the point. The submissions made in closing on which sites should be included must therefore be given no weight.

Liverpool v Sedgefield

68. The only parties advocating for a "Liverpool" approach - ie spreading the shortfall over the whole of the local plan period - are the Rule 6 parties. The Council has agreed that this is not the correct method for calculating the 5YHLS position for this Inquiry, whilst arguing for that position through the BNLP examination. Its reasoning is robust - until the examining Inspector endorses a different approach then based upon recent appeal decisions, the "preferred" approach of Planning Practice Guidance (PPG) of the Sedgefield methodology is to be preferred.

69. Notably there was no discernibly logical argument put forward by either of the Rule 6 parties to support a contrary case for the use of Liverpool. The best that was offered was that the Liverpool methodology would be appropriate because when looking back at the record of under delivery it is claimed that the Council cannot meet its requirement in the short term and therefore Liverpool should be used - repeated in the SPMRG closing (paragraph 86(ii), ID49). With the greatest of respect, this is not sound planning. Not only is it in conflict with

guidance to the contrary in PPG, but also it has serious social consequences, given that the shortfall in delivery is not one which arises over the next 15 years but rather it exists right now, at the start of the 5 year period under consideration. Not to do so now means deferring the meeting of needs - which is the antithesis of the tone and content of Framework paragraph 47.

70. The argument is that it is simply not possible to deliver the undersupply in the first 5 years. It is accepted the PPG says that the undersupply should be addressed within 5 years "where possible". However, self-evidently the correct approach to this guidance is to start from a position that it is possible and only change that view where it is shown to be impossible. An impossibility cannot be proven through previous undersupply - the very problem the buffer seeks to address. An impossibility might be proven in cases where the LPA's area is highly constrained e.g. AONB, Green Belt, other designations, or where there is clear market evidence of saturated demand. However, it is strongly submitted that "not possible" is a high bar and one which is not close to being met in this case.

71. The illogic in respect of the DWH site is even more striking since it argues that a site should not be released to a national housebuilder in a sustainable location because there are concerns about the ability of the market to deliver.

72. Thus, if a local planning authority cannot meet its housing requirement, the answer is to release more sites, not to accept that past under delivery represents the benchmark for future delivery and to thereby leave more families without a home.

73. The reality of the Rule 6 parties' position is clear from the SOCG on Additional Housing Supply Sites (ID37). This shows that they need to convince the Secretary of State in respect of all of their points in order to demonstrate a marginal excess against the 5YHLS - i.e. it is only on their flawed analysis of the additional sites together with the use of the Liverpool method and with only a 5% buffer that they can mathematically demonstrate a marginal excess over the 5YHLS. If nothing else this evidences just how dire the position on 5YHLS is in this District. If objectors have to argue for a swathe of implausible assumptions and can still only just show a mathematical exceedance then the clear reality of the land supply position is Braintree falls significantly below what is needed. If there was any doubt to the contrary then no doubt the Council would not have readily conceded the absence of a 5YHLS a matter of weeks before the start of the BNLP examination hearings.

74. In her written evidence, Mrs Jarvis for HPPC attempted to make a somewhat curious secondary argument that even if there was a need for additional housing then development should be distributed evenly within the hierarchy of settlements at the tier within which Hatfield Peverel falls (paragraph 2.15, HPPC2) However, in cross examination that point was rapidly abandoned.

75. First, she accepted that the table within the adopted CS is a minimum figure and therefore one can conclude that the table does not form a basis for a mathematical exercise in allocating the shortfall of housing within the hierarchy. Second, when she was carefully taken through the emerging BNLP she readily accepted that it contained significant changes to the adopted strategy of housing distribution - most obviously in its dependence upon the new Garden Communities - but crucially given the enhanced role of Hatfield Peverel as part of

the A12 corridor of growth. With all due respect to Mrs Jarvis her point went nowhere and it certainly does not support the proposition that she intended that the DWH proposals are out of scale with the settlement, let alone the more radical distribution point made at paragraph 2.15 of her proof.

76. In conclusion, DWH, supported by the Council, strongly submit that the Sedgefield approach must be preferred for this Inquiry. The social dimension of sustainable development must require the shortfall to be delivered within the 5 years - to do otherwise is simply to put off the requirement to boost significantly the supply of housing and results in a failure to meet the requirements of those who want to own a home in this part of the country.

The Buffer - 20% or 5%

77. The Council argues for a 5% buffer, GDL/DWH for 20%. The evidential basis for the debate is the update (ID1.11) to table 5.1 in Mr Spry's proof of evidence (4/POE). This updated the completions figures for the early part of the period. The updated table shows:
    i) The Council has not met annual requirement figure since 2011/12;
    ii) There has been persistent and significant under-delivery between 2012-2017;
    iii) There is under-delivery against current half year (April to Sept 2017);
    iv) In combination, there has been under-delivery of housing against the requirement of:
        - 458 - 16.5 yrs
        - 1,002 - 10.5 yrs
        - 1,448 - 9.5 yrs

78. This table compellingly illustrates the inescapable conclusion that there has been persistent under delivery of housing in Braintree. Against this, the Council's unconvincing contention was to argue that it was "unfair" to judge them against an OAHN of 716 from 2013 when the figure was only introduced in November 2016. Rather it was argued that the lower Structure Plan figure should be used. However, the Council will have been well aware that an increased OAHN was likely given the household projections figures (detailed in the updated table 5.1) which were consistently in excess of the Structure Plan figure.

79. It is also clear that the Council was aware of the likely increase in OAHN as evidenced in the minutes of the Council's meeting on 30 June 2014 (1/POE, Appendix 2). Under agenda item 23 the Council decided to withdraw the Site Allocation Development Management Development Plan Document. One of the points noted by the Council was that the Framework would impact on the housing need figures derived from the CS and that under a Framework compliant methodology, those numbers would go up. It is disingenuous by the Council to now say at this Inquiry that they were not aware of the housing numbers going up; plainly they were aware of this from at least 30 June 2014. Therefore not only is it sound planning to backdate the OAHN to 2013, but the Council were also well aware of the requirement to increase their housing figures.

80. The Council's approach is wholly unconvincing. Not only would it be to "reward" tardy plan making but it means judging under-delivery against the wrong metric. The intention of the buffer is not one of "punishing" a local authority which would

then bring in concepts of fairness. Rather it is an objective exercise to determine whether or not there is a need to increase the well of sites from which the development industry can draw in order to achieve the OAHN. In this case it is now known that the target of the adopted plan was substantially below what it ought to have been in order to meet the agreed OAHN and that delivery was also well below the OAHN. It is therefore known that delivery was persistently below what it should have been and more importantly there is no suggestion that the lower Structure Plan target was somehow constraining delivery.

81. The Framework, published in 2012, could not be clearer at Framework paragraph 215: local planning authorities had a period of 12 months to bring policies into line with the Framework and after this date, the weight to be given to any pre-Framework policy would depend on the consistency with it. This includes, as it must, pre- Framework housing requirement figures, such as those used by the Council taken from the now-revoked East of England Plan. The Council ought to have updated their housing requirement in this 12-month period and done so in a way that reflects Framework paragraph 159 which establishes that this should meet "household and population projections" (the figures for which are included in Mr Spry's updated table 5.1 and would have been known to the Council at the time). They could have done so in a Framework compliant way with a partial review. They did not do this and still have not done this. The only Framework compliant way is therefore to back date the OAHN requirement to 2013/14.

82. The Council argue in their closing (paragraph 23 to 24, ID47) that the OAHN figure from 2013/14 was not the "target" at the time as that figure only became known in 2016. Target is the wrong word; it is about meeting housing need. The Framework is clear. Framework paragraph 47 bullet point 2 requires local planning authorities to identify sites to meet their "housing requirements", that means the need at the time. It does not mean the need as it was last identified. To adopt such an approach could result in years of need being unmet simply because a Council has not carried out the necessary work to assess the actual housing need in its area. Mr Cannon's approach would be another reward to the sluggish authority and must be rejected. Mr Spry's must be preferred as an approach that supports the Government's clear objective of boosting the supply of housing by assessing need as it actually is, not as it once was.

83. The appeal decisions cited by SPMRG on this point (paragraphs 90 – 92, ID49) are not on point. The first decision (ID44) was in the context of an authority that had over supplied for an 8 year period. Plainly this Council is a long way from this having undersupplied over a number of years. The second decision (ID43) is also in the context of an authority that had over supplied. The arguments of DWH on this point should be preferred.

Conclusions on 5YHLS

84. If the Secretary of State accepts that the correct approach to calculating the land supply position in Braintree is Sedgefield/20%, then the supply is 3.3 years against the Council's OAHN figure. It is only if the Secretary of State concludes that all the stars have aligned and that the correct approach is Liverpool/5% with the additional sites put forward by the Rule 6 parties, that the Council could crawl over the line and show a 5YHLS - 5.38 years. It is GDL/DWHs' submissions that such a conclusion, given the weakness of the argument and absence of

supporting evidence, grossly over-stretches the elastic potential of planning judgment.

85. Should the Secretary of State conclude that the correct approach is Sedgefield/20% (or indeed Sedgefield/5, or Liverpool 5/20), then the Council cannot demonstrate a 5YHLS and there is a serious deficit against the minimum policy requirement of Government such that there is an immediate need to redress that deficit. Moreover relevant policy consequences kick in.

86. In the absence of a 5YHLS, Framework paragraph 49 says that "relevant policies for the supply of housing" are not to be considered up to date. The Supreme Court in *Suffolk Coastal DC v Hopkins Homes* [2017] UKSC 37 concluded that decision makers should adopt a narrow approach to identifying which policies should be considered as "relevant policies for the supply of housing" (paragraph 57, CD31.2 set C). However, this may not be the point of the exercise (paragraph 59):

> *The important question is not how to define individual policies, but whether the result is a five-year supply in accordance with the objectives set by paragraph 47. If there is a failure in that respect, it matters not whether the failure is because of the inadequacies of the policies specifically concerned with housing provision, or because of the over-restrictive nature of other non-housing policies.*

87. The approach is endorsed at paragraph 83:

> *If a planning authority that was in default of the requirement of a five-years supply were to continue to apply its environmental and amenity policies with full rigour, the objective of the Framework could be frustrated.*

88. The weight to be given to particular policies in the adopted and emerging local plans is addressed in due course. However, the point that must be taken from *Suffolk Coastal* is that where it is environmental (or other) policies that have resulted in the failure to demonstrate a 5YHLS, then those policies are as susceptible to having their weight reduced in the balance as those policies that fall within the definition of "relevant policies for the supply of housing".

89. HPPC's closing submissions on the ratio of *Suffolk Coastal* must be rejected (paragraph 36 and 37, ID48). The Supreme Court is not removing the s38(6) test; that is at the heart of decision making. It is a judgment about the weight to be given to policies where the plan is absent, silent or out of date. Mr Graham's approach of dismissing Framework paragraph 14 as "no more than guidance" rather than crucially important national policy which should be afforded substantial weight, is an invitation to the decision maker to fall into serious error.

90. Overall therefore it is firmly submitted:
    i) there is plainly a substantial deficit as against the minimum requirement to demonstrate a 5YHLS;
    ii) the effect of that is that Framework paragraph 49 is engaged;
    iii) that alone is sufficient to warrant engaging the presumption in Framework paragraph 14;
    iv) it is agreed that there is no immediate prospect of the emerging BNLP being adopted and therefore the only means by which the deficit can

be addressed is through the grant of planning permissions in sustainable locations; and

v) substantial weight should be afforded to the provision of general market housing which contributes to meeting that deficit.

Landscape issues

91. The Secretary of State is invited to place substantial reliance upon Jeremy Smith's proof of evidence (DWH3) and the landscape and visual impact assessment (LVIA) that underpins it which sets out the landscape considerations in a balanced and compelling way. That is not merely an exercise in advocacy, but for the following compelling reasons:

    i) the LVIA is the only LVIA which has been produced by anyone;

    ii) that LVIA was audited by the Council before it resolved to grant planning permission and was found to be methodologically sound;

    iii) no serious attack has been launched by anyone on the methodology of the LVIA. Whilst in cross examination HPPC sought to "test" some of the elements of the LVIA, HPPC had no comparable evidence to set against it;

    iv) the case in fact put to Mr Smith appeared to be to criticise him because he had taken localised viewpoints where either the application site will be seen in the context of immediately adjacent infrastructure or housing, or where it will be barely seen at all. Rather than making the HPPC's case, such arguments lead to the conclusion that the loss of this ordinary field, which is heavily influenced by adjacent urban development will give rise to no more than highly localised impacts which are readily capable of mitigation. What views will remain will be of housing from within the existing urban area - which is self-evidently characteristic and not harmful.

92. Thus, the reality from the Inquiry is that the totality of HPPC's landscape objections to the DWH scheme, both those put in a couple of pages of Mrs Jarvis's proof as well as the case put in cross examination, are deeply unconvincing. Whilst it is undoubtedly the case that the development of previously undeveloped land on the edge of a settlement gives rise to some inevitable harm, the loss of this otherwise unremarkable and unimportant area of agricultural land gives rise to harm at only the lowest end of the spectrum.

93. HPPC's case prior to the start of the Inquiry was that such a loss was not warranted - in particular because it will impinge upon an important view highlighted in the NDP and secondly that it will result in an unwarranted erosion of the gap between Hatfield Peverel and Witham. It is respectfully submitted that this approach is deeply a misguided one in both landscape and planning policy terms.

Erosion of the Gap

94. At policy HPE 1, the NDP seeks to prevent coalescence between Hatfield Peverel and Witham. It aims to do this by identifying a "green wedge" (page 24 – 25, CD16.3 set C). The previous version of this policy in an earlier draft of the NDP inappropriately references "Green Belt", rather than the provision of a green wedge as now included in the consultation draft of the NDP. While ostensibly recognising that this was inappropriate, the NDP policy now remarkably attempts

to promote a policy which is even more restrictive than Green Belt, as examined in evidence. Thus, in the Green Belt, planning permission ought to be granted if very special circumstances were evidenced, yet HPE1 provides no such provision. Similarly if a Green Belt were being established then a local planning authority would look to identify safeguarded land for future development to protect the inner boundary of the Green Belt, but here the HPE1 designation comes hard up against the settlement edge.

95. Mr Renow accepted in cross examination that the gap between Hatfield Peverel and Witham would still be almost a kilometre with the development. The assertions in paragraph 191 of HPPC's closing submissions were not put to Mr Smith and were not made by either HPPC witness.

96. The reality of policy HPE 1 is that it is trying to bestow Green Belt-style protection on the land between Hatfield Peverel and Witham, which probably provides an even more constrained policy context, contrary to any reasonable interpretation of the Framework.

97. It is also plain that this NDP policy draws no support from any credible evidence base, nor from adopted or emerging local plan policy. The BNLP (paragraphs 8.31 to 8.36 and policy LPP72, CD16.2 set C) sets out the thinking on green buffers by the Council. Notable by its absence is any protection for the gap between Hatfield Peverel and Witham, in which sits the DWH site.

98. Similarly the underlying landscape evidence base of the NDP does highlight concerns over coalescence, but not in relation to the tract of land within which the application site sits, which makes no mention at all about its supposed role in supporting an important gap.

99. It is noted that HPPC seeks some comfort in its approach from a single sentence email from an officer in the policy team of the Council (ID26), who provides a view which is patently at odds with that of the Council in promoting draft policy LPP72. It is unclear on what possible authority such an email might have been written, but the weight to be afforded to it must be very limited indeed. More importantly, policy HPE1 is subject to substantial and serious objection from both the public and the private sector which seriously diminishes the weight to be afforded to it. Most notably, there is an outstanding objection to this policy by the Essex County Council Spatial Planning Manager. In his objection he notes:

> *ECC notes that this [policy HPE 1] is not consistent with Policy LPP 72… The area along the eastern boundary of Hatfield Peverel is subject to a development, which has been approved by BDC, but is subject to a call-in. Consequently, this would infer that BDC does not consider this area as meeting the requirements, which seek to prevent coalescence of settlements.*

100. It is remarkable that HPPC did not seek to draw this to the attention of the Inquiry. With respect however it is the death knell for any contention that any more than the most limited weight should be afforded to policy HPE1.

An Important View?

101. Policy HPE 6 in the NDP (CD16.3 set C) seeks to:

protect the landscape setting of the village through the preservation and enhancement of views identified by the community and the Hatfield Peverel Landscape Character Assessment (2015). Any proposed development, or alterations to an area within these views must ensure their key features can continue to be enjoyed including distant buildings, areas of landscape and open agricultural countryside.

102. There are a whole host of reasons why this policy should be given very little, if any, weight in the final planning balance:

i) As Mrs Jarvis accepted, it is not consistent with policy LPP72 in the BNLP.

ii) In 2015, the Landscape Partnership carried out a Local Landscape Character Assessment for Hatfield Peverel (LLCA) (CD18.4 set C) that forms a fundamental part of the evidence base for the Neighbourhood Plan. The DWH site is within LLCA 4 (page 23 CD18.4). This independent study produced by landscape experts, identifies the key views within the LLCA as shown on the plan on page 23. The blue arrow pointing northeast goes along the public right of way which runs approx. 200m south of the site save for a very thin sliver of land to the extreme south of the site proper which it is intended will provide a landscaped link to the footpath network. When that is compared with the key views that have been included in the NDP (page 33, CD16.3, set C), what is immediately striking is that the view within the proximity of the application site identified by the independent experts is not the one carried forward into viewpoint 5 in the NDP. The experts, undertaking an approach with a recognisable methodology, identify the views out from the start of the public right of way which runs along the southern/eastern boundary of the site and which will be covered by public open space in the application, that view will be entirely unaffected by the appeal proposals. The NDP, at viewpoint 5, dismisses this and instead promotes a view from the end of a residential cul-de-sac, with no entrance to a public right of way that looks directly across the development site.

The reasons given for this change by Mr Renow in cross examination were that these views were voted for by local people and are considered to be the views deserving of policy protection within the NDP although Mr Renow did fairly accept that VP5 in the NDP is clearly inconsistent with the LLCA. More fairly still, he accepted that this was not a proper basis to plan protected views. Therefore HPPC's own evidence given by the person who claims to be at the heart of the neighbourhood planning process, is that the view protected in the NDP has no proper evidential basis. Instead, as Mr Smith made clear in his evidence, the view along the public right of way, that does have landscape value, will have any impacts upon it mitigated through boundary planting and the provision of public open space.

iii) The Workshop for Important Views document (CD 18.6 set C) which sets out the analysis that supposedly led to the inclusion of viewpoint 5 in the NDP as an important view, exposes the reality of the selection. This document, at page 6, where the potential views within LLCA 4 were considered, states as follows with regard to the view across the

application site that eventually became important view 5 in the NDP - "*Key features - line of tall trees, flat field, hedgerows and trees*", but perhaps most revealing "*Value to the community* **-** *not sure if this area has any value but the residents like the view*" (emphasis added). The true purpose of the identification of the important views is finally revealed when examining why some of the sites were removed from the NDP. The view of the River Ter (CD18.6 set C, page 2, row 6), that one might consider to be a quintessential view, was removed as it is "*Not subject to planning*". Likewise that the view over St. Andrews Church was removed despite being the "*Historic core of the settlement*". Thus, if the view in the NDP has any claim to be an important one then it is in the teeth of the evidence and based upon the fact that an unknown number of people seem to "like it". As put in cross examination, it is difficult to escape the inference that those promoting the NDP have sought to promote not the important view recommended by an expert but an unimportant view in order to make a case opposing the DWH site.

iv) Mr Renow sought to criticise the DWH assessment for not having taken account of the views of the community. A landscape character assessment undertaken by a professional landscape architect is intended to convey the objective judgment of the "assessor" and therefore is very rarely materially influenced by the views of the public, unless representations raise an objectively justifiable concern which had not been previously considered. The point is that it is a professional piece of work, which follows recognised guidance, not an informal local referendum on popularity of views. Indeed, when the Neighbourhood Plan team did attempt to take the view of locals as to which views were "important" it did so in a haphazard and inconsistent way which deviated from its purported evidence base. However even on that approach it is of note that the view from Gleneagles Way (proposed to be protected in the NDP) came 4th out of 5 proposed views. So even on his own argument, it does not suggest that even the local community find the view particularly important.

v) The final piece of evidence exposing the real intentions of the NDP is set out at CD18.3, set C - Hatfield Peverel Site Assessment 2017. The application site is considered at page 8. It identifies no beneficial opportunities at the site, despite those drafting this document in 2017 being aware of this application to develop the site. Mr Renow accepted in cross-examination that the non-preferred sites were marked in this document with no opportunities in contrast with the preferred sites. It is in short an admitted exercise in advocacy and not evidence worthy of the name. Mr Renow reasonably made the above concession and it must be given significant weight. Paragraph 99 of the HPPC closing submissions which row back from this concession on this point can be afforded no weight at all.

vi) HPPC note in their closing submissions that policy HPE6 deals with views 'identified by the community and the Hatfield Peverel Landscape Character Assessment'. Those are the words in the policy, but so far as relevant to the appeal site those words are flatly contradicted by the evidence base (see above). Indeed Mr Renow properly accepted in

cross examination that the choice of views was only based upon community views - a process with no recognised methodology.

The emerging NP

103. The reality is that the NDP, insofar as it addresses landscape issues, is a partial document. It is not a balanced piece of planning analysis that looks to meet housing need and protect landscapes meriting protection. The motivation appears to have been in part to stymy development in Hatfield Peverel other than on the Arla Dairy site. Consequently, the landscape policies within the NDP should be given very limited, if any, weight. They lack any balanced and considered evidence base and are subject to detailed and robust objection. Additionally, as will be addressed in more detail below, the NDP is some considerable way from being made and is best described as being "stalled" with no immediate hope of being restarted.

Landscape Conclusions

104. The reality of the landscape evidence with regard to the DWH site as it has emerged to the Inquiry is that Mr Smith's approach and assessment withstood challenge and were essentially not contradicted by contrary evidence. The effects of the development on the wider landscape are assessed as minor. Likewise, the visual effects of the development are properly characterised as highly localised especially once the mitigation has matured. As Mr Smith's photographs readily demonstrate there will then be no intervisibility between Hatfield Peverel and Witham, both as a result of distance, intervening landscaping, proposed landscaping as well as the marked effects of the intervening ridge that Mr Smith described. That position will not alter even if the emerging BNLP allocations are endorsed. No proper challenge was raised to Mr Smith's assessment of the scheme against the Eastleigh test. To be blunt just as with landscape, the issue of an impact upon coalescence of settlement is a makeweight point as far as the Gleneagles site is concerned.

105. Regrettably, Mr Graham has not properly recorded the evidence of Mr Smith on landscape. He did not accept that there would be clear intervisibility between the application site and Witham - evidenced in the photo montages. Mr Smith did state that it would be possible to see Wood End Farm as one leaves Hatfield Peverel on the A12. This is not the same as views from the DWH site and nor would it impact upon coalescence.

106. HPPC seek to draw attention to the view from D's Diner as making a positive contribution to the character of the area (paragraph 193 ID48). As Mr Smith made clear in cross examination, this view includes the A12 on the left, the cycle path, an unsurfaced car park in the foreground and the existing housing and diner to the right. The proportion of the view that is occupied by the application site is relatively small and, most importantly the context of new homes in this view, would be existing urban development and substantial infrastructure to both the left and right. Using the Guidelines for Landscape and Visual Impact Assessment 3rd Edition (GLVIA3) process there is no doubt that this visual effect would be less than significant.

107. Finally, DWH, through Mr Smith, produced a document to the Inquiry (Statement of Landscape Principles, ID46), which should be read alongside the parameters plan (SAV4) and the design and access statement (SAV7). This sets

out in plain terms the approach the developer will take to mitigating the limited landscape harms caused by the development. The conclusion the Secretary of State will be invited to make is that there are no supportable landscape reasons for refusing this scheme. HPPC seem to suggest (paragraph 192 ID48) that a 9 metre high barrier of planting along the eastern edge of the site would "detrimentally change the character of the locality". There is however already a belt of shrubs and trees along this edge of the site and these extend to above 15 metres in height. Some of the existing trees are non-native. The DWH proposals would augment and enhance the existing planting in a manner which is entirely in character with the area.

Planning

108. DWH's planning case is set out in the proof of evidence from Mr Jonathan Dixon (DWH1), which was subject to only the most limited of challenges.

109. As stated in opening, the site is not in or adjacent to any heritage or landscape related designations and there are no technical reasons put forward to warrant the withholding of consent. The landscape objections put forward by HPPC have been addressed above and do not come close to providing a sound policy and legal basis for withholding consent, let alone comprising a basis to displace the presumption in favour of sustainable development.

110. The relevant policy issues in adopted and emerging local plans are limited to policies of minimum housing provision within the settlement hierarchy (CS1); general protection for the countryside (CS5); emerging policies on development boundaries (LPP 1); and policies in the NDP that have already been considered.

111. Dealing firstly with CS1. As Mrs Jarvis rightly accepted, this policy is presumed to be out of date as a result of the failure to show a 5YHLS. Therefore, it will carry reduced weight in the overall planning balance. However, it is also out of date and therefore of reduced weight, for several other reasons.

112. Had plan preparation proceeded properly, then the settlement boundaries, which were first established in the mid-1990s, would have been reviewed many years ago. However, there is nothing before the Inquiry to suggest that the settlement boundaries in the District have ever been subject to a comprehensive review (as opposed to merely amending settlement boundaries to accommodate strategic allocations), let alone in Hatfield Peverel. On the evidence it appears highly likely, therefore, that twenty year old boundaries have simply been rolled forward from an old (and a now-withdrawn) plan. Without an evidence base to support the policy, it is not enough to simply point at the words on the page and cry refuse - it must have an evidence base.

113. Mrs Jarvis suggested that the emerging BNLP part 2 (CD16.2 set C) had been based upon a review of the boundaries. However, she was only able to provide a short report which appears to have been provided at an early stage of plan preparation to identify what principles would be applied to a future review (HPPC2, Appendix PJ3). It emphatically does not record or detail that any such review has taken place. When Mrs Jarvis was pressed, she readily conceded in cross examination that she had not been able to identify any documentation to support the proposition that the boundaries in the District have been reviewed as part of the emerging BNLP process. It is plain from the evidence of all the

planning witnesses, including HPPC, that Mr Dixon's approach to the out of datedness of settlement boundaries is manifest.

114. What is clear is that the Council readily accepts that in order to meet its immediate needs that greenfield land will need to be released.

115. Hatfield Peverel is a KSV within the adopted and emerging plans. Far from being preclusive of growth, that designation explicitly anticipates that the settlement can accommodate growth. Indeed in the emerging BNLP the settlements on the A12 corridor (including Hatfield Peverel) are identified as being a particular focus for growth - a point noted by HPPC in their closing submission (paragraph 70 ID48). Mrs Jarvis readily accepted that Hatfield Peverel could accommodate additional growth. However her point appeared to be that the development of the appeal site would lead to excessive growth. However the yardstick against which she sought to judge whether that was excessive related to a plan whose period has expired and relating to a table of indicative distribution of growth which is explicitly a minimum. When pressed, she accepted that there was no policy limitation which is breached by the grant of planning permission. Certainly it is untenable to contend that the grant of planning permission in this case would comprise disproportionate growth for Hatfield Peverel.

116. Given the considerable under supply, it is essential that further land comes forward for development in Hatfield Peverel to meet the unmet need. Given the very limited objections to this site (both in substance and number), the DWH site is well placed to help the Council get closer to delivering its housing requirement.

117. Turning now to Policy CS5, this comprises a general blanket countryside protection policy. Mrs Jarvis rightly accepted that the weight to be given to this policy must be interpreted with regard to its consistency with the Framework. This policy imposes a blanket ban upon development in the countryside, which is not included in the Framework. Mrs Jarvis sought to place reliance upon Framework paragraph 17 which sets out the overarching principles. Eventually she conceded that the word "strictly" in CS5 went beyond what is included in the Framework. This policy should be given much reduced weight as it is inconsistent with the Framework and, recalling Lord Gill in *Suffolk Coastal*, such overly restrictive policies that result in less than 5YHLS must be given reduced weight or they would be frustrating the objectives of the Framework (CD31.2 set C).

118. The Council seek to argue that policy CS5 should attract moderate weight because that is what other Inspectors have concluded and it complies with Framework paragraph 17 by recognising the intrinsic character and beauty of the countryside. That submission on Framework paragraph 17 is flawed for the reasons above. Previous Inspectors' conclusions are persuasive but they are not binding, given the strength of argument that this policy carries limited weight the Inspector and ultimately the Secretary of State can, and should, come to a different conclusion.

119. Turning to the emerging BNLP (CD 16.2 set C). This directs substantial growth to the garden villages, however Mrs Jarvis accepted that the emerging plan was still subject to a lot of objections. Despite this (and remembering the terms of Framework paragraph 216) Mrs Jarvis inexplicably concluded that the BNLP

should carry "fairly significant" weight as it was compliant with the Framework. It is not entirely clear what is meant by "fairly significant weight".

120. This is particularly inexplicable as she accepted that the substantial controversy still attached to the BNLP would reduce the weight that could be attached and she finally concluded that the Inspector should "be cautious" about the weight to be attached to the plan. It seems that this conclusion is well founded and accords with the careful analysis of Mr Dixon. Mrs Jarvis agreed with Mr Dixon that the BNLP was not in a position to solve the immediate problems with the 5YHLS and that it will not solve it in the next 18 months. It was further accepted that the plan would not be adopted soon - "It has some way to go". All of these points of agreement support the position of the applicant, as put forward by Mr Dixon, that the BNLP should be given significantly reduced weight.

121. Finally, on the NDP. Despite the misguided optimism of Mr Renow, this is a very long way from being made:

122. Since the NDP proposes to allocate land and does so in a way which is inconsistent with both the adopted and emerging LP (Mr Renow cross examination), then it will need a Strategic Environmental Assessment (SEA) to be carried out. Such an exercise has not been undertaken and as Mr Renow accepted (cross examination), no steps have been taken to complete one. Indeed at times he appeared not to understand what an SEA was. The simple and undeniable fact is that if the NDP wants to allocate sites it must complete an SEA unless it is merely parasitic upon an adopted local plan (which it plainly is not). It does not remotely depend on the outcome of a Habitats Regulation Assessment (HRA) screening assessment as Mr Graham submits (para 84 ID48) which is an important but parallel legal process. The point made by SPMRG (paragraph 122 ID49) should also be rejected. Whilst the lack of the SEA might not directly affect landscape or protected views, it manifestly affects the ability of the plan to move (lawfully) to the next stage. If it cannot move forward in the process, then the weight to all policies in the plan cannot increase. Notwithstanding this, there are the other concerns with landscape and protected view policy in the NDP already explained. Mr Graham is simply wrong on this point.

123. Mr Renow's explanation as to why an SEA was not needed was because the Council has completed a HRA in respect of the planning application upon the Arla site, ie the site that the NDP proposes to allocate. This exercise was undertaken, as is required by Regulation 61 of the Conservation of Habitats and Species Regulations 2010, because a development is proposed on the site for 145 units. To suggest that this HRA would displace the need for an SEA to allocate the site in the NDP is a fundamental misunderstanding of what is required for the NDP to allocate a site in a lawful manner. An HRA for a specific proposal is not an SEA for an allocation in a plan. If the NDP proceeds on the basis advocated by Mr Renow, it will be unlawful.

124. SAV49 is a letter from the independent examiner of the NDP. As of the letter date, 20 September 2017, it was anticipated by the neighbourhood group, as expressed to the examiner, that the SEA and HRA Screening Report would be available within 3 - 4 weeks - i.e. around mid-October 2017. No such reports have been prepared, nor is there any clear indication as to whether they ever will

be. (*note: this submission was written before HPPC notified the parties that the document had in fact been submitted to Natural England [10]*)

125. The basic conditions against which a neighbourhood plan is to be judged include compliance with European requirement and conformity with the adopted development plan. There is very clear authority that whilst there is nothing wrong with a neighbourhood plan being prepared to be consistent with both the emerging and the adopted development plan, it is against the adopted plan that the neighbourhood plan should be tested (paragraph 82 CD31.1 set C). Thus, the NDP cannot avoid meeting the obligation for a development plan which contains allocations as a plan or project to be subject to an SEA simply because it follows the lead of the emerging BNLP. Nor can it simply piggy-back on the back of the SEA for the emerging BNLP since that relates to a different plan with different considerations which will not be adopted until mid-2018 at the earliest.

126. Mr Renow accepted in cross examination that there may be a substantive problem with the SEA, but despite this, he considers that the NDP will be made well before the BNLP is adopted, at the latest June 2018. If that was the case then it would be the source of an allocation which has been untested by an SEA, and inconsistent with the adopted local plan. One reason for this is that CS policy CS4 requires the retention of existing employment sites. Paragraph 6.2 of the CS makes it clear that this also relates to KSVs. A housing allocation is plainly inconsistent with CS4. To allocate a housing site on the Arla site in advance of the emerging BNLP being adopted with such an allocation within it, and without an SEA would plainly not meet the basic conditions for a neighbourhood plan required by law.

127. In any event, it seems highly unlikely that the NDP could be lawfully made by June 2018 as a matter of simple practicalities. If the NDP seeks to allocate sites and proceeds to do so without an appropriate SEA, then it will be unlawful. Of course it could avoid any such problems by not allocating any sites or by waiting to progress further until after the BNLP is adopted, which would thereby abrogate the need for an SEA. If the NDP were modified so that it does not allocate any sites then it would still be fundamentally flawed because of the evidential issues with HPE1 and HPE 6. However if those flaws were also addressed (by deleting HPE1 and removing viewpoint 5 then such an adopted plan would not benefit from the protection of the Written Ministerial Statement on Neighbourhood Planning.

128. Moreover, just promoting the proposed allocation of the Arla Dairy site in the NDP is out of step with the BNLP (policy LLP 31) that identifies the Arla Dairy site for "mixed use of up to 200 dwellings". The NDP has far from a smooth flight path to landing. Indeed, to borrow Mrs Jarvis's words, it is a "hiccupped" plan that has various stages still to complete. She went further and said that she could not be sure whether the NDP was compliant with the Framework.

129. The argument put forward to support the argument for HPPC that the NDP should carry significant weight was because it had the support of the local community, as shown through the poll carried out by the Neighbourhood Plan group. This is wholly unsupportable in planning terms. The informal poll is not a referendum and weight does not depend simply upon popularity. It is also not an official stage in the development of the NDP. The weight to be given to the NDP must be in accordance with the requirements of Framework paragraph216. It is

plain that Mr Renow's view of how weight is to be ascribed to a neighbourhood plan has absolutely no support in national policy or guidance.

130. The conclusion on the NDP is that the policies that are relevant should only be given very limited weight for the reasons above. Therefore, whilst HPPC seeks to argue that the development is in breach of policies HPE1 and HPE 6, the weight to be afforded to such conflict with policy is substantially reduced.

Education

131. The applicant relies upon the Education SOCG (ID1.8) to evidence the absence of any education harm requiring mitigation from this development. Whilst some local residents have expressed concern at finding school places, the applicant submits that greater weight must be placed upon the education SOCG. There is no objection from Essex County Council as local education authority and planning permission should not be withheld on this basis.

132. HPPC seek to make submissions that "for many years, primary-age occupants of the Inquiry scheme would be required to travel further afield for schooling". There is simply no evidence of this before the Inquiry, which comprises evidentially unsubstantiated scaremongering and should be rejected. Had Essex County Council considered that the proposed education provision was unacceptable then it would have objected.

Highways

133. DWH rely upon the Transport Assessment (SAV25) and the highways evidence produced as part of the application to demonstrate that all highways impact can be properly mitigated. The Highways Authority has no objections to the scheme, and there is no basis to come to a different conclusion.

Conclusion

134. The Council cannot demonstrate a 5 year supply of housing land. Therefore, substantial weight should be afforded to a proposal for general market housing which helps to redress that deficit and, critically, the tilted balance in Framework paragraph14 applies. What is plain from the evidence put before this Inquiry, is that no objections have come close to significantly and demonstrably outweighing the considerable benefits of this scheme - the delivery of much needed market and affordable housing, the provision of public open space and the economic benefits of developing such a scheme. The application proposals comprise sustainable development which should be consented without delay.

135. For the Gleneagles site there can be no issues with regard to deliverability since it is controlled by a national housebuilder who, on instructions, is keen to bring the site forward for development as soon as possible.

136. As such, it is respectfully submitted that the Inspector recommends permission be granted so that development on this site can get underway - contributing meeting the housing requirement in this part of Essex.

Points from the Case for Gladman Developments Ltd adopted by David Wilson Homes and/or relevant to the determination of this application

The sustainability of Hatfield Peverel as a location for development

137. There is no evidence that Hatfield Peverel is anything other than a sustainable location for new housing growth. There are a range of services, facilities, clubs and activities that could accommodate new residents and to which new population within the village would contribute.

138. Mr Renow seeks to suggest that the village lacks the services and facilities to accommodate new development (paragraph 10 HPPC1). However, he includes at Appendix MR5 a list of clubs, organisations and businesses that exist within the village -they demonstrate the wealth of services and facilities that are available - with Mr Renow confirming that some clubs are so popular, they have had to find other venues outside of the village. Hatfield Peverel is a thriving settlement.

139. What Appendix MR5 confirms is that there are a range of social opportunities for new residents as well as a number of services and facilities that will cater for day to day living. Those include convenience stores that would provide for top up shopping, as well as hairdressers, beauticians, garages, a library, dry cleaner, florists and a number of restaurants, to name just a few. There is also the school and the surgery. Mr Renow accepted that all of those businesses give rise to employment opportunities for people working in the village.

140. Mr Renow's point was that, over time, employment opportunities in the village have reduced. However, despite that, there are no allocations within the emerging NDP for an employment site and the one allocation for housing (the Arla site) does not require a mix of uses to come forward. Mr Renow accepted there were good links for commuters from the village to travel to work either by train or bus and thus residents of Hatfield Peverel can access employment centres in a sustainable way without having to rely on the private car.

141. He also accepted the train service begins around 5am in the morning, with trains to London and runs until after midnight. He accepted that the train station is within walking distance of the site and that other nearby towns and job opportunities can be accessed by sustainable transport modes. Mr Renow accepted that people would not have to commute by car if they were leaving the village to find work.

Planning policies

Policy CS5

142. It is not GDL's case that policy CS5, or indeed the need to recognise the intrinsic beauty of the countryside can be forgotten about because CS5 is based on out of date boundaries and there is not a 5YHLS. The impact of the scheme on the landscape is an important consideration in this appeal, but CS5 requires all schemes in all open countryside to satisfy a threshold that the Framework requires only in relation to valued landscapes - to "protect and enhance". It is that threshold - a fundamental component of the policy - and what it is seeking to achieve that is inconsistent with the Framework and was exactly the point that was addressed in *Telford and Wrekin* (CD31.3 set C).

143. Mrs Jarvis alleged that the policy was consistent with the aims of the Framework paragraph 17(7) but also agreed in cross examination both that the relevant bullet point of Framework paragraph 17 does not set an absolute threshold for all development and that there is no general duty to enhance the countryside. It will be clear that the part of Framework paragraph 17 relied on provides a broad overarching principle which is to be implemented by more detailed policies within the Framework. It is relevant in that respect that Framework paragraph 6 does not include paragraph 17 within the definition of "sustainable development".

144. Moreover, that particular bullet point directly correlates to Framework Chapter 11 and paragraph 109 where what is required to be enhanced and protected are valued landscapes - not ordinary countryside.

145. Further, the observance of development boundaries is absolutely integral to the policy. If that part of the policy is removed as it must be given the out datedness of the boundary (the Council does not apply rigid boundaries – paragraph 59, CD32.2 set C), it no longer makes any sense. There is no criterion against which to measure the acceptability of development such as those before the Inquiry other than whether it is the right or wrong side of the boundary.

146. The weight to be given to CS5 is of course a matter of planning judgement for the decision-taker but regard should be had to the reasoning in *Telford and Wrekin*. HPPC on *Cawrey Ltd v SSCLG* [2016] EWHC 1198 in response (paragraph 51 ID48). However, the submission also omits a key part of the very paragraph it relies on that makes clear the important distinction in that case - that the Inspector had found the Council could demonstrate a 5YHLS. That finding had a direct bearing on the Judge's findings at paragraph 50 which are reproduced in full below:

> *Whether that loss of countryside is important in any particular case is a matter of planning judgment for the decision maker. In any event, extant policies in a Development Plan which are protective of countryside must be had regard to, and in a case such as this a conflict with them could properly determine the s 38(6) PCPA 2004 issue. If the conclusion has been reached that the proposal does conflict with the development plan as a whole, then a conclusion that a development should then be permitted will require a judgment that material considerations justify the grant of permission. If reliance is then placed on NPPF, one must remember always what Lindblom LJ has said in Suffolk Coastal about its status. It is not suggested in this case that this is one where the NPPF paragraph [14] test applies, which given the Inspector's findings on the effect on the landscape, and the fact that HBBC is the Borough, and Ratby the settlement, where the policies considered in Bloor applied, is unsurprising. Nor is it suggested that he should have applied NPPF [49] given his findings on housing land. There is in my judgment nothing at all in NPPF which requires an Inspector to give no or little weight to extant policies in the Development Plan. Were it to do so, it would be incompatible with the statutory basis of development control in s 38(6) PCPA 2004 and s 70 TCPA 1990. (*emphasis added*)*

Policy RLP2

147. GDL agrees with the Council that policy RLP2 can attract only limited weight for the reasons set out in its submissions (paragraph 35 ID47). Both HPPC and SPMRG rely on the policy but do not engage with the weight to be given to it. It is clearly out of date and incapable of delivering housing to meet the needs of the population now.

The Case for Hatfield Peverel Parish Council

148. The three schemes each conflict with the statutory development plan and so the starting-point is that they should be refused permission. In essence, the decisions on the three schemes will come down to whether the potential supply of housing should be given priority over the policy objectives of directing growth to other locations within development boundaries and at higher-order settlements in order to protect the environment (including the character of the settlement and historic assets), avoid excessive pressure on local facilities and infrastructure, and reduce the need to travel. This is a question of weight, which may depend on the extent to which any shortfall in 5 year housing land supply is identified, and on the Secretary of State's confidence that the proposed housing would be delivered on site within the 5 years.

5 year housing land supply: the four step approach

Step 1: quantify the deliverable sites

149. The Secretary of State will need to ask for the purpose of applying the Framework whether there is any shortfall in terms of 'supply of specific deliverable sites sufficient to provide five years worth of housing against their housing requirements' (that is, the OAHN) and the extent of any shortfall (Framework paragraph 47, second bullet, emphasis added). This is a matter of planning judgment in terms of assessing whether a particular site is 'deliverable', and the capacity of a particular site to take a given quantity of housing, but it is otherwise a straightforward quantification exercise.

150. The policy test whether housing land is to be included in the 5YHLS is merely whether there is a 'realistic' - that is, non-fanciful - prospect of housing delivery (*St Modwen v SSCLG* [2017] EWCA Civ 1643 paragraphs 35-39, CD32.18 set C). A site does not have to be allocated in any plan, let alone be granted permission, in order to be included in the 5YHLS. Its delivery does not have to be a certainty, nor even more likely than not; the policy requires that it be 'realistic'.

151. Just because a site is outside development boundaries of the current plan does not mean it should be treated as having an unrealistic prospect of development where the planning authority has allocated it in an emerging plan and is currently of the view that it is a suitable and available site, viable and achievable within 5 years for the purpose of footnote 11 of the Framework, so has included it in its 5YHLS trajectory. In the Council's closing submissions, they give the example of the Gimsons site, and assert that "[u]ntil such time as the draft allocation supersedes the present development plan status, it cannot be considered 'deliverable'."

152. This statement demonstrates that the Council has taken and continues to take a legally erroneous approach to counting sites within its 5YHLS for the purpose of Framework paragraph 47. What the Council has done is to treat sites not

allocated in the current plan as *ipso facto* incapable of being considered suitable, and has not included a single one in its land supply monitoring figures for the next 5 years. It is elementary that the adopted development plan is the starting-point but it does not predetermine the outcome of any planning application where there are good reasons for determining it otherwise than in accordance with that plan. If it were, this Inquiry would have been unnecessary. The Council cannot rationally treat sites as suitable for housing for the purpose of its forward planning but at the same time automatically treat them as unsuitable when determining actual applications just because the emerging plan has not been adopted.

153. Of course there might be other circumstances where a site allocated in an emerging plan would only become realistic for delivery in the 5 years if the plan was adopted (such as a site requiring planned infrastructure and/or a new settlement to be in existence first, if that new infrastructure or settlement would not otherwise come forward in time). No such circumstances apply here; the new settlements proposed in the emerging local plan are not proposed to come forward in the first 5 years of the plan, and are not relied upon in the early part of the housing trajectory. This is the advice in the PPG which states "If there are no significant constraints (eg. infrastructure) to overcome such as infrastructure [sic] sites not allocated within a development plan or without planning permission can be considered capable of being delivered within a 5-year timeframe." (Paragraph: 031 Reference ID: 3-031-20140306).

154. On this analysis, it was wrong to exclude the sites that the Council is satisfied are soundly evidenced for inclusion in the trajectory showing the 'expected rate of housing delivery' for the purpose of promoting its local plan.

155. On that basis, the Secretary of State is entitled to rely on the sites counted in the housing trajectory appended to the Council's letter to the Rt Hon Priti Patel dated 29 November 2017 (ID42). On that basis, there is no, or no material, shortfall for the purpose of Framework paragraph 47. The trajectory table shows delivery in the first 5 years of the plan period as (501 + 577 + 1128 + 1443 + 1329), which is 4978 dwellings. Taking OAHN of 716, multiplying by 1.05 to allow for the 5% buffer gives 751.8 (say 752) dwellings per year), this gives 6.62 years' supply. If the Liverpool approach to adding backlog is adopted ((716 + 107) x 1.05), the annual requirement would need to be 864 which gives 5.76 years' supply (taking the OAHN figures from Alison Hutchinson's proof, (BDC1, table 1 on p.11). If the Sedgefield approach is adopted ((716 + 332) x 1.05 using Ms Hutchinson's figures) an annual requirement of 1,100 and 4.52yrs' supply is the outcome. The text of the letter to Ms Patel quotes figures of 6.24yrs and 4.9 yrs respectively, but the workings for arriving at those are not indicated.

156. Furthermore, the housing land supply position is improving and may have improved further by the time the Secretary of State issues a decision. For example, Mrs Hutchinson's Proof, (BDC1 table 2, page 12) shows improvement from 3.91 to 3.97yrs on the Liverpool approach and 3.1 to 3.9 years on the Sedgefield approach between 31 March 2017 and 30 September 2017, adopting the Council's approach of excluding the emerging allocations.

157. It is appreciated that the prospect of delivery of housing on one or more of the sites before this Inquiry may also be relevant to the determination of these

schemes, if - contrary to HPPC's submissions that these sites are not suitable - the Framework footnote 11 requirements were thought to be met and it were considered that housing on one or both was realistically likely to be delivered within 5 years (whether or not by virtue of these applications). Some addition to the supply might need to be made for that by the Secretary of State depending upon how each appeal or application is to be determined, when determining the others.

Step 2: take the OAHN

158. There was uncontested evidence at this Inquiry that the extent of OAHN is 716 dwellings annually.

Step 3: decision as to whether to add to the requirement to allow for past shortfall and over what period to expect this to be made up

159. At the Inquiry there was a debate about whether an addition should be made to the housing requirement to make up for previous shortfalls using either the Liverpool or the Sedgefield methods.

160. This exercise is essentially a policy judgment for the decision-maker which, importantly, is not prescribed by Framework paragraph 47. As Lindblom J noted in *Bloor Homes East Midlands Ltd v SSCLG* [2014] EWHC 754 (paragraph 108, ID61) upholding a decision to apply a Liverpool approach:

> *Neither method is prescribed, or said to be preferable to the other, in government policy in the NPPF. In my view the inspector was free to come to his own judgment on this question.*

161. Framework paragraph 47 does not say to add previous years' shortfalls to the current OAHN to arrive at an annual requirement figure. This may be of significance when applying Framework paragraph 49 and determining whether the second bullet of the decision-taking limb of Framework paragraph 14 should apply.

162. The closest is the advice in the PPG section dealing with plan-making rather than decision-taking, which says, "Local planning authorities should aim to deal with any undersupply within the first 5 years of the plan period where possible. Where this cannot be met in the first 5 years, local planning authorities will need to work with neighbouring authorities under the duty to cooperate." This guidance is consistent with the plan-led system, and does not dictate whether to add to a current years' annual requirement when taking a particular decision to make up for previous shortfalls, nor dictate a method for doing so.

163. If an allowance to make up for past shortfalls is to be added, the Liverpool method is appropriate here because the emerging local plan contains a strategy shared with partner Essex authorities to accommodate growth in new garden communities and large allocated sites, which can better respond to the requirements for new infrastructure, and will come forward later in the plan period. The evidence of the Council's professional planner Ms Hutchinson was that in her judgment the Liverpool approach was amply justified, but that the Council felt constrained not to advocate such an approach until the examination of its emerging local plan as it had lost other appeals.

164. However, HPPC considers this to be over-timid and inappropriate. The spatial strategy of the emerging BNLP would be undermined if development in less sustainable locations was permitted with the intention to meet a short-term need, to the detriment of what the Council properly consider to be the best long-term plan for the District. At this Inquiry there was no evidence led to contest the soundness of the Council's overall approach in its emerging BNLP. Indeed, Mr Lee sought to argue consistency with it, albeit on the selective basis that some growth was proposed for Hatfield Peverel whilst downplaying the fact that the Stone Path Drive site was located in the countryside for the purpose of the emerging plan (paragraph 13.3.6,1/POE). Although no party would contend that the emerging plan should be treated as if it were already the adopted development plan, the Secretary of State is fully entitled to give weight to it and to apply the Liverpool approach to these applications and appeal.

Step 4: add buffer

165. The Framework paragraph 47 provides guidance that an adjustment should be made to the OAHN by the addition of either a 5% or a 20% buffer. This requires a different form of judgment to be made about whether the record of the local planning authority is one of 'persistent under-delivery'.

166. A buffer of 5% is the default for ensuring choice and competition in the market for land. A buffer of 20% should be added 'to provide a realistic prospect of achieving the planned supply' where there is a record of 'persistent under-delivery' (Framework paragraph 47). The point is to make an allowance for proven persistent failures of delivery, to correct for over-optimism about meeting planned-for targets or requirements and to build in a margin for failure to deliver the targets currently planned for.

167. There is no further or different purpose (other than also ensuring choice and competition in the market) for the 20% buffer suggested by the Framework. It is not specified to apply by reference to a particular level of accumulated current shortfall, and is not designed to hasten the delivery of units in response to a particular urgency of need. The purpose of the buffer is not to correct for a particular shortfall, but to address the problem of over-optimism. Any accumulated shortfall in delivery against what is now understood to be the OAHN is reflected automatically in the figure for current housing need.

168. It would be quite wrong to test 'under-delivery' anachronistically against requirements that were not known at the time. HPPC respectfully adopt the archery analogy given by Mr Cannon (paragraphs 22-23, ID47). There is no record of persistent under-delivery here.

169. Even if there were a record of persistent under-delivery, the Framework is only guidance and the purpose of applying the higher 20% buffer is to ensure 'a realistic prospect of achieving the planned supply'. The Secretary of State is entitled to assume that sites in the Council's housing trajectory are 'realistic' (HPPC has not given evidence of its own on suitability and deliverability other than on specific comprehensive development area sites at Hatfield Peverel) and can be counted on as indicating the expected rate of housing delivery.

Summary

170. Adopting the correct *St Modwen* approach to the meaning of 'deliverable sites', the Liverpool method for apportioning past under-delivery and a 5% buffer, there is no shortfall and the Council has a healthy 5.76 years' housing land supply on the latest figures. Even if one were able to demonstrate that some of the allocated sites were not realistic prospects, one would still have a 5 year supply on the Liverpool approach if there were land sufficient for 4,320, so there is a built-in healthy margin for error.

171. Whilst HPPC do not consider adopting the Sedgefield method to be appropriate, if we include the emerging allocations and a 5% buffer, there would be 4.52 years' supply, even on that basis, which is a very modest shortfall in the context of a rapidly improving supply position.

Policy issues in respect of all schemes

Framework paragraph 14 and its application-updatedness

172. The question of 'updatedness' does not depend on chronological age in itself (Framework paragraph 211) but on changes in circumstances and/or planning policy.

173. By virtue of Framework paragraph 49, shortfall in 5YHLS would usually be treated as a factor indicating policies for the supply of housing were 'out of date', hence the materiality of the 5YHLS question.

174. The term 'policies for the supply of housing' has a narrow meaning, but as the Framework is only guidance it is not appropriate to embark on a legalistic exercise of classifying policies (paragraph 59, CD31.2 set C). Whether policies for the supply of housing (or indeed other policies) are out of date does not determine the weight to be given to them, which remains a matter for the decision-maker (paragraphs 29, 55 to 56 CD32.2 set C).

Framework paragraph 14 and its application-silence

175. Mr Lee –but not Mr Dixon- sought to argue that the development plan was 'silent' in relation to these appeals, because "the Development Plan is now silent in respect of where development should be located outside of the strategic areas identified on the Core Strategy Proposals Map" (paragraphs 6.4.3 to 6.4.4 1/POE).

176. Mr Lee's argument cannot be sustained here. In *Trustees of the Barker Mill Estates v Test Valley BC* [2016] EWHC 3028 (Admin) [2017] PTSR 408 at [100]-[101], Holgate J rejected as a 'fallacy' the analogous argument that 'first, the inspector had to consider whether the plan was "silent on a particular issue" and second, that issue was where land to provide for a shortfall of 6,823 square metres of B8 floorspace should be located'. The learned judge ruled:

> *Neither paragraph 14 of the NPPF nor SD1 of the RTVLP [the local plan at issue] enable a party simply to select one of the "issues" relevant to the outcome of a planning application or appeal, so that it may be claimed that the plan is "silent" on that particular issue. Instead, the proper question for the decision-maker is whether there is a sufficient policy content in the plan taken*

as a whole to enable the planning application to be determined as a matter of principle…
… In the Bloor Homes case Lindblom J explicitly stated, at para 59, that the fact that allocations have yet to be put in place in a development plan (in that case for housing), does not mean that the development plan is "silent".'

177. The policies in the adopted Braintree Core Strategy, taken as a whole, indicate that permission should be refused because the strategy places both the Gleneagles and Stone Path Drive sites outside the village boundary in the countryside and directs growth to brownfield sites and infills within the village. Furthermore, there are emerging plan policies at an advanced stage which maintain both the Stone Path Drive and the Gleneagles sites outside the village boundary, and specifically protect the sites (particularly emerging NDP policies HPE6 on landscape setting and HE1 on coalescence).

178. Mr Lee referred to *South Oxfordshire District Council v Cemex Proprties UK Limited* [2016] EWHC 1173, but that case needs to be considered on its peculiar facts. There, a core strategy stated that at least 1154 dwellings would be allocated in certain larger villages including Chinnor, but no allocations had been made. The inspector had regard to the fact that the emerging local plan was at a very early options stage, and there was not even a draft emerging neighbourhood plan to give direction. It was in those circumstances that the Inspector concluded there was a 'policy vacuum on the issue of site allocations in the larger villages' (judgment at paragraphs 43 and 48, citing decision letters). The judge ruled that:

'*91 …the question for the decision maker is…(1) does this development plan contain a body of policy relevant to the proposal being considered; and (2) is that body of policy sufficient to enable the development to be judged acceptable or unacceptable in principle? The first question involves an identification of the policies in question, and their correct interpretation; the second involves the exercise of planning judgment on the practical effect of that body of policy on the making of the decision in issue.*

92….It follows also from the fact that the decision maker must make a planning judgment that… what matters is not simply whether the plan contains a policy which can be looked at to determine the question posed in Bloor at [50] and repeated in the last sentence of my [91] above: for its sufficiency at the time the decision is being made is an essential issue, and that involves the making of a qualitative planning judgment. I emphasise that the judgment to be made is at the time of the decision. A Development Plan may not have been "silent" when adopted, but has become so.

93… In the case of this Development Plan, the mechanism by which its housing requirement figures were intended to be translated into actual allocations was the DPD, which SODC had since abandoned. The question "how much housing does the Development Plan intend should be allocated in the period x to y" is not the same question as "where does the Plan say that that housing could or should be built?" In some cases, it can be the second question that matters. Whether it does so depends on the circumstances and is a matter for the planning judgment of the decision maker.'

The judge concluded:

> *97 'This was a case where it was her planning judgment that it was the answer to the second question above which mattered… Thus, she found that there was effective silence on the critical issue. That was a planning judgment which she was entitled to form.*
> *98 Her conclusion…is a planning judgment that was open to her'*

179. Although in the case before this Inquiry, the initially envisaged site allocations document to follow the CS did not proceed to adoption, there are important distinctions from the situation in the Oxfordshire case. CS policy CS1 states that the dwellings 'will be located…On previously developed land and infill sites in the Key Service Villages and other villages'. Furthermore, unlike the South Oxfordshire case where the development boundaries and countryside protection policies were merely contained in a previous saved plan pre-dating the core strategy, CS5 states as set out above (paragraph 30).

180. This gives a further clear steer that large housing developments in the countryside are not in accordance with the CS. Thus, Braintree's adopted plan is not, in its policies, silent about where it expects the growth to take place. The policies do not require the Site Allocations DPD before being able to say whether in principle development in green open countryside adjacent to Hatfield Peverel is encouraged: the answer is a clear 'no'. By way of further distinction, there are submitted examination drafts of the emerging BNLP, and emerging NDP. Furthermore, the question of how much development is intended in Hatfield Peverel matters as well as where that development is located.

181. In this regard, the situation here is more akin to that in *Bloor Homes East Midlands Ltd v SSCLG* [2014] EWHC 754, where the site lay within a 'green wedge' designated by a policy in the core strategy and the High Court upheld the decision that the plan was not 'silent' even though the core strategy had contemplated that a future site allocations DPD would review that boundary (see judgment at paragraphs 29, 30, 36 and 51-58).

182. The unsustainability of any argument that the development plan is silent is perhaps demonstrated by the subsequent length of Mr Lee's proof where he sets out and considers the relevant policies, and by his eventual acknowledgement (paragraph 13.2.2, 1/POE) that "Having tested the proposals against the material policies contained within the Braintree development plan I accept that the appeal proposals conflict with the Plan'. Notwithstanding his subsequent oral equivocation over this point during his cross-examination, that acknowledgement in the Proof was rightly made.

Framework paragraph 14 and its application-Specific policies in this framework

183. 'Specific policies in this framework' means policies that, applied here, indicate in the judgment of the decision-taker that permission should be refused. Such policies may include relevant development plan policies within the framework of the Framework.

184. The second bullet-point in the decision-taking limb of Framework paragraph 14 is no more than guidance and only applies where a development plan is absent, silent or out-of-date. It does not displace the statutory presumption in favour of determining applications in accordance with the development plan so that

proposals conflicting with the plan should be refused unless material considerations indicate otherwise (Framework paragraph 12). It has to be read consistently with that presumption. Where, although the plan may be generally or in some particular respects (e.g. in its policies in relation to the supply of housing) out-of-date so as to engage Framework paragraph 14, that does not determine the weight to be given to particular development plan policies. Over-legalistic interpretation of the Framework, drawing fine, unintended distinctions, is to be deprecated. These principles are clear from *Suffolk Coastal* (paragraphs 14, 21, 23, 54-56, 74 and 85 CD32.2 set C).

185. At Framework paragraph 154 it is emphasised that 'Plans should set out the opportunities for development and clear policies on what will or will not be permitted and where'. A decision-maker is fully entitled to conclude that specific policies within the Framework -such as for protection of countryside and favouring greenfield over brownfield development- indicate that permission is to be refused without having always to conclude that benefits are 'significantly and demonstrably' outweighed by harms.

The adopted development plan

The spatial strategy

186. The CS is based on a 'hierarchy of place' (paragraphs 2.4-2.14, HPPC2) focusing growth at settlements higher up the hierarchy. In that context, at policy CS1 it identifies a minimum requirement of 600 homes for the period 2009 to 2026 at the six KSVs. The number of dwellings to be provided in these Inquiry schemes (up to 260 across the two Inquiry sites), in combination with the development permitted since 2009 in Hatfield Peverel, would greatly exceed a proportionate distribution across the villages. The proportions are relevant as well as the numbers: six KSVs are to take 12% of the homes between them (paragraphs 2.15-2.18, HPPC2).

187. Policy CS 1 further states:

These dwellings will be located (as set out in table CS1):
On previously developed land and infill sites in the Key Service Villages and other villages.

188. This means that the growth is being directed within the village, and to previously developed land, rather than to greenfield sites outside the village such as those at issue at this Inquiry.

189. The supporting text to the CS (para 9.11) noted that sites would be allocated in a subsequent DPD, and stated, 'There will also be sites, which are not yet identified in the Housing Supply Trajectory or Table 6, which could come forward through minor extensions to town or village development boundaries in the Site Allocations DPD', but this text was not part of the policy and does not cut down or qualify the policy to direct growth outside the settlement boundaries (paragraph 16, *R(Cherkley Campaign Ltd) v Mole Valley DC* [2014] EWCA Civ 567).

190. In that context, policy CS5 is an intrinsic part of the spatial strategy (paragraphs 2.19 to 2.25, HPPC2). It should be given full or substantial weight for the reasons explained by Ms Jarvis in her Proof and later in these

submissions. Saved Policies RLP2 and RLP3 are not merely hangovers but are reflected in the CS.

191. Accordingly, there is a conflict between the spatial strategy of the adopted local plan and the principle of the Inquiry schemes. The strategy has been based on sound planning principles and is consistent with the objectives in the Framework paragraphs 17, 34, 37, 38, 70, 110-111, 112 of being genuinely plan-led, minimising the need to travel, focusing development in locations that are or can be made sustainable, preferring land of lesser environmental value and previously developed land over green field land, taking account of the different roles and character of different areas, protecting the intrinsic character and beauty of the countryside, minimising adverse effects on the local and natural environment, undertaking significant development on agricultural land only when necessary, and planning for the location of housing, economic uses and community facilities and services in an integrated way.

192. Hatfield Peverel is a fairly small village with 1815 households in 2011. It has a limited range of services and little employment potential, having lost employment with loss of the Arla Dairy. For weekly or big-ticket item shopping, employment and indoor leisure facilities, it is already necessary to travel outside the village. The village can only sustainably accommodate housing growth in proportion to its role in the settlement hierarchy.

Boundaries and review

193. Mr Tucker suggested in cross-examination that the Hatfield Peverel settlement boundaries in the current and emerging local plans were merely holdovers from previous plans and that their maintenance had not been reviewed. This is not a submission supported by the evidence.

194. Both the adopted CS and the emerging BNLP have been subject to sustainability appraisal and the latter exercise specifically considered the question of retention of boundaries, assessing this as environmentally positive to landscapes and townscapes, service centre vitality, sustainable travel, climate change and accessibility compared to relying on the Framework alone; and the question of new allocations was considered (PoE/Jarvis pages 17-20 and paragraph 2.40 and Appendix PJ2, HPPC2). Spatial Strategy Formulation (ID33) refers to review criteria, options, KSVs, countryside and draft allocations. The adopted CS was found sound by the Secretary of State.

195. It is right that the policy was not to alter the boundaries to take the Inquiry sites within the village envelope of Hatfield Peverel. Strategic policy choices were taken to retain the settlement boundaries, subject to specific allocations and to creating new urban areas or extensions, and to focus growth elsewhere. These were legitimate policy choices.

196. Whilst HPPC accepts that the Secretary of State is entitled to consider provision of housing to be a material consideration weighing against applying the development plan at the Inquiry sites, there are no grounds to give less weight to the adopted or emerging development plan just because successive plans have retained the Hatfield Peverel boundary south of the A12.

Policies for the protection of the countryside

197. The suggestion by GDL that the adopted countryside policies and policy CS5 in particular are inconsistent with the Framework is wrong. Two further assertions are also misconceived. First, that the Framework draws a distinction between valued landscapes and the countryside such that 'ordinary' countryside is not subject to general protection. Second, that because the countryside and emerging NDP green wedge policies do not have built-in exceptions for beneficial housing development made them inconsistent with the Framework.

198. The Framework comprises general policy guidance. It is not a statute and must not be read like a statute. In contrast to statutes, which must be obeyed unless there is an express exception, it is an intrinsic feature of policies and guidance that they may be departed from for good reasons, where material considerations indicate otherwise. In *Cawrey Ltd v SSCLG* [2016] EWHC 1198 (Admin) at paragraphs 43 and 45, Gilbart J cited Lindblom LJ's judgment in *Suffolk Coastal*:

> *The NPPF is a policy document. It ought not to be treated as if it had the force of statute… It is for the decision-maker to decide what weight should be given to NPPF policies in so far as they are relevant to the proposal. Because this is government policy, it is likely always to merit significant weight. But the court will not intervene unless the weight given to it by the decision-maker can be said to be unreasonable in the Wednesbury sense."*
>
> *… Before Suffolk Coastal it had been striking that NPPF, a policy document, could sometimes have been approached as if it were a statute, and as importantly, as if it did away with the importance of a decision maker taking a properly nuanced decision in the round, having regard to the development plan (and its statutory significance) and to all material considerations. In particular, I would emphasise this passage in Lindblom LJ's judgment at [42]-[43], which restates the role of a policy document, and just as importantly how it is to be interpreted and applied. NPPF is not to be used to obstruct sensible decision making. It is there as policy guidance to be had regard to in that process, not to supplant it.'*

199. In *Bloor Homes East Midlands Ltd v SSCLG* [2014] EWHC 754 at paragraphs 175 and 186, Lindblom J (as he then was) considered the argument that a 'green wedge' policy was inconsistent with the Framework if it restricted all house-building without an exception for a positive cost-benefit analysis, rejecting 'the proposition that every development plan policy restricting development of one kind or another in a particular location will be incompatible with policy for sustainable development in the Framework, and thus out-of-date, if it does not in its own terms qualify that restriction by saying it can be overcome by the benefits of a particular proposal'.

200. Mr Lee cited the case of *Telford and Wrekin BC v SSCLG* [2016] EWHC 3073 (Admin) (CD31.3 set C), where Lang J declined to quash a decision by a planning inspector that a policy which sought to 'strictly control' development in the countryside 'is not up-to-date and in conformity with the more recent planning policy context established by the Framework, where there is no blanket protection of the open countryside and where there is a requirement to boost

significantly the supply of housing,' such that he would give it 'less than full weight'. The *Cawrey* judgment was not cited. Lang J stated at paragraph 47,

> *In my judgment, the Inspector did not err in law in concluding that Policy CS7 was not in conformity with the NPPF and so was out-of-date. It is a core planning principle, set out in NPPF 17, that decision-taking should recognise "the intrinsic character and beauty of the countryside and supporting thriving rural communities within it". This principle is reflected throughout the NPPF e.g. policy on the location of rural housing (NPPF 55); designation of Local Green Space (NPPF 76); protection of the Green Belt (NPPF 79 - 92) and Section 11, headed "Conserving and enhancing the natural environment" (NPPF 109- 125). However, NPPF does not include a blanket protection of the countryside for its own sake, such as existed in earlier national guidance (e.g. Planning Policy Guidance 7), and regard must also be had to the other core planning principles favouring sustainable development, as set out in NPPF 17. The Inspector had to exercise his planning judgment to determine whether or not this particular policy was in conformity with the NPPF, and the Council has failed to establish that there was any public law error in his approach, or that his conclusion was irrational.* (emphasis added).

201. At its highest, the *Telford* case was therefore decided on the basis that the weight to give to various principles within the Framework pulling in different directions (supply of housing and other principles versus protecting intrinsic character and beauty) was a matter of planning judgment that Lang J would not interfere with. It is not automatically inconsistent with the Framework, as a matter of law, to have a general policy to protect the countryside by restricting the development that is presumed to be appropriate there. This judgment does not require the Secretary of State to follow the Telford inspector's approach to weight as a matter of planning judgment, which remains a matter for the decision-maker even if a policy is judged to be out of date (per *Suffolk Coastal* cited above).

202. Whether a policy is judged to be inconsistent with the Framework is a matter of planning judgment depending upon the weight to attach to different passages of the document, so long as the wording of the Framework is understood correctly. Clearly, the actual character and attractiveness of particular countryside will be relevant to the weight to place on a policy protecting the countryside, and the merits of making an exception in the particular case. Policies cannot just be applied mechanistically for the sake of it in a 'blanket' way, without regard to features of particular sites. But that is a straw man argument, because HPPC are not contending for such an approach here.

203. HPPC commend the approach taken by the Secretary of State in his decision regarding Land East of Ditchling Road, Wivelsfield, East Sussex (ID25). The relevant part of the decision concerned the question whether a materially indistinguishable general policy to protect the countryside ('CT1') outside development boundaries was inconsistent with the NPPF. In the decision letter, (para 15), the Secretary of State concluded, 'for the reasons set out at IR327-328, the Secretary of State agrees that LP policy CT1 is not out of date (either by operation of paragraph 215 or paragraph 49 of the Framework) and that the conflict with it should be given significant weight in the decision'. The Inspector had concluded as follows:

[IR 327] With respect to the adopted plan, there is conflict only with one policy, CT1, of the Local Plan, but this leads to an overall conclusion that the proposal is not in accordance with the development plan as a whole.

[IR 328] The defined Planning Boundaries as the means through which policy CT1 operates are related to development requirements that no longer apply, with an end date for these of 2011. While policy CT1 gives blanket protection to countryside, the NPPF directs specific protection to valued landscapes. Nevertheless, a core planning principle of the NPPF includes recognising the intrinsic character and beauty of the countryside. Policy CT1 is expressed as the 'key countryside policy' in the Local Plan. The proposal would involve the incursion of development on a greenfield area of countryside. Taking into account also the finding above that a five-year housing land supply is demonstrated, I consider that policy CT1 is not out-of-date for the purposes of paragraph 14 of the NPPF, and that the conflict with it should be given significant weight in the decision'.

204. It should be noted that unlike Wivelsfield, where the countryside boundaries were merely in a saved out of date policy in a time-expired plan, in this case they are a tool utilised by policy CS5 in the adopted CS which has an end date of 2026.

205. HPPC readily acknowledges that Wivelsfield was a case where there was a 5YHLS and that the weight to give to such a policy may depend on whether there is a 5YHLS, but that is a different point to the question whether it is inherently inconsistent with the Framework, and therefore always to be given low weight by virtue of Framework paragraph 215 regardless of the housing land supply. The clear decision in Wivelsfield (DL para 15) was that there is no such inconsistency. That is a planning judgment which is right and should be followed here.

206. HPPC also draws the Secretary of State's attention to the Finchingfield decision where the Inspector considered CS policy CS5 and likewise determined that it was consistent with the Framework for the purpose of Framework paragraph 215:

I accept that the policy does not reflect the exact wording of the Framework; its adoption pre-dated the publication of the Framework. For that reason the policy needs to be considered against paragraph 215 of the Framework. It is a policy firmly aimed at protecting the environment, landscape character and biodiversity of the countryside. This accords with recognising the intrinsic character and beauty of the countryside and supporting thriving communities within it given in paragraph 55 of the Framework. I therefore consider that it should be given the greater weight identified in paragraph 215.'(paragraph39, CD32.10 set C).

Paragraph 109 and value to attach to a given area of countryside

207. Mr Lee in particular was anxious to argue that Framework paragraph 109 did not apply and that this would mean less weight should be given to the policies protecting the countryside (paragraphs 7.1.14 and 8.2.43-48, 1/POE).

208. Paragraph 109 is merely providing sensible general guidance that 'The planning system should contribute to and enhance the natural and local environment by among other things, protecting and enhancing valued landscapes, geological conservation interests and soils'.

209. The countryside is itself a type of landscape. The value to place on protection of any particular part of the countryside is ultimately entirely a matter for the Secretary of State's planning judgment, depending upon the advice in this report concerning the appreciation of the site and its features or attributes. If the Secretary of State considers the current landscape valuable at a particular spot, it is likely to be desirable, other things being equal, to preserve and enhance it. That is all paragraph 109 is getting at.

210. It would be quite inappropriate to treat paragraph 109 like a statute establishing a special category apart of 'valued' landscapes that has to be closely defined and given special status, and implying that the remainder of the countryside is not worth protecting or enhancing generally. That would be quite against the spirit of the Framework and would be just the kind of legalistic exercise that was deprecated in the *Suffolk Coastal* case by the Court of Appeal and Supreme Court.

211. The only cases to consider Framework paragraph 109 in light of argument about its meaning have stressed that a decision-maker must have regard to demonstrable physical attributes and not merely popularity. For instance, in *Stroud DC v SSCLG* [2015] EWHC 488 (CD31.20 set C), where Ouseley J stated:

> *[13] It is important to understand what the issue at the Inquiry actually was. It was not primarily about the definition of valued landscape but about the evidential basis upon which this land could be concluded to have demonstrable physical attributes. Nonetheless, it is contended that the Inspector erred in paragraph 18 because he appears to have equiparated valued landscape with designated landscape. There is no question but that this land has no landscape designation….The Inspector, if he had concluded, however, that designation was the same as valued landscape, would have fallen into error. The NPPF is clear: that designation is used when designation is meant and valued is used when valued is meant and the two words are not the same.*
>
> *[14] The next question is whether the Inspector did in fact make the error attributed to him. There is some scope for debate, particularly in the light of the last two sentences of paragraph 18. But in the end I am satisfied that the Inspector did not make that error. In particular, the key passage is in the third sentence of paragraph 18, in which he said that the site to be valued had to show some demonstrable physical attribute rather than just popularity. If he had regarded designation as the start and finish of the debate that sentence simply would not have appeared….*
>
> *[16] …The closing submissions of Miss Wigley referred to a number of features and it is helpful just to pick those up here. The views of the site from the AONB were carefully considered by the Inspector. There can be no doubt but that those aspects were dealt with and he did not regard those as making the land a valued piece of landscape. That is a conclusion to which he was entitled to come.'*

212. What *Stroud* did not do was hold that Framework paragraph 109 creates a rigid category or implies that protection of countryside not within that category was not desirable for the purposes of the Framework.

213. In *Cawrey Ltd v SSCLG* [2016] EWHC 1198, Gilbart J ruled:

[49] NPPF undoubtedly recognises the intrinsic character of the countryside as a core principle. The fact that paragraph [109] may recognise that some has a value worthy of designation for the quality of its landscape does not thereby imply that the loss of undesignated countryside is not of itself capable of being harmful in the planning balance, and there is nothing in Stroud DC v SSCLG [2015] EWHC 488 per Ouseley J or in Cheshire East BC v SSCLG [2016] EWHC 694 per Patterson J which suggests otherwise. Insofar as Kenneth Parker J in Colman v SSCLG may be interpreted as suggesting that such protection was no longer given by NPPF, I respectfully disagree with him. For it would be very odd indeed if the core principle at paragraph [17] of NPPF of "recognising the intrinsic beauty and character of the countryside" was to be taken as only applying to those areas with a designation. Undesignated areas - "ordinary countryside" as per Ouseley J in Stroud DC - may not justify the same level of protection, but NPPF, properly read, cannot be interpreted as removing it altogether. Of course if paragraph [49] applies (which it did not here) then the situation may be very different in NPPF terms.
*[50] Whether that loss of countryside is important in any particular case is a matter of planning judgment for the decision maker. In any event, extant policies in a Development Plan which are protective of countryside must be had regard to, and in a case such as this a conflict with them could properly determine the s 38(6) PCPA 2004 issue. If the conclusion has been reached that the proposal does conflict with the development plan as a whole, then a conclusion that a development should then be permitted will require a judgment that material considerations justify the grant of permission…There is in my judgment nothing at all in NPPF which requires an Inspector to give no or little weight to extant policies in the Development Plan. Were it to do so, it would be incompatible with the statutory basis of development control in s 38(6) PCPA 2004 and s 70 TCPA 1990.' (*emphasis added*).*

214. Accordingly, the fact that no witness or party at this inquiry argued for any special 'valued' status by reference to paragraph 109 does not mean that the Secretary of State cannot or should not give weight to the protection of the countryside at these sites and to the adopted and development plan policies that seek to achieve this, nor that as a matter of law he cannot treat the physical attributes of the sites as favouring their protection. It is simply a subjective question of judgment for the Secretary of State in the particular case what value to place on the sites.

215. This also accords with the GLVIA3 (para 5.26) which advise that the fact that a landscape is not designated 'does not mean that it does not have any value. This is particularly true in the UK where in recent years relevant national planning policy and advice has generally discouraged local designations unless it can be shown that other approaches would be inadequate. The European Landscape Convention promotes the need to take account of all landscapes with less emphasis on the special and more recognition that ordinary landscapes also have their value'.

The emerging BNLP

216. The emerging BNLP can be given significant weight as it has progressed to examination stage. It properly seeks to meet the identified OAHN with an

additional 10% margin in a strategic way in collaboration with other Essex authorities.

Spatial strategy

217. This is again based upon a hierarchy of place. Part 1 policies SP2 and SP3 which set out the spatial strategy and the number of homes to be planned for across north Essex and in the Council area are summarised above (paragraph 34).

218. The way in which the quantum of new homes to be provided in Braintree District is to be apportioned is explained by Ms Jarvis (paragraphs 2.29-2.53, HPPC2). The order of focus of new development is the town of Braintree, new planned garden communities, then Witham, then the KSVs in the A12 corridor, then other settlements. The principle of garden communities is fully consistent with national policy (e.g. Framework paragraph 52).

219. An allocation of land for 285 homes (2% of the total) is made at the Comprehensive Redevelopment Area (CRA) in Hatfield Peverel by draft Policy LPP31.

220. The District's population is about 150,000 (paragraph 3.3, CD16.3 set C). The populations of Witham and Hatfield Peverel were 25,353 and 4,500 in 2011 (paragraph 2.44, HPPC2). Hatfield Peverel therefore has around 3% of the District's population. Given that about 3,650 (25%) of the new homes in the District are to be located in the 2 new garden communities, it is evident that the emerging BNLP envisages Hatfield Peverel accommodating the planned housing growth in scale with its share of the population. Development significantly in excess of the 285 homes allocated in the draft plan would not be in keeping with the spatial strategy for distribution of housing.

221. Furthermore, Policy LPP17 makes clear that 'Sites suitable for more than 10 homes are allocated on the Proposals Map and are set out in Appendix 3', and no other site outside the CRA is allocated in or adjacent to Hatfield Peverel. Paragraph 6.63 of the supporting text makes explicit what is already implicit, that 'All sites suitable for delivering ten or more homes are allocated for development on the Proposals Map' (emphasis added). This indicates that the spatial strategy does not envisage either the Stone Path Drive site or the Gleneagles site being suitable for large-scale housing development. The unsubstantiated assertions made in cross-examination by Mr Tucker that the boundaries have not been reviewed and considered is flatly contradicted by paragraph 5.17 of the supporting text in Section 2 to the emerging plan, which states:

> *Development boundaries within this document have been set in accordance with the Development Boundary Review Methodology which can be found in the evidence base.*

222. This is evidently linked to the assessment of constraints. Paragraph 5.7 of Section 2 of the emerging BNLP supporting text explains that 'Development may be considered sustainable within a KSV, subject to the specific constraints and opportunities of that village' (emphasis added).

223. One such constraint is the surrounding countryside and local character. It is not envisaged that there should be built development outside of the settlement boundaries, nor ribbon development along the A12. That is seen at Policy LPP1,

the full text of which is given at paragraph 35 above. For reasons explained above, it is perfectly consistent with the Framework to have such a general policy that built development is considered not to be appropriate in the countryside, so long as it is always applied in individual cases with the particular characteristics of a particular site in mind.

224. Another constraint is local infrastructure, services and facilities including roads, healthcare and schools. Draft Policy SP 5 states that development 'must be supported by provision of infrastructure, services and facilities that are identified to meet the needs arising from new development', including sufficient school places in the form of expanded or new schools.

225. For reasons already alluded to above in relation to the 'Liverpool method' and the adopted plan, the spatial strategy in the emerging local plan seeks to advance planning objectives underlying the Framework. It should be given significant weight and provides comfort that the District's OAHN will be met sustainably without the Inquiry schemes coming forward and encroaching on the countryside setting of Hatfield Peverel.

The emerging NDP

226. Mr Renow's evidence has set out in detail why the NDP is supported by written national policy and the political commitments made by the present Secretary of State.

Emerging stage and status of the NDP

227. The NDP can be given significant weight insofar as it indicates the concerns and aspirations of the local community and their vision for the village of Hatfield Peverel.

228. The NDP can be given at least as much weight, if not more weight, as it was given by Inspector Parker in connection with the 80 dwelling appeal, as it has now progressed to examination.

229. Whilst it is accepted that there are likely to be modifications to the drafting of the NDP before it is put to referendum, in particular to ensure that it allocates no less development than the emerging BNLP, the Secretary of State can be confident that a plan containing the relevant restrictive policies directly in issue at this Inquiry (Policies HPE6 and HPE1) in materially the same form will be passed.

230. The Regulation 14 consultation indicated extremely high (89%) support for the vision and objectives of the draft NDP, support between 77% and 92% for each of the individual draft policies (HPPC1, Appendix MR 18). The survey in September 2017, with 570 respondents, indicated 96% approval of the draft plan at that stage (HPPC1, Appendix MR26). Subject to the question of legal compliance with the 'basic conditions', the Secretary of State can be confident that the NDP would pass a referendum and proceed to adoption.

Basic conditions

231. Paragraph 8 of Schedule 4B to the Town and Country Planning Act 1990, as modified by section 38C(5) of the Planning and Compulsory Purchase Act 2004, requires the examiner to consider the following:

i) whether the draft plan 'meets the basic conditions' (defined at sub-paragraph (2));

ii) whether it complies with the provision made by or under sections 38A and 38B of the 2004 Act; and

iii) whether the area for any referendum should extend beyond the neighbourhood area to which the draft plan relates; and

iv) whether the draft plan is compatible with 'the Convention rights', as defined by the Human Rights Act 1998.

232. There can be no suggestion that the NDP is incompatible with anyone's human rights, and there has been no suggestion that the referendum area should be wider than the parish.

233. The Examiner is not considering whether the neighbourhood plan is 'sound' (the test in section 20(5) of the 2004 Act for local plans), and the tests of paragraph 182 of the NPPF do not apply. In other words, unless the strategic environmental assessment procedure applies, the Examiner does not have to consider whether a draft policy is the 'most appropriate strategy' compared against alternatives, nor is it for her to judge whether it is supported by a 'proportionate evidence base' (paragraph 13, *R(Maynard) v Chiltern District Council* [2015] EWHC 3817 (Admin). The 'basic conditions' only require consideration whether it is 'appropriate' to make the plan having regard to national policy and guidance, whether it is in general conformity with the adopted plan; whether the making of the plan contributes to sustainable development, whether the making of the plan is compatible with EU obligations, and prescribed conditions are met. Regulation 32 of and paragraph 1 of Schedule 2 to the Neighbourhood Planning (General) Regulations 2012 prescribe the condition that: '[the] making of the neighbourhood development plan is not likely to have a significant effect on a European site (as defined in the Conservation of Habitats and Species Regulations 2012) or a European offshore marine site (as defined in the Offshore Marine Conservation (Natural Habitats, &c.) Regulations 2007) (either alone or in combination with other plans or projects).'

HRA

234. As it is one of the prescribed 'basic conditions' that the plan should not be likely to have a significant effect on a protected European site and as the likelihood of such an effect is also an important, if not determinative, consideration to decide whether SEA is required, it made sense for HPPC to commission a re-screening examining possible effects on European protected sites before it reconsidered the broader question whether SEA was required.

235. As Mr Renow explained in his evidence (pages 12-13, HPPC1), Section 2 of the emerging BNLP which includes an allocation of 285 dwellings at the CRA as well as much larger quantities of other development, has been assessed for compliance with the Habitats Directive and found compliant. No issue is predicted to arise except in combination with other forthcoming district plans envisaged by Section 1.

236. The draft NDP would progress in advance of those other plans and would be for a much smaller quantum of development than the BNLP which proposed at least 14,320 dwellings as well as employment development and other development.

237. In *R (Forest of Dean Friends of the Earth) v Forest of Dean DC* [2015] EWCA Civ 683 at [13] Sales LJ ruled:

> *where a series of development projects is in contemplation, the strict precautionary approach required by the Habitats Directive will be complied with in relation to consideration of the first particular proposed development project if that project will not of itself have a detrimental impact on a protected site and there will be an appropriate opportunity to consider measures in relation to a later project which will mean that any possible in-combination effect from the two projects together will not arise (failing which, permission may have to be refused for the later project, when it is applied for: see the Smyth case, paras 87—102. In other words, so long as the relevant assessment of options has been carried out at the level of the relevant development plan (land use plan), as explained in Commission v United Kingdom [2005] ECR I-9017, it will be lawful when planning permission is sought for the first specific development project in the series for the relevant planning authority to assess that that project taken by itself will not have any relevant detrimental impact on the protected site (and then grant planning permission for it), even though it is possible that there might be future in-combination effects on the protected site if planning permission were later granted for the next project in the series.'*

This was based upon opinions of the Advocate General Kokott in the *Commission v United Kingdom* and *Waddenzee cases,* and the need to 'avoid sclerosis of the system' (Sales LJ at paragraphs 15-18).

238. This principle applies by analogy to plans as well as to projects. Where a draft plan (here the NDP) is the first in a possible series of plans that would be promoted separately by other authorities (here, the Local Plans of Braintree District and the other North Essex districts), it is sufficient to assess the draft plan in combination with other existing plans and permitted projects, without attempting to speculatively assess combined future effects of other plans. The impacts of those plans can be assessed when they come forward.

239. Furthermore, a habitats regulations screening assessment in July 2017 found no requirement even for 'appropriate assessment' before grant of planning permission for up to 145 homes at the Arla site (ID14).

240. In the light of the above, the Secretary of State can be confident that the requirements of the Habitats Directive will not prevent adoption of the NDP.

SEA

241. The Examiner's concern was that the SEA screening was done when the plan was at an earlier stage of development and premised on no allocation being made in the Draft NDP, when the Arla site was subsequently allocated by draft Policy HO6. If the allocation policy were dropped and allocations left entirely to the emerging local plan, it is unlikely that SEA would be required.

242. As regards SEA, article 3(2) of Directive 2001/42/EC only requires strategic assessment of plans that 'determine the use of small areas at local level and

minor modifications' to broader town and country planning plans if the Member States 'determine that they are likely to have significant environmental effects'.

243. Whether potential environmental effects are 'significant' is a matter of judgment for the planning authority, subject to review on grounds of reasonableness.

244. It is not anticipated that the NDP is likely to give rise to significant environmental effects, and no evidence has been presented at this Inquiry by any party proving that it would.

245. It is therefore anticipated that the Examiner and the Parish and District Councils would conclude that the NDP determines the use of small areas at local level (the parish) and that it is not likely to have significant environmental effects in combination with existing plans, programmes and projects. This is particularly the case given that the Arla site has already been granted permission for a greater number of homes than contemplated in the current Draft NDP, the project is on brownfield land and that project has been found not to be likely to have significant effects on a protected European site which is one of the important factors relevant to the assessment (ID14). If that is the eventual conclusion, no SEA would be required.

246. SEA has already been conducted for the emerging BNLP. Article 4 of the Directive expressly provides that 'Where plans and programmes form part of a hierarchy, Member States shall, with a view to avoiding duplication of the assessment, take into account the fact that the assessment will be carried out, in accordance with this Directive, at different levels of the hierarchy. For the purpose of, *inter alia*, avoiding duplication of assessment, Member States shall apply Article 5(2) and (3).' Article 5(2) and (3) in turn state that where an environmental assessment report is required, the level of detail should take account of 'the contents and level of detail in the plan or programme, its stage in the decision-making process and the extent to which certain matters are more appropriately assessed at different levels in that process in order to avoid duplication of the assessment', and the report may use 'information obtained at other levels of decision-making or through other Community legislation'. This is reflected in regulation 12(3) and (4) of the Environmental Assessment of Plans and Programmes Regulations 2004.

247. Even if it were considered that NDP does require SEA, then the sustainability appraisal could draw upon the work already carried out in that regard rather than duplicate it. Whilst some additional months would be required to assess the draft plan and the reasonable alternatives, Mr Renow's evidence was that this could be expected to have been completed by summer 2018. The requirements of the SEA Directive are not 'showstoppers'.

Evidence base for not allocating the Inquiry sites

248. It was suggested that the Parish Council should have sought to take a more proactive approach to maximise housing delivery and that the exercise was only aiming to allocate sites sufficient to provide 78 homes. However, that criticism does not impinge on the appropriateness of adopting the draft NDP. A neighbourhood plan does not have to make any site allocations. The written and oral evidence of Mr Renow was that HPPC would accept a pre-emptive 'future-proofing' modification of the text to bring the draft into line with the CRA in the

emerging Local Plan. Its policies would be superseded by specific conflicting policies in later development plan documents such as the emerging BNLP in any event.

249. An attack was made on the ranking assessment when determining which sites to allocate for development in the NDP (CD18.3 set C). It was put to Mr Renow that the exercise unfairly failed to expressly mention in the 'opportunities' column of the table the opportunities afforded by the Gleneagles site to provide housing. This was itself an unfair critique; it was a given, as the whole point of the exercise was to determine which of the sites to allocate for housing and one of the scoring criteria was the number of homes that could be accommodated.

250. In any case, sites HATF313, HATF630 and HATF608 which correspond to the CRA all scored more highly in their ranking than the Inquiry sites. The scoring system was one that was perfectly reasonable and lawful. The choice of policy objectives and the weight to attach to each was a matter for the judgment of the democratically elected Parish Council.

251. Lastly, the criticism was levelled that the site assessment was not considering these particular projects with mitigation measures. Such is almost always the case when engaging in forward planning of this nature and does not invalidate the assessment.

The evidence base for protected views

252. The NDP specifically designates views for protection and enhancement in order to protect the landscape setting of the village (Policy HPE6). It is evidence that the specified 'views and open spaces…are valued by the community and form part of the landscape character' (NDP 'objectives' p.32).

253. Extensive evidence was given by Mr Renow of the local engagement that the Parish Council undertook with the local community, including the survey, the 'walkabout' and photographic competition referred to in the supporting text to the policy, as well as public consultation. The reality is that the abovementioned engagement and evidence-gathering programme provided a sufficient evidence base.

254. DWH sought to suggest that the Parish Council had been disingenuously misrepresenting that View 5 in the table accompanying HPE6 had been identified in the Landscape Character Assessment of October 2015 (CD18.4 set C), and consequently that the policy lacked an evidence base. However, this line of attack was misconceived. The text of HPE6 makes very clear that it protected both views 'identified by the community (see pages 33-37) and the Hatfield Peverel Landscape Character Assessment' (emphasis added), and was not purporting to say that all the views were identified in the Landscape Character Assessment.

255. Although the Landscape Character Assessment (CD 18.4 set C) did identify 'key views' and photographs, these were selected to 'reflect the key characteristics of each area' (para 3.12) by an individual professional consultant as part of an exercise to characterise the area and make suggestions for its management. That exercise had not involved public consultation to ascertain the views of the community. Meanwhile, the residents' survey in October 2015 indicated that 'views towards Witham looking from Gleneagles Way' was selected

as one of the 3 views to 'be safeguarded if new development takes place in the parish' by 237 respondents (HPPC1, Appendix MR28). In those circumstances, it was perfectly proper to reflect the wishes of the community.

256. The Table at pages 34-35 of the NDP identifies the key features/physical attributes of the views, and any access by residents. It is not merely about popularity but rather the NDP explains the features of the views that are valued. Views 1 and 5 are attractive open vistas and it is readily understandable why the views are valued by the local community.

257. Criticisms were directed at the Parish Council's reviewer of the feedback from the workshop held in December 2016 (CD 18.6 set C). A comment was made by that individual that in respect of the view from Gleneagles Way (view 16 in that document) they were not personally sure if the view had value but people liked it, and so it had been retained.

258. Insofar as it was suggested for DWH that it was illegitimate for the draft NDP to reflect the views of the community, the whole point of neighbourhood plans is to 'reflect the… priorities of their communities' (Framework paragraph 1), giving 'communities direct power to develop a shared vision for their neighbourhood' (Framework paragraph 183) and to 'shape and direct sustainable development in their area' (Framework paragraph 185). Landscape value and the degree of attractiveness of any view is highly subjective and it is a matter that the Secretary of State will form his own view on, informed by this report, itself informed by the inspection of the site and surrounding area. Any argument that the personal opinions of a particular hired consultant or parish working-group volunteer are privileged over the views of the community reflected in a neighbourhood plan is to be deprecated.

259. It was also suggested that the response to the workshop is evidence that views were chosen merely to stymy development at those locations and not because of the value of the views. However, it is plain as can be that the reviewer in question in December 2016 was engaged in a whittling-down process determining which of the views identified by the community to retain as most valued and meriting protection, not introducing new views of their own. It was perfectly proper to choose to designate and protect only those valued views that might realistically be subject to development. Neighbourhood plans are supposed to be practical documents to shape and direct development. Mr Renow explained in his oral evidence and cross-examination how views identified by the public were then whittled down to retain the most locally valued views that required protection.

Coalescence and the propriety of policy HPE1

260. Mr Renow's evidence was that maintenance of the distinctive separate character of the village of Hatfield Peverel and prevention of coalescence were identified as objectives that were important to the local community (pages 24-26 HPPC1 and Appendix MR29).

261. Consistently with the purposes of neighbourhood plans, as alluded to in the Framework and the localism agenda, it was therefore entirely proper for this to be reflected in the Vision and in Objective 4 of the NDP and translated into draft policy HPE1.

262. DWH sought to contend that the green wedge policy was 'strategic' and trespassing on the remit of the emerging Local Plan. They argued that it amounted to a green belt which the PPG and the Framework stated should only be designated by a local plan at district level. They also argued that it was somehow inconsistent with the emerging BNLP because draft Policy LPP 72 ('Green Buffers') had not included a green buffer between Witham and Hatfield Peverel.

263. Those arguments are unsustainable. The Prevention of Coalescence Areas that would be designated by draft policy HPE1 in the NDP are small areas on the outskirts of a fairly small village within one parish, aimed purely at preventing intrusion into those wedges to retain separation between Hatfield Peverel and the nearby hamlet of Nounsley and expanding town of Witham. In no sense are they 'strategic' and nor can they credibly be contended to create a 'green belt'.

264. Just because the emerging Local Plan did not include a policy contained in the NDP, that does not mean there is an inconsistency; otherwise no NDP could ever contain a distinct policy. In fact, the additional green wedge is complementary rather than inconsistent.

265. Alan Massow, the Senior Policy Planner at the Council, had liaised with and advised HPPC in the NDP drafting process and had confirmed that the District did not designate a Green Buffer in the Local Plan on the understanding that one would be promoted by the NDP, a decision that it considered to be up to the Parish Council and to be consistent with the emerging BNLP (ID26). This was in full accordance with Framework paragraph 185 which states in terms: 'Local planning authorities should avoid duplicating planning processes for non-strategic policies where a neighbourhood plan is in preparation.'

Housing delivery

266. Any argument that an exception should be made to allow development conflicting with the statutory development plan on the basis that there is not currently a 5 year supply of housing land has to be premised on the scheme in question being delivered within 5 years, so as to meet that housing need.

267. It is therefore relevant not only what the level of OAHN is (and the extent of any shortfall) but also how likely it is that the housing in any particular scheme will actually be completed and occupied as a home within 5 years. The evidence in relation to delivery is addressed separately in respect of each scheme later.

Health, education and infrastructure/sustainability issues common to all 3 schemes

268. There would be conflict with Policy SP5 of the emerging BNLP ('Development must be supported by provision of infrastructure, services and facilities that are identified to serve the needs arising from new development.'). Development whose needs are not served should not be considered acceptable in planning terms, and where planning obligations are inadequate to make the development acceptable, permission should be refused (Framework paragraph 176).

269. In both his written and oral evidence Mr Renow explained the existing situation in terms of the lack of employment opportunities for new residents within Hatfield Peverel (pages 26-27, HPPC1); the pressure on health facilities and their lack of space to physically expand (pages 27-28, HPPC1); the requirements for

additional school places (pages 29-33, HPPC1); the lack of a safe walking route to Witham along the A12 (pages 33-35, HPPC1); and pressures with regard to transport infrastructure and traffic (pages 36-38, HPPC1).

270. No suggestion was made by the applicants that it was safe for children to walk to Witham along the A12, with reliance being placed instead on potential travel by bus (paragraph 7.2.35, 1/POE).

271. As regards healthcare and the physical inability to extend the Sidney House surgery, the factual evidence of Mr Renow was not challenged or rebutted. The developments would generate additional occupiers who would require health services. There was no evidence that mere internal reconfiguration of the surgery would provide the required extra accommodation for an extra doctor; furthermore there is no indication that any such improvement to the Sidney House Surgery is planned or even practicable.

272. As regards current and projected school places, and the number of students generated by the developments, the numerical situation appears to be common ground (ID1.8).

273. The occupiers of the dwellings would require school places. There are currently 484 primary pupils on the roll of schools within Hatfield Peverel, which have a capacity of 525. The number without additional housing is predicted to fall slightly to 470 by 2021/22. The extant Former Arla Diary and Bury Lane permissions would generate an additional 58 primary school pupils between them (ID1.8, Appendix). This means that any of the Inquiry schemes would result in excess demand that could not be met by existing capacity.

274. Village schools' admissions policies give preference to village children if they become over-subscribed, but this is subject to sibling preference. It would also only apply to children newly entering the school and existing pupils would not be moved. This means that for many years, primary-age occupants of the Inquiry schemes would be required to travel further afield for schooling. This is contrary to the objectives in the Framework of minimising the need to travel and providing schools within walking distance of larger scale housing development (Framework paragraphs 34 and 38).

275. The corollary of that outbound travel phenomenon diminishing in scale would be a diminishing in-school choice for parents living outside the village and the requirement for children residing outside the village who otherwise would have attended the Hatfield Peverel schools having to be found school places elsewhere. As a result, the developments would generate a demand for additional school places whether for the children of occupiers or those children who otherwise would have been accommodated at the village schools. This requirement for additional educational provision is a negative externality of the developments to be weighed in the planning balance.

276. The cost of that externality would not be internalised by means of a Section 106 planning obligation. None was requested by Essex County Council in respect of the costs occasioned by these schemes because it was concerned that the CIL Regulations prohibit pooling of 5 or more contributions in respect of a particular project or type of infrastructure (CD21 set C). In fact, CIL regulation 123(3) prevents pooled planning obligations being relied upon as ‘a reason for granting planning permission’. This is not exactly the same as a prohibition upon pooling

such contributions, or against treating absence of such contributions as a reason for refusing permission. There is no CIL charging schedule in place either. As a result, the cost of putting in place the educational provision would be borne by the taxpayer.

277. Moreover, the additional travel costs in terms of bus transport would either fall to be borne by the local authority (to the extent that it is statutorily obliged or agrees as a matter of discretion to pay them) or by parents. This would be a particular burden for parents on low incomes.

278. Framework paragraph 72 states that 'The Government attaches great importance to ensuring that a sufficient choice of school places is available to meet the needs of existing and new communities…local planning authorities should… give great weight to the need to create, expand or alter schools' (emphasis added). This principle is also reflected in Draft Policy SP5 of the emerging BNLP. The Secretary of State should attach great weight to the failure of these schemes to provide for the necessary school places and the impact on parental choice.

Summary of HPPC's case respecting the DWH scheme

Conflict with the spatial strategy

279. The development conflicts with the spatial strategy in the adopted and emerging development plans for the reasons set out above. That means there is a statutory presumption against granting permission by virtue of s.38(6) of the Planning and Compulsory Purchase Act 2004. Specifically, there is conflict with policies CS1, CS5, and RLP2 of the adopted plan; and draft policies LPP1 and LPP17 of the emerging BNLP. This conflict should be given great weight because the Framework expects the system to be genuinely plan-led.

Harm by reason of Coalescence

280. Draft anti-coalescence policy HPE1 of the NDP reflects the vision of the community for Hatfield Peverel. The conflict with this policy should be given significant weight given the current status of the NDP as a submitted examination draft for the reasons set out above.

281. Coalescence is a material consideration in this application. The development would result in expansion of the settlement of Hatfield Peverel to the east, narrowing the gap between it and the settlement of Witham (as substantially extended by the Wood End Farm, Lodge Farm and the development to the west of Maltings Lane (ID13) to approximately 1km, down from 1.4km. This would be a relatively small gap, which would be traversed in around 30 seconds travelling at 70mph on the A12.

282. DWH's witness, Mr Smith, stated that in his view the key consideration was whether there would remain a perception of leaving one place and entering another. However, that test could be met even within an urban area. Although there would remain some fields between Witham and Hatfield Peverel, the settlements would begin to feel uncomfortably close and the rural village character of Hatfield Peverel would be eroded as the net effect of the Gleneagles Way development and the new development on the edge of Witham would be that it came to feel more like a southern extension of Witham.

283. In his oral evidence, Mr Smith accepted that there would be clear inter-visibility between the permitted and as-yet-unbuilt development at Witham north of the A12 and the development at the Gleneagles site, particularly from upper floors. The only way to prevent this and screen views would be to significantly strengthen the planting along the eastern edge of the application site to a height of 9m or more, as was indeed proposed. That would fundamentally and detrimentally change the character of the locality by blocking broad open views out across what remained of the countryside. The line of vegetation would only serve as a marker for the built development behind, adding a prominent and abrupt edge to what had been filtered views in to the houses from the footpath

Landscape, character and visual harm

284. The development would fundamentally obstruct and mar the pleasant views out across open countryside enjoyed from The Street outside D's Café Diner, (ID13 photographs, Mr Renow's viewpoint 1 for this site), the 3 culs-de-sac of Wentworth Close, Birkdale Rise and Ferndown Way (ID13 viewpoints 2-7), and Gleneagles Way (ID13 viewpoint 8), which make a positive contribution to the character of the area.

285. Although the view protected by the NDP policy HPE6 is not from the same place as the view identified as characteristic by the Local Landscape Character Assessment of October 2015 (CD18.4, set C) which was not based on consultation of residents, that document did highlight the physical attributes of this landscape character area as including large and geometric fields under arable cultivation, with 'broad open views possible across open farmland' which it recommended should 'be safeguarded'. For the reasons explained above, the conflict with draft policy HPE6 by reason of loss of the 'key feature' of 'open arable farmland' should be given significant weight.

286. The Essex Landscape Character Assessment (ELCAA) (pages 94-95, CD14.5, set B) noted that potential residential expansion of settlements…'would be conspicuous on the surrounding rural landscape' and recommended that any development be 'small-scale'. As explained above, the emerging BNLP allocated all the sites considered suitable for development of more than 10 dwellings, which indicates that development on this scale was rightly judged inappropriate at this location.

287. Currently, the estate off Gleneagles Way has a spacious, open and rural character by reason of the view out across open countryside. Its village character would become more suburban.

288. The character of the application site itself would fundamentally and detrimentally change as the open countryside was lost and replaced by a housing estate.

289. These views out from the village are experienced by pedestrians, very low-speed traffic, and residents of the houses who are moderate and highly sensitive receptors for the purpose of the GLVIA3.

290. These views are more highly valued by the community than the views in from the surrounding footpath as they are more frequently experienced.

291. There would additionally be harm to views from Footpath 40. The views towards the village are already filtered to a degree from this footpath and the

most attractive views from it are to the south and east. Nevertheless, there will undoubtedly be harm to views from Footpath 40 looking towards the village to the west- the worst of which have not been accurately shown in a montage and the users of the footpath will be high-susceptibility receptors as advised by the GVLIA3 passages previously cited.

292. The tall boundary screening would create a strong sense of enclosure, which would be much stronger than that which currently exists and would undermine the character of the area. Rather than integrating the development, the planting would simply block it off from the countryside that currently forms an intrinsic part of the setting of the settlement edge. The future residents of the estate, and the residents of the Gleneagles estate, would be prevented from enjoying the views of the surrounding countryside setting.

293. These changes would harm the character of the area.

294. There are conflicts with Policy RLP80 in that the development would harm the distinctive landscape features of the area and would not integrate successfully into the local landscape. There is also related conflict with Policy CS8 in that it fails to enhance the character of the landscape and results in loss of best and most versatile agricultural land; this point is elaborated upon below.

Evidence regarding delivery

295. The question of delivery was raised before the opening of the Inquiry in the second pre-inquiry note (INSP2). The only evidence regarding delivery was given orally by Mr Dixon in evidence. It amounted to a statement that DWH are a housebuilder with the intention to develop the site, an assertion that had the application not been called in, they would have submitted a reserved matters application already and an assertion that 'the likelihood is' that the development would be completed within the 5 years. No details as to DWH's track record were given. This is a slender basis indeed for the Secretary of State to give extra weight to provision of housing as a benefit on the strength of any claimed shortage of 5YHLS.

Unsustainability/ demand for services

296. The development would generate demand for and increased pressure on local public services in conflict with policy as explained above.

297. In relation to schools, the development would generate an estimated 36 additional primary pupils (ID1.8).

298. The healthcare contribution of £378.54 per dwelling (SAV56, schedule 8) would not actually address the problem of insufficient staff for the reasons referred to above.

Loss of BMV agricultural land

299. DWH's own evidence discloses that this site is best and most versatile agricultural land, although no details as to its quality are given. The site area is 5.2Ha (SAV2, application form). The loss of this land to agriculture is material, particularly in combination with the other consented and planned green-field development in the area (including the emerging BNLP allocations) and conflicts with CS Policy CS8 with Framework paragraph 112.

5YHLS/weight attaching to provision of housing

300. HPPC's case is that on the correct approach, there is no shortfall in 5YHLS for the reasons set out above. Even if that be wrong, the shortfall does not justify departure from the development plan. The specific development plan policies and the physical and policy harms referred to (including conflict with the Framework) significantly and demonstrably outweigh the benefits of providing 120 dwellings at this location.

Conclusion of HPPC case to the Inquiry

301. For the reasons set out above, the 3 schemes should be refused planning permission; the GDL 140 dwelling and the DWH 120 dwelling applications should be refused and the GDL appeal dismissed.

The Case for Stone Path Meadow Residents Group on policy and housing land supply

Introduction

302. There are three parts to the case for SPMRG. First, identifying conflict with the Development Plan; second, the application of Limbs 1 and 2 under the fourth bullet point of Framework paragraph 14; and third, a consideration of the planning balance. Only extracts from the first two parts are of relevance to the determination of this application.

303. In very brief summary, SPMRG submit that with respect to part one, there is a conflict with development plan in respect of seven separate policies only some of which are relevant.

304. With respect to part 2, SPMRG submit that there is a five year housing land supply and that as such the fourth bullet point does not, in fact, apply.

Part one

305. SPMRG submits that the evidence presented at the Inquiry demonstrates that there is significant conflict with the following adopted development plan policies:

i) Policy RLP2: Town Development Boundaries and Village Envelopes;

ii) Policy CS5: in relation to the countryside and development outside village envelopes;

Development Boundaries: RLP2 and CS5

306. Both GDL application schemes (and by extension this application scheme) clearly fall outside the adopted development boundaries, and it was accepted by Mr Lee for GDL that both proposals would therefore breach policies RLP2 and CS5 (this is also the position of DWH). Significant weight should be given to these breaches. The relevant policy in the emerging BNLP is LPP1 the wording of which is set out above (paragraph 35).

307. Ms Jarvis was asked in cross-examination about the date when development boundaries were last reviewed. It is submitted that, in the context of this District and this site, this is irrelevant. It is apparent from the emerging Local Plan that the Council's spatial strategy, as discussed by Ms Jarvis in her written and oral evidence, is focused on significant development in other areas of the District and, in particular, on a number of Garden Villages. It is plain from BNLP Inset Map 36

that the development boundaries of Hatfield Peverel are intended to remain exactly the same in relation to this site as they are in the adopted development plan documents. The current intention of the Council as seen through the emerging Local Plan therefore clearly demonstrates that the development boundaries are appropriate in their current location.

308. It is acknowledged that the RLP2 and CS5 date from before the introduction of the Framework and therefore must be judged against Framework paragraph 215. In the very recent appeal decision (CD.32.10 set C, paragraph 39), on the same policies under consideration here, the Inspector discussed Policy CS5:

> *I accept that the policy does not reflect the exact wording of the Framework; its adoption pre-dated the publication of the Framework. For that reason the policy needs to be considered against paragraph 215 of the Framework. It is a policy firmly aimed at protecting the environment, landscape character and biodiversity of the countryside. This accords with recognising the intrinsic character and beauty of the countryside and supporting thriving communities within it given in paragraph 55 of the Framework. I therefore consider that it should be given the greater weight identified in paragraph 215*. (emphasis added).

309. Contrary to suggestions made at Inquiry that this Inspector had erred in her analysis , she has clearly identified that it was open to her to attach "due weight… according to [its] degree of consistency with this framework" to CS5 as set out in Framework paragraph 215. It is submitted that the Inspector found that the policy was highly consistent with the Framework, focusing in particular on Framework paragraph 55 and therefore determined that, given its closeness to the Framework, she could accordingly give it greater weight than if it had been inconsistent with the Framework. In accordance with the well-rehearsed principles set out in *Bloor Homes East Midlands Ltd v SSCLG* [2014] EWHC 754 (Admin) in relation to how to read an Inspector's decision letter, it is therefore submitted that the Inspector's analysis is sound, based on an accurate understanding of the Framework and should be adopted here.

310. It is therefore submitted that significant weight should be attributed to the breaches of RLP2 and CS5 that would occur should either proposal be granted planning permission. As set out below when considering the tilted balance, emerging policy LPP1 would also be breached.

Part two:

311. This second part addresses the two limbs of the fourth bullet point of Framework paragraph 14: the "tilted balance" in Limb 1 and the "unweighted balance" to be applied to the identified heritage harm in Limb 2.

312. First it is necessary to consider whether the proposals fall within the fourth bullet point at all - is the development plan "absent, silent or [are] relevant policies out of date" - before considering the restrictive heritage policies under Limb 2, followed by the tilted balance under Limb 1, in the event that the Secretary of State disagrees with the first two conclusions.

313. Only the general points relating to 5YHLS set out below are relevant to the determination of this application.

Five Year Land Supply

314. As per the table of the parties' agreed positions (ID1.13), it is SPMRG's case that the Council can demonstrate a 5YLS, such that Framework paragraph 49 does not apply and "relevant policies for the supply of housing" are "up to date", such that there is no access to the tilted balance on this ground.

315. SPMRG's position on the disputed elements of the 5YLS calculation is as set out in Mr Leaf's adopted proof of evidence (RG5) and as per the discussion at Inquiry.

The Liverpool approach

316. The appropriate approach to take in addressing the backlog is the Liverpool approach, spreading the backlog of 1,660 dwellings out over the remaining plan period.

317. As explained by Mrs Hutchinson on behalf of the Council, the Liverpool approach forms the basis of the emerging Local Plan which is currently at examination. SPMRG submits that to adopt the Sedgefield method would be to undermine this approach taken by the Council after considerable consultation and work and, consequently, would be inappropriate in a plan-led system.

318. Paragraph 35 of the PPG provides that undersupply should be addressed "where possible" during the first five years of a plan. SPMRG submit that, here, it is not "possible". Adopting the Sedgefield method plus 5% produces an annual requirement of 1,100 dwellings or 1,258 dwellings with 20%: these targets are far in excess of anything achieved by the Council going back as far as 2001 and it is therefore extremely unlikely that the Council would be able to achieve these targets. There is therefore no practical purpose to adopting this approach: it is simply not possible for the Council to meet these requirements given their historic performance. Similarly, Mrs Hutchinson notes in her first proof that it is unrealistic to expect that the scale of increase in delivery required could be achieved straight away (paragraph 4.16, BDC1).

319. The significant increase in housing requirement from the Core Strategy figure of 272 dwellings per annum to an OAHN figure of 716 also indicates that the Liverpool approach is appropriate. This sudden upsurge in the annual requirement is another reason why it is not possible for the Council to address the existing backlog in the next five years.

320. It is also highly relevant that the Council is bringing forward new Garden Communities in its area as set out in policies SP2 and SP7 of the BNLP, Section 2. The Council has thus deliberately planned its anticipated housing delivery over the Plan Period as a stepped housing trajectory based on the delivery of a strategic site, as opposed to a "standard annualised requirement". The latest 5YLS Statement predicts that 40,000 new homes in North Essex will be delivered by these Garden Communities. This also suggests that the Liverpool approach is appropriate, given the way in which the Council is planning its approach to housing delivery over the whole plan period.

321. SPMRG notes that Planning Inspectors have adopted the Sedgefield approach in the recent decisions at Coggeshall (paragraph 14 to 15, CD32.2 set C), Steeple Bumpstead (paragraph 9, CD32.10 set C). In the first place, the BNLP has now been submitted for examination since these decisions, which is a significant step

forward in terms of the certainty of the Council's approach to Garden Villages (although plainly the Plan has yet to make it through examination). Secondly, neither Inspector's analysis addresses the points raised above in respect of whether it is possible for the Council to make up the backlog in the first five years.

5% or 20% Buffer

322. As submitted at Inquiry, SPMRG's case is that the appropriate target against which the Council's record of delivery should be measured for the purposes of applying either a 5% or 20% buffer is the requirement that was in place at the time. SPMRG therefore agrees with the Council's closing submissions on this point.

323. Further support is provided for this use of contemporary targets for measuring delivery by the two planning decisions submitted by SPMRG on the first day of the Inquiry.

324. The first is the Navigator L decision, dated 20th January 2015 (ID44). Here the Council had "oversupplied" against local plan figures from 2006-2014, but had undersupplied against a SHMA figure dating from April 2011. The Council argued that it should have its policy "oversupply" deducted from the requirement figure going forward over the next five years, on the grounds that it could not have known about the SHMA figure until 2014, so the requirement should not be calculated using that figure. The Inspector rejected that argument, noting that "I fully accept that during 2011-2014 the Council could not have been expected to meet a need which it was not aware of at the time, but that is not the point here." In footnote 8 to this paragraph, the Inspector goes on to say that the Council's being unable to meet a need of which it was not aware "might be relevant in other circumstances, such as where the point at issue relates to where there has been "persistent under-delivery" for the purposes of the NPPF-buffer". The issue he was deciding was different but he clearly took the view that the Council should be measured in "persistent under-delivery" terms against the targets which it knew it was aiming for.

325. The second decision is Land North of Cranleigh Road, dated 14th August 2017 (ID43). Here, the Council had a low pre-Framework Core Strategy housing target, on which it sought to rely for establishing a forward requirement (unlike the Council here). The Inspector disagreed and found that the forward requirement should be calculated using much more recent and much higher OAHN figures, even though these were not yet tested or adopted in a development plan document.

326. The developer also argued that "persistent under-delivery" should also be measured against these new figures from 2011, the date from which the requirement was calculated. This argument was rejected by the Inspector, referencing the Navigator decision, on the grounds that "in the period up until 2014 when the then PUSH SHMA identified a OAHN the LPA could not have been expected to meet a need that it was not aware of. On this basis, allowing for peaks and troughs, significant under-delivery in only 3 out of the last 10 years. On this basis, the application of a 20% buffer is not, in my view, justified."

327. Both of these decisions provide support for adopting the targets in place at the time when determining whether the Council has persistently under-delivered. It is plain that there is no under delivery in the present case.

Supply

328. As set out in Mr Leaf's letter (ID21), SPMRG submits that the Council has underestimated its supply by 461 dwellings (including the Sorrell's Field at 50 dwellings), such that there ought to be a 5YLS of 5.35 years using the Liverpool method plus 5%. Individual treatment of these sites is set out in Mr Leaf's letter and is not repeated here.

329. SPMRG has identified these sites on an application of the principles in Framework paragraph 47 and footnote 11 of the Framework and paragraphs 35-9 of *St Modwen Developments Ltd v SSCLG and others* [2016] EWHC 968 (Admin) (CD31.18, set C). It is submitted that it is plain that these sites fall within the definition of "deliverable", which does not require a site either to be allocated or to have planning permission.

330. SPMRG makes the following submissions in response to the Statement of Common Ground between GDL, DWH and the Council (ID39).

331. SPMRG maintains that the identified sites can be considered to be "available now": the fact that steps need to be taken before the site can be developed does not prevent the site from being available any more than GDL's need to sell the site to a housing developer prevents Stone Path Meadow from being available.

332. The figure for Sorrell's Field was adjusted down from 52 dwellings to 50 on the understanding that the application was being revised down to 50 units.

333. Contrary to the penultimate paragraph of the SOCG, the Gimsons site (WITC 421) is included in the housing trajectory appended to the letter to Priti Patel MP, headed "Copy of full housing trajectory including draft allocations re query". The entry is on the last page, showing 70 dwellings over the next five years and noting that "Planning application expected to be submitted Autumn 2017 by Bellway Homes".

334. Should the Secretary of State find that there is a 5YLS deficit, contrary to the above submissions, this deficit should be given limited weight for the reasons set out in Mr Leaf's adopted proof and applying the principles in the case of *Phides Estates (Overseas) Limited v SSCLG [2015]* EWHC 827 (Admin) (CD31.10 set C) as set out in the Statement of Case (at paragraphs 103-108 and not repeated here).

The Case for Braintree District Council

Introduction

335. The background to this inquiry is set out in the Procedural Matters at the beginning of this report. The case set out addresses all three schemes before the Secretary of State unless otherwise stated.

336. As was made clear in Opening, the Council's position to this inquiry is that there is no sufficient basis to refuse planning permission for these schemes, notwithstanding that they are in conflict with the adopted development plan. It stands by the assessments that its officers made of the schemes. It recognises

that had the two larger schemes not been called in, it is likely that they would have planning permission by now. It has not sought to challenge the developers' core case that, respectively, their schemes merit planning permission.

337. Equally it is of course primarily for those developers to persuade the Secretary of State that their schemes are worthy of planning permission, and the Council has not, in that same context, sought to attack the case mounted against the schemes by SPMRG and HPPC, even where those parties have been critical of the Council's approach. That does not mean, of course, that the Council accepts those criticisms are well-founded - they are not - but stems from a recognition that the purpose of this Inquiry is to consider the case for granting planning permission for each of the schemes.

338. In that same context, the Council will not descend into the detail of many of the disputes which will govern the ultimate outcome of this process; not because the Council does not have a view on them, but because it recognises that additional submissions from the Council on those points, beyond those made by the party advancing a particular position, are unlikely to assist. Accordingly, the Council's case is relatively brief. It does, however, touch on some of the controversial issues where the Council has taken a particular position on them which may not be mirrored by the relevant other party. The first is in respect of housing land supply.

Housing Land Supply

339. A key element of the Council's conclusions on the ultimate acceptability of these schemes - all of which are contrary to the adopted development plan - is that it could not then and cannot now demonstrate a 5-year supply of housing land. Efforts were made 'behind the scenes' to reach an agreed position with the two appellants as to housing land supply (including the suggestion of agreeing a 'range') but that did not bear fruit.

340. The Council was pleased to agree a position in respect of OAHN but in the light of Mr Spry's eventual position, remain surprised that further agreement could not be reached. Broadly we accept the Inspector's characterisation of the position when summarising the round table discussion, that it is unlikely that there would be a materially different effect on weight whether there was a c.3.3-year (GDL/DWH high water-mark) or c.3.9-year (Council's best case) deficit. In either scenario, the deficit is considerable and weighs in favour of granting permission for more housing.

341. Nonetheless GDL/DWH maintained that the true position was the lower end of that range, for reasons the Council do not accept are valid. As such a number of points arise for further comment.

342. Before moving to the specific controversies, it is important to be absolutely clear about the Council's approach to its BNLP. It would not have submitted its draft Plan for examination if it was not confident about its soundness. It is not inconsistent with that confidence to recognise that until the examination process has been carried out and expert consideration given to the contents, some uncertainty remains. Confidence in the plan's soundness does not exclude a pragmatic view of the reliance that can be placed on its draft provisions in the development management context until such time as they are confirmed.

343. Indeed such an approach accords with national policy in the Framework, which at paragraph 216 advises that weight should be afforded to emerging policy according to various factors, all of which are referable to the inherent uncertainty about the contents of draft plans until they are adopted.

344. A good example is the inclusion of draft allocations for housing on sites which under the existing adopted plan - which retains its statutory primacy - would be contrary to the development plan. The Gimsons site - identified by SPMRG in this case as one draft allocation that should be included in the five-year supply - makes the point neatly. While the emerging plan allocates it for housing development, the adopted plan has it as a Visually Important Space under Policy RLP4, meaning it is inappropriate for housing. Until such time as the draft allocation supercedes the present development plan status, it cannot be considered 'deliverable'. Of course, there is the additional irony that Priti Patel MP, in whose office Mr Leaf works, has objected to the draft allocation of the Gimsons site in the emerging plan and yet here (by extension) argues that it should be treated as a deliverable site for housing.

345. This general approach is relevant to the Council's position in two respects. First, in terms of the Liverpool/Sedgefield dichotomy in dealing with the shortfall since 2013 and, second, in terms of the additional sites that SPMRG sought to promote as being deliverable in their letter of 12 December 2017 (ID21). The Council turns next to the specific components of the supply debate.

OAHN

346. There is no challenge in this inquiry to the Council's position that its OAHN is 716 dwellings per annum. That figure has been derived from the latest household projections (in accordance with the PPG), and uplifted by 15% to account for 'market signals' (essentially past unmet need). That means that the ultimate figure of 716 dpa specifically accounts for unmet need in past years, in the way the PPG requires.

347. The figure is one of the key elements of the first Section of the emerging plan, which will be considered at the EiP in January 2018. All parties will be likely to wish to make submissions on the outcome of that EiP on the OAHN, and its ramifications (if any) for the matters before this Inquiry if they remain undetermined at that point.

Shortfall

348. The quantum of the shortfall against the OAHN of 716 (effectively unmet need) since 2013 is uncontroversial, but the period over which it is sought to be 'recovered' is not. GDL/DWH argue that it should be recovered in the next five years, relying on the PPG, which suggests that this 'Sedgefield' approach is appropriate unless it is unachievable. The Rule 6 parties contend for the shortfall to be recovered over the entire plan period, the so-called 'Liverpool' approach.

349. The Council will contend at the forthcoming EiP into its emerging plan that the examining Inspector should accept, for the purposes of the soundness of the emerging plan, the 'Liverpool' approach. This is in large part because that same plan contains an overall strategy (shared with its partner authorities) of seeking to meet future growth in Braintree (and beyond) by creating new Garden Communities and allocating larger housing sites, which can better respond to the

requirements for new infrastructure to support housing development, a strategy which the Council considers accords with government policy and is a sound approach to meeting future growth needs.

350. That same strategy means, however, that some of the new land for housing will not come forward until the middle of the plan period (and indeed beyond). If it is confirmed by the EiP as a sound strategy, it will provide ample justification for the Liverpool approach. The Council hopes it will be so confirmed. However, it has argued in three recent s.78 appeals that it provides that justification now, even as a draft strategy, and in each case has failed to persuade the Inspector of that. The failure in each case has been broadly on the basis that until there is greater certainty about the emerging plan, the Sedgefield approach should be preferred. That appears to be rooted in Framework paragraph 216.

351. On that basis, and for essentially pragmatic reasons, the Council's position to this Inquiry has been that it accepts that until its strategy is confirmed, it is likely to remain the case that the Sedgefield approach to making up the shortfall is appropriate for development management decisions. It recognises the clear steer in the Framework and PPG towards meeting needs, and doing so for the next five 5 years in particular. It has had regard - entirely properly - to the conclusions on this very issue reached by three recent s.78 appeal Inspectors. Its key justification for the Liverpool approach depends on a strategy within a plan that is still emerging and has yet to be tested. Its approach here is pragmatic but also sound and sensible, and there is no inconsistency with its approach to the emerging local plan.

352. It is also consistent with its position of relying on the other conclusions of those three Inspectors, in respect of (for example) the weight to be attached to policies of the development plan. It is generally unattractive to seek to rely only on those parts of a recent decision that suit one's case, while ignoring other elements which do not. The Council does not fall into this trap.

Buffer

353. This debate was essentially reduced, via the round table session, to a binary disagreement about whether one treats the OAHN of 716 dpa as being the 'appropriate target' from 2013, or only from the time when it became a target at all (i.e. in 2016). Mr Spry says you should 'backdate' it to 2013, Mrs Hutchinson says not.

354. The Council adopts the Inspector's characterisation of Mr Spry's approach as illogical. Unlike the consideration of the shortfall since 2013, this exercise is not one of quantifying unmet need. It is specifically considering how likely it is that the planned supply will be met, using past performance against applicable targets as an indicator of likely future performance. This is clear because the purpose of including a 20% buffer (where there has been 'persistent under-delivery') is 'in order to provide a realistic prospect of achieving the planned supply' (see Framework paragraph 47). A local authority which has persistently, as it were, fired its arrows wide of the target must be moved closer to the target in order to improve its chances of hitting that target in future.

355. It thus follows that the nature of this exercise is considering past performance, not in terms of meeting actual needs but in terms of meeting planned targets. It is not about being 'unfair' to anyone - that was Mr Spry's straw man - but about

the nature of the exercise. The advocates for GDL/DWH were quite correct to say this has nothing to do with 'punishing' anyone and should be carried out in an entirely dispassionate way. It also explains why it is not helpful here to consider whether past targets were themselves likely to be lower than actual needs. The question is how often Braintree's arrows hit the target, not whether those targets ought to have been different. Nothing in the *Cotswold* judgment (ID1.15) indicates otherwise.

356. The simple fact is that 716 was not in any sense a 'target' for this Council prior to 2016 and it makes no sense in this context to consider its performance in hitting a 'target' that it was not aiming for; that would say precisely nothing about the likelihood of 'achieving the planned supply' in the future. The usefulness of the exercise relies upon identifying what the target in fact was at the time. It was not 716 until 2016.

357. For those reasons a 5% buffer is appropriate. Mrs Hutchinson's evidence makes clear that Braintree has not persistently under-delivered.

Supply

358. There is (now) an immaterial difference, some 68 units, between GDL/DWH and the Council on the quantum of supply.

359. Of more materiality is the SPMRG position that ten further sites should have been included in the supply as set out in Mr Leaf's letter of 12 December (ID21). The question of whether those sites should be included in the supply is the subject of a SOCG between GDL/DWH and the Council (ID37), both as a matter of principle and on a site-by-site basis. The Council does not repeat, but does rely upon, those points here.

360. There is ample justification for the position taken by the Council in respect of those sites, as accepted by GDL/DWH. In short and in general terms the draft allocations may only attract limited weight until the emerging plan within which they appear has progressed further along its journey to adoption. Looking at the sites individually results in the conclusion in each case that they are not yet to be considered 'deliverable' for development management purposes.

361. It is also clear that these sites only make a material difference to the position if the position of the Rule 6 parties (contrary to the case presented by the Council and GDL/DWH) that the Liverpool approach should be adopted now is correct.

Conclusion - housing land supply

362. The above points lead to the conclusion that the Council is correct to say that it cannot yet demonstrate a five-year supply of housing land. Insofar as it matters, the position is that it can demonstrate something in the region of 3.9 years, at least until its emerging plan attracts greater weight. That means that the proposals fall to be determined having regard to the 'tilted balance' in Framework paragraph 14. There is, therefore, justification for not applying the restrictive policies of the development plan 'with full rigour'; and the delivery of housing attracts greater weight in favour of the proposals than it might if there was a five year supply.

The approach to the development plan

363. These proposals are all contrary to the adopted development plan. The controversy revolves around how that conflict should be treated within the context of the Framework and the statutory test.

364. GDL/DWH and the Council agree that the ultimate outcome of that exercise is that planning permission should be granted for all three schemes. However, there is some divergence in the way in which the parties arrive at that conclusion. On that basis it may assist to have the Council's position set out clearly.

365. The proper approach to the development plan, where there is no five year supply of housing land, has been considered a number of times recently by Inspectors on s.78 appeals in Braintree District Council. The Council respectfully adopts the reasoning of Inspectors Hill and Gregory in the Coggeshall (CD32.2 set C) and Steeple Bumpstead (CD32.10 set C) Inquiries (respectively), and the consistent decision of Inspector Fagan at Finchingfield (CD32.4 set C). It is of note that both GDL, and its counsel here, appeared at Steeple Bumpstead and advanced the same argument there as here in respect of restrictive policy CS5, and it was roundly rejected. There does not appear to have been any real recognition of that in their position to this inquiry.

366. In short:

i) There is a sound basis in principle for reducing the weight to be applied to restrictive policies of the development plan on account of the lack of a five year supply of housing land;

ii) The quantum of that reduction depends on a number of factors, including the extent of the shortfall, the purpose of the policy, and the consistency of the policy with the Framework;

iii) There is no sound basis for reducing the weight to be attached to restrictive policies on account of their age alone (paragraph 40 iii F6f); and

iv) In terms of consistency with the Framework, a nuanced approach is required by Framework paragraph 215 which calls for due weight to be attached depending on the degree of consistency with the Framework (paragraph 52, *Daventry DC v SSCLG and Ors* [2015] EWHC Civ 3459).

367. Saved policy RLP2 can be afforded limited weight because it is restrictive of housing and the District has a shortfall in housing land supply. The boundaries on which it relies were set with reference to housing needs for a period that has expired. This is the same conclusion reached by Inspector Fagan in the Finchingfield decision (CD32.4 set C, paragraph 10).

368. Although Saved policy RLP80 is not criteria based and applies a generalised approach in protecting landscape features and habitats, it is generally in conformity with the Framework and the Council maintains that it should be given considerable weight.

369. CS policy CS1 is a 'policy for the supply of housing' and is out of date by virtue of Framework paragraph 49. Insofar as there is a breach of its terms it attracts

limited weight as found by, for example, the Finchingfield Inspector (CD32.4 set C, paragraph 10).

370. By contrast, CS policy CS5 attracts more than the 'very limited weight' argued for by Mr Lee (for GDL) and the 'limited weight' argued for by Mr Dixon (for DWH). For the reasons set out by Inspectors Hill (CD32.2 set C, paragraph 59), Gregory (CD32.10 set C, paragraphs 39 & 65) and Fagan (CD32.4 set C, paragraph 59), policy CS5 should be afforded more than moderate, but not full, weight. It is consistent with the Framework core principle concerned with protecting the countryside from harm. There is some justification for a reduction in weight on account of the lack of a five year supply but no justification for that reduction to be as great as argued for by GDL/DWH here. This has been confirmed three times in s.78 appeal Inquiries since July 2017. It may be that Mr Dixon's evidence is in line with this, following clarification in his evidence in chief that it is the precise position of the boundaries, rather than the protective element, that attracts reduced weight.

371. GDL is correct to say that the Framework provides for a hierarchy of protection; at the top are designated landscapes, then below those come 'valued landscapes' and then the residual category of landscapes within which the Stone Path Drive site sits. It does not follow, however, that those at the bottom of this hierarchy get no protection. The hierarchy simply requires that they attract a lesser degree of protection than might categories above them in the hierarchy. In the Finchingfield and Steeple Bumpstead decisions, both of which concerned 'valued landscapes', it was held that Framework paragraph 109 was a 'footnote 9 policy' indicating that development should be restricted, providing an additional level of protection by disengaging the 'tilted balance'. That alone is sufficient to satisfy the hierarchy argument. Policy CS5 permits this hierarchy of protection to be respected.

372. Lastly, the emerging NDP. This is not yet part of the development plan and attracts only limited weight on that basis. It does not provide any sufficient basis for refusing any of the schemes. In particular, the debate about the wording of policy HPE1 (whether it is or is not restrictive of all - or all large - housing development in the countryside, and thus its consistency with the Framework) is precisely the kind of debate that will be resolved when the NDP is examined. It is an excellent example of why only limited weight attaches to plans at this stage of their development.

373. It would be remiss not to mention the Alan Massow e-mail (ID26). The position vis-à-vis the draft Green Gap between Hatfield Peverel and Witham is a draft policy in an emerging neighbourhood plan, which has some way to go before it is made and becomes part of the development plan. As Mr Massow's e-mail suggests, and as Mrs Hutchinson clarified in her evidence, the District Council considers that the question of whether there should be a green gap in this location to be a non-strategic one and for that reason it is not included as a draft policy in its emerging plan.

374. The question of whether a green gap in this location should be part of the development plan is left to the neighbourhood level, which is entirely proper. This Inquiry is not the place to examine either the emerging local plan or the emerging neighbourhood plan. The debate is sidestepped by acknowledging that the weight to be attributed to the terms of the emerging draft neighbourhood

plan - including the draft Green Gap policy - is limited, pursuant to Framework paragraph 216.

The planning balance

375. In each case, on the above basis, a balance must be carried out using the 'tilted balance' contained within Framework paragraph 14. A finding that such an exercise points to the proposal being sustainable development (i.e. the harms not outweighing the benefits) will be a weighty material consideration pointing towards a grant of permission notwithstanding the conflict with the development plan. That is, essentially, the conclusion that the Council reached in respect of all three schemes. It is the conclusion the Council suggests should be recommended to the Secretary of State.

376. The crucial benefit here, in each case, is the delivery of much-needed housing in a situation of deficit. Given that the deficit is, on any view, more than a year's worth of housing at this stage, and is unlikely to be eliminated until such time as the new local plan is adopted, the weight to be afforded to that benefit is substantial and is not outweighed by the harms, which are relatively limited.

Conclusion

377. The conclusions reached by the Officer's Reports in respect of each scheme are sound and should in effect be confirmed.

The Case for Interested Persons

378. A total of six people made presentations to the Inquiry and answered questions from Mr Tucker. All responded positively to my request for a written statement and these are listed in Annex A. Mr Webb and Mr Hutton gave their statements by way of a PowerPoint presentation, copies of which are included in the documents. Thanks are due to the Council officers for making the necessary equipment available. What follows is a summary of the main points made by each speaker. The full submissions are available to read.

379. **John Webb** is a resident of the Gleneagles Way estate. His evidence focused on the traffic implications arising from the proposed development. He noted that Gleneagles Way is already a cul-de-sac development with a single point of access to the wider highway network. That single point of access would remain; it would however serve triple the number of dwellings if the proposal went ahead.

380. The junction of Gleneagles Way and The Street is inherently dangerous as it requires turning into (to exit the estate) or across (to return home) the off-slip from the A12. Traffic leaves the A12 at speed and has only a short distance to slow to 30mph. He put the distance from the 30mph sign to the junction at some 60m.

381. Local people did not accept the reported results from the speed survey carried out and submitted by DWH. HPPC commissioned another. He included the outcome figures and argued that using the average speeds as DWH had completely distorts the true picture. In fact, the new survey shows that 45% of the vehicles going past the junction do so at speeds in excess of 30mph. Proposed improvements to the visibility splay miss the point entirely. It is the design of the off slip that makes speed difficult to judge combined with the failure to enforce speed restrictions that cause the danger. (*Inspector note: DWH were*

not aware of this additional survey data until Mr Webb presented it. Document ID20 is its response).

382. **Michael Hutton** has been resident in the Gleneagles Estate for some 23 years. His presentation contained a number of annotated images. These showed the effect that new developments on the edge of Witham such as Lodge Farm and Woodend Farm were already having on the distance between Witham and Hatfield Peverel. The application scheme would reduce this separation distance further to just under 1km from just over 2km before these developments took place.

383. The application site is beyond the village boundary and previous planning applications have been refused. Photographs of views (which appear several times in the evidence) illustrate views across the application site.

384. The NDP already includes a comprehensive development area which is well-placed in relation to the main line station.

385. **Lesley Moxhay** has been a local resident for 34 years. She spoke about the ecology of the area. She suggested that the field margins provided a rich habitat while the land itself was Grade 2 and therefore best and most versatile agricultural land. Building on it was therefore contrary to Framework paragraphs 111 and 112.

386. In summary, her evidence is that the human activity that will be introduced into the area will have an adverse impact on the many protected species on or near to the site such as bats, badgers, grass snakes and slow worms. Furthermore, the measures put forward and agreed by the Council in mitigation of potential impacts on the Blackwater Estuary Natura 2000 site will be wholly inadequate and potentially counter-productive for local wildlife. The cumulative effect on the ecosystem from all of the developments planned in Hatfield Peverel should be given great weight in the planning process.

387. A resident of Woodham Drive whose property abuts the south western tip of the site, **Ron Elliston** made a number of points all of which are raised by HPPC or others. In summary, these include:

a. That the site is not allocated in any development plan and lies beyond the settlement boundary;
b. The site is best and most versatile agricultural land;
c. Previous applications have been refused and this one is opposed by the local MP, County Councillor and District Councillor;
d. The green wedge between Hatfield Peverel and Witham will be further eroded;
e. The A12 is a source of noise and exhaust emissions which the acoustic barrier proposed will not mitigate even though it will have a landscape impact;
f. Similar traffic safety concerns to those expressed by Mr Webb;
g. Local schools and the surgery are already at capacity with more pressure to come from planned development;
h. Few employment opportunities with the closure of Arla dairy resulting in increased commuting.

388. In a supplementary statement (ID11a), Mr Elliston challenged the proposed provision of a new crossing point on Maldon Road near to the junction with The Street on the basis that it did not and could not comply with current guidance.

389. **Andy Simmonds** has lived in the village for 36 years. His statement was essentially a criticism of the way that the Council had dealt with the application.

390. **Kenneth Earney** spoke with respect to the effect on habitats, the lack of allocation in the development plan, the pressure on local schools and health facilities and traffic; he made similar points to other speakers.

Written Representations

391. At application stage the Council received 94 objections with some residents and households submitting multiple representations. The main material and non-material reasons for objection are summarised in the report to Committee (SAV38). The main headings under which they are grouped are principle of development; layout, design and appearance; landscape and ecology; highways; living conditions; and other matters. Most, if not all, of these issues have been raised by either or both HPPC and the interested persons in their evidence to the Inquiry.

392. A further seven representations were received by the Planning Inspectorate. These generally refer to matters raised in the initial objections to the scheme. Two are from Mr Webb and Mr Elliston and make the same or similar points as recorded above.

Conditions and Obligations

393. These were discussed at a round table session on the final sitting day of the Inquiry.

Conditions

394. Various drafts of the conditions that might be imposed if the Secretary of State decides to grant planning permission were submitted. The wording and need for each was discussed and a consolidated set helpfully provided by the Council following the discussion (ID53). In considering the conditions to recommend to the Secretary of State I have had regard to the advice in the relevant section of the PPG. The conditions that are recommended are set out in Annex C and the following references are to the conditions there.

395. Conditions 1 to 4 inclusive are standard outline planning permission conditions which define the reserved matters that will be subject of further approval. DWH explained that the Statement of Landscape Principles, (ID46) should be read alongside the parameters plan (SAV4) and the design and access statement (SAV7) in order to appreciate the approach the developer will take to mitigating the limited landscape harms caused by the development [107]. However, neither the Council nor DWH suggested that these should be subject to a condition and I consider to do so would go beyond what is normally specified at outline planning permission stage. No doubt the Council will nevertheless have regard to both when considering the reserved matters applications.

396. Condition 2 sets 2 years as the period within which the reserved matters applications must be submitted for approval to ensure that the eventual developer of the land brings forward housing in good time.

397. Condition 5 secures the access arrangements which are for approval now. It also secures a number of improvements to the crossing points and footways in the general vicinity of Gleneagles Way, The Street and A12 overbridge. Included among these is the new zebra crossing on Maldon Road proposed as part of ID1.5 and shown on Drawing 45604-P-SK207. Having walked the area in the afternoon I consider that an additional controlled crossing point is necessary to achieve a safe route to the bus stop for those wishing to travel by bus to Witham and further afield. This is especially important given the expectation that both primary and secondary pupils may have to travel in that direction to secure a school place.

398. Conditions 6 and 7 work together to control the ridge heights of the dwellings on those boundaries of the developable area that affect views of the settlement edge from the countryside. The height specified is that upon which the LVIA is based. The restriction is necessary to integrate the current settlement edge into the setting of the village.

399. Conditions 8 and 9 are necessary to ensure that any air quality issues arising from the proximity of the site to the A12 are addressed in the interests of the health and well-being of the future residents. Condition 10 is necessary to protect wildlife during construction and condition 11 is required to ensure that in bringing forward the reserved matters applications the scheme is landscaped in accordance with the parameters set out and maintained thereafter as specified.

400. In order to ensure that disturbance to the existing residents in the area is minimised as far as is practicable while the development takes place conditions 12 and 13 should be imposed to control the management and operation of the site and the hours during which work can take place and materials can be moved on and off site. The requirement for details of any piling to be approved (condition 15) arises for the same reason.

401. A number of schemes are required before development begins to ensure that any issues not already identified are explored and addressed as appropriate. These include conditions 16 (archaeology), 17 to 19 (surface water drainage) and 20 (foul water drainage). Condition 21 is similar in that it requires the measures to be put in place to protect all the identified existing trees and hedges that are to be retained to be approved prior to construction. I have removed the phrase ‘to the complete satisfaction of the local planning authority’ from the suggested condition 21 as this is an uncertain specification and therefore unenforceable. It would not therefore meet the tests on the PPG.

402. There are a number of conditions that are required to protect the nature conservation interest of the site and surrounding area. These include no clearance of trees and hedges during the defined nesting season (condition 23), the provision of nest and roost sites as the development becomes occupied (condition 24) and reviews of already submitted surveys prior to the submission of reserved matters (condition 25) or if the development is delayed or suspended such that circumstances might have changed (condition 26). Condition 14 (external lighting) is required primarily to mitigate any disturbance that may be caused by light pollution to roosting and foraging bats. It is my understanding of

the discussion that this is its purpose. It is not intended to provide detailed control over the lighting that individual occupiers might wish to provide for, say, security. It is more to address the lighting of public spaces that will be provided as part of reserved matters applications.

403. Condition 28 is necessary in the interests of promoting sustainable modes of travel. The achievement of a high quality development where people will wish to live will be enhanced by the undergrounding of existing overhead power lines and that will be secured by condition 29.

404. A number of conditions were subject of debate and disagreement in some cases.

405. Condition 22 secures the important provision of space for the necessary materials recycling bins in order to facilitate the more sustainable management of waste materials by the local collection authority.

406. During the discussion of that condition it was suggested that its scope be widened to include the provision of other infrastructure such as high speed broadband. While there was a consensus that this would be desirable, its provision was not in the control of the developer. A condition of that nature would therefore be unenforceable and so would not meet the tests set out in the PPG.

407. While there is no dispute that the condition is required to protect the health of future residents living close to the A12 there is a disagreement about the timing of the submission of details. I agree with the Council that the details need to be approved before reserved matters are submitted rather than together with them. The approved details may well influence the layout if not the appearance and to risk a refusal which meant a review of an already submitted reserved matters application seems to run counter to the objective of expedited housing delivery. It seems though unwise to restrict by condition the mitigation to the boundary even if that is what is ultimately approved. Suggested condition 27 therefore represents compromise wording of the two suggestions put forward.

408. Two other conditions were suggested by the Council and these are included within Annex C as conditions 30 and 31. They are set out there in italics as, in my view, neither is required. The suggested wording is nevertheless included should the Secretary of State take a different view.

409. Condition 30 is a standard materials condition of the type commonly imposed where this is either unclear at application stage or the local planning authority wishes to exercise further control over the matter. However, in this case ‘appearance’ is a reserved matter. It seems to me that the materials to be used are fundamental to the appearance of the buildings and I fail to understand why this important matter cannot be addressed then.

410. The Council explained that condition 31 is required to ensure that, initially, each plot is provided with some means of enclosure. The condition is not intended to remove the rights available under Schedule 2, Part 2, Class A of the Town and Country Planning (General Permitted Development) (England) Order 2015. That may not be the intention but I consider that it would be the effect. No evidence was put forward to justify such a restriction which the PPG advises

should only be imposed where circumstances require. Those circumstances do not exist here in my judgement.

411. A third condition suggested by the Council related to car parking standards. It was very specific in its requirements and referred to the Essex Parking Standards Design and Good Practice 2009 as the source. During the discussion it was argued that this condition was unnecessary as the reserved matters applications would be determined in accordance with the development plan policy and any supplementary planning document applicable at the time. I agree and do not suggest this condition be imposed.

412. A fourth suggested condition would have required a number of highway works and improvements to bus stops. It seems to me that the former are already secured by condition 5 while the latter relate not to this development but to those proposed at Stone Path Meadow which are the subject of separate reports. The condition is therefore not required in this case.

413. Finally, the Council suggested a condition requiring the submission for approval of a landscape and ecological management plan. From the body of the condition and the non-exhaustive list of matters it should cover it seems to me that it would duplicate a number of other landscape and ecological conditions that are already suggested to the Secretary of State. It is therefore unnecessary in my view.

Obligations

414. A planning obligation in the form of an agreement between the Council, ECC, the landowners and the developer has been submitted (ID59). It is signed by all parties and dated and is explicitly made pursuant to s106 of the principal Act with the obligations entered into being enforceable by the Council and ECC. The commencement date is defined as being when a material operation for the purposes of s56 of the Act is carried out.

415. The obligations are set out in 11 schedules. These make provision either in the form of financial contributions or other mechanisms for outdoor sport (Schedule 1), allotments (Schedule 2), community building (Schedule 3), highway works (Schedule 4) open space (Schedule 5), affordable housing (Schedule 6), education (Schedule 7), healthcare (Schedule 8), Blackwater Estuary mitigation contribution (Schedule 9), public rights of way contribution (Schedule 10) and housing phasing and landscape strategy (Schedule 11)

416. The Council has submitted a statement of compliance with the CIL Regulations (ID29) setting out the policy justification for each of the obligations provided.

417. In my judgement each of the obligations is necessary to make the development acceptable in planning terms; directly related to the development; and fairly and reasonably related in scale and kind to the development proposed. In my judgement each obligation meets the requirements of CIL Regulation 122 and Framework paragraph 204.

Conclusions

418. Throughout my conclusions, numbers in [] are references to other paragraphs in my report. Those in () are to the parts of the documentary or oral evidence upon which my conclusion or inference is based.

Policies in the Framework on delivering a wide choice of high quality homes

419. This is the first reason for the application being called in by the Secretary of State [4]. Little evidence was given about this.

420. Schedule 6 of the s106 obligation (ID59) will secure the provision of a substantial number of affordable homes within the development proposed. A mix of market and affordable housing would be delivered on-site and the policy set out in Framework paragraph 50, bullet 3 would therefore be delivered.

421. All of the other elements that go towards delivering the requirements for good design set out in Framework section 7 will be subject of the reserved matters applications that would need to be submitted. The Statement of Landscape Principles (ID46) sets an important context for the development and the Design and Access Statement (SAV4) also establishes some important principles that will no doubt guide the Council's development management process at reserved matters stage although no condition was suggested in this regard [395].

422. There is no evidence to suggest that the application site which is being promoted by a national housebuilder will not provide a range of high quality homes.

The extent to which the proposed development is consistent with the development plan for the area

423. This is the second reason given by the Secretary of State for the call-in [4]. In addressing this I shall also deal with the third reason, namely 'Any other matters the Inspector considers relevant'. These were set out in my first pre-Inquiry note (INSP1) and have been developed in the light of the written and oral evidence given. They encompass what, in my view, are the main considerations upon which the decision should be based.

424. However, before considering the application scheme against the policies of the adopted development plan I shall address the weight that I consider should be given to the emerging BNLP and NDP.

425. Turning first to the BNLP, the SOCG between DWH and the Council records that the weight to be given to the emerging plan policies should be determined in accordance with Framework paragraph 216 (paragraph 6.12, SOCG 4). That is different to the Council's agreement with GDL that limited weight should be given to the BNLP as a whole (paragraph 3.3.10 SOCG1). In closing submissions the Council considers the weight that should be attached to individual policies rather than the plan as a whole [363 to 374].

426. DWH reached the same initial agreement with HPPC (paragraph 6.12 SOCG 5). In closing submissions HPPC has revised its position and argues that the emerging BNLP can be given significant weight as it has progressed to examination stage [216]. That however is only one of the three considerations in Framework paragraph 216 that have to be taken into account.

427. The BNLP is subject to a considerable number of representations that it is unsound. For example, in an extensive representation (CD33.1 set C) GDL argues that policies SP1, SP3, SP5, SP7, SP8, SP9, SP10, LPP 1, LPP 18, LPP 19, LPP 22, LPP 37, LPP 49 and LPP 72 are unsound. Of these, only policy LPP 1 is a

relevant policy. No criticism is made by GDL of the others (such as SP 2 and LPP 71) referred to above [36 and 37].

428. The stage reached remains as set out above [33]. That is an advanced stage in the process to adoption but it is, nevertheless, the first stage at which independent scrutiny of the plan takes place. The Council is best placed to know the full extent of the challenge to the plan and its individual policies and thus the number and nature of the unresolved objections to them. The degree of consistency with the policies in the Framework must therefore be viewed in that context. Taking these three components of Framework paragraph 216 into account, I see no reason to take a different view to that which the Council took in the SOCG with GDL that only limited weight should be given to the BNLP.

429. The weight that should be given to the NDP is a matter of legal dispute between DWH [121 to 130] and HPPC [227 to 247]. I am not legally qualified to resolve that dispute and the Secretary of State may need to take his own legal advice to do so if he considers it necessary.

430. In my view, the position is actually quite straightforward. The NDP has been submitted for examination [39]. The exchange between the examiner and HPPC set out there seems to me conclusive. The examiner's first letter (Appendix MR24, HPPC1) is quite explicit that 'as it stands….the NDP fails to meet the Basic Conditions…'. Her second letter (Appendix MR25) declines to continue the examination because '…the issues raised are sufficiently substantive…' that to do so would risk abortive and unnecessary costs to the Council.

431. Both GDL (CD33.2 set C) and DWH (SAV50 and SAV52) have objected to the submission version of the NDP. Among the policies objected to are HPE1, HPE2, HPE6 and HPE8. Given the nature of the additional work to be done, the uncertainty over the timescale in which it will be completed and the effect that the outcome of that work and indeed the examination itself may have on the form of the NDP put to a referendum I consider that, in line with the guidance in Framework paragraph 216, very limited weight can be given to the NDP at this stage. I do not consider that the late information provided by HPPC [10] alters that conclusion. Although HPPC says the required work has now been done, Natural England's comments have not been made available; the outcome of the meeting with the Council to discuss the way forward is similarly unknown; and the views of the examiner about all of this are unknown in any event.

Would the proposal be in accordance with the spatial strategy?

432. The CS spatial strategy is set out in policy CS1 [29]. It promotes development in the KSVs and Hatfield Peverel is so categorised. The emerging BNLP does not alter the spatial strategy in that regard and identifies the A12/Great Eastern Mainline corridor as a location for future development [36]; Hatfield Peverel lies within that corridor.

433. As I explain a little later in this report I agree with GDL, DWH and the Council that the Council cannot show a 5YHLS. Framework paragraph 49 says that in those circumstances relevant policies for the supply of housing should not be considered up to date. Policy CS1 is clearly such a policy.

434. Whether it is the whole of the policy including the spatial strategy or just that part of the policy that sets the housing requirement that should be considered

out of date was the subject of post Inquiry sessions correspondence (INSP4 and ID54 to ID56).

435. Taking those views into account it is my judgement that, although as a policy for the supply of housing policy CS1 should be considered out of date, the spatial strategy within it should still be afforded some weight. The Council is having to address a substantially increased OAHN in the emerging BNLP. How it is doing so is set out in the evidence base (ID33). This confirms that the Settlement Fringes Evaluation (SFE) is part of the evidence base used to develop the strategy. That confirms that to meet the OAHN '…development will need to be accommodated on the periphery of the main towns and larger settlements…' (paragraph 1.4, CD14.4 set B) with Hatfield Peverel being identified as one of the nine settlements studied. Furthermore, ID33 explains why both the 'new settlement only' and 'constrained growth' options were rejected.

436. It seems to me therefore very likely that any strategy coming forward through the BNLP will include development at the KSVs, especially where these are within the A12/Great Eastern Mainline corridor that is identified as a location for future development.

437. I therefore conclude that the development proposed would be in accordance with the spatial strategy. There is no evidence to support the contention by HPPC that development in any settlement needs to be 'proportionate' [186]. Nevertheless, HPPC is correct in my judgement to argue that the spatial strategy does not, of itself, dictate that the boundary in this part of Hatfield Peverel needs to be altered [214 and 215] but that is a different point that relates to policy CS5 which I turn to now.

Would the proposal conflict with policies RLP2 and CS5?

438. These two development plan policies are summarised at [26] and [30] respectively with the precise wording of policy CS5 set out. They are worded differently but their effect is the same. Both establish that outside the defined development boundaries of settlements, countryside policies will apply. Policy CS5 goes further explaining that development will be strictly controlled to uses appropriate to the countryside.

439. It is a matter of fact that the application site adjoins, but is nevertheless beyond, the development boundary of Hatfield Peverel. The proposal is therefore in conflict with the development plan in this regard, a fact acknowledged by DWH (paragraphs 6.12 and 6.34 DWH1). The point in issue is the weight that should be given to this conflict in the overall planning balance.

440. There are two aspects to this. First, whether the policy is inconsistent with the Framework; that argument applies only in respect of policy CS5 [142 to 146]. Second, whether the development boundaries that are critical to the application of the policies are out of date because they are based on out of date housing requirements. They have not been subject to review for many years [112 and 113].

441. Dealing first with consistency with the Framework, policy CS5 has three components. The subject of the policy is (of relevance to this appeal) development outside village envelopes. The 'action' of the policy is to strictly control that development to uses appropriate to the countryside. The purpose is

'to protect and enhance the landscape character and biodiversity, geodiversity and amenity of the countryside'.

442. The policy does not, in my view, apply blanket protection to the countryside. It makes clear that uses appropriate to the countryside would be permitted. The policy itself and its supporting text do not explain what those uses might be but it is difficult to imagine that a substantial village expansion housing development would fall into that category. Some guidance is however given elsewhere in the CS (at paragraph 4.24) in the discussion of 'The Countryside'. Some of the uses there (for example, development necessary to support traditional land-based activities such as agriculture and forestry) are not dissimilar to one of those listed in Framework paragraph 55 (the first bullet).

443. One of the core planning principles set out in Framework paragraph 17 requires local planning authorities in both plan-making and decision-taking to recognise the intrinsic character and beauty of the countryside. To my mind a policy that seeks to 'protect and enhance', as policy CS5 does, is not seriously out of kilter with that core principle.

444. Although drafted in advance of the publication of the Framework I therefore do not consider policy CS5 to be inconsistent with it. As the Council notes when arguing that more than moderate but not full weight should be afforded to this policy [370] three previous Inspectors have considered the same policy in relation to appeal proposals submitted by GDL in the District (CDs 32.2, 32,4 and 32.10 all in set C). My conclusion with respect to this aspect of the policy is consistent with each of theirs.

445. Turning to the development boundaries point, there is no evidence before this Inquiry of any review of the development boundaries as part of the preparation of the BNLP [113]. While the methodology for doing so has been approved by Council members (Appendix PJ3, HPPC2), there is no evidence that the review has actually taken place. However, DWH contends [90] and the Council accepts [362] that a 5YHLS cannot be shown. For reasons that I will discuss later, that is also my conclusion. If then the development boundaries are rigidly applied through the operation of both policies they would restrict the supply of housing and frustrate the aim of Framework paragraph 47. The court has held that in those circumstances the weight that can be afforded to them is much reduced [117]. That is also the view of the Council and the reason for it with respect to policy RLP2 [367] and, by inference, policy CS5 [370].

446. That was also the view taken by the three Inspectors in the decisions referred to above [370]. I see no reason to take a different view given that circumstances are more or less unchanged. Therefore, while there is a conflict with the adopted development plan policies, overall those policies can attract only moderate weight when it comes to the overall planning balance.

447. For completeness, the wording of BNLP policy LPP 1 is set out above [35]. It is not materially different from policy CS5. For the reasons set out above [425 to 428] the weight that can be given to that policy is limited.

The effect of the development on the landscape character of the area and the visual impact that the development would have

Landscape character

448. In my view, it is necessary to take into account the way in which Hatfield Peverel has developed. The historic maps in Mr Handcock's evidence (Appendix A2, 3/APP) shows how Hatfield Peverel has evolved from a linear settlement focused on The Street, shown as the Roman Road on the 1874 map and part of the route linking London with Colchester. By 1955 the land between Church Road and Maldon Road to the south of The Street had begun to be developed as had land to the north of The Street between it and the railway. This pattern continued to 1980 as more and more edge-of-settlement fields and allotments became housing developments. The 1978-80 map shows the Gleneagles Way and Woodham Drive cul-de-sac developments extending the village into the countryside to the east beyond Maldon Road. By 2002, (the next map in the sequence provided) what is now the Stone Path Drive development had breached the Church Road boundary and taken the village onto yet more former allotments on its western flank.

449. Under cross examination by Ms Scott of the case for GDL Mr Holliday confirmed his view that as a result of this pattern of development the character of Hatfield Peverel had changed over the last 50 years or so from a linear settlement to a nucleated form and that the development proposed by GDL would simply continue that pattern and, by inference, be in keeping with what is now the character of the settlement. He rejected Ms Scott's suggestion that the Stone Path Drive development would be a complete departure from the settlement pattern. His view was that each time housing development has taken place on the edge of the village a field has been lost but there has been no further change to the character of the village; the GDL development proposed would be no different.

450. Mr Smith was not present when Mr Holliday gave this evidence. I summarised that evidence as being that the character of Hatfield Peverel was that of a fair-sized settlement in a rural setting and that, while the GDL development would extend the village into the countryside, that fundamental relationship between the village and its setting would not be altered. I asked Mr Smith if he agreed with Mr Holliday's assessment and whether it applied equally to the DWH development. Mr Smith agreed with Mr Holliday's assessment and confirmed that it was relevant to the consideration of the DWH application. In a further answer Mr Smith confirmed his view that the village had evolved over time through edge-of-settlement accretions of similar scale to each of the proposals before the Inquiry. Each would therefore simply continue that evolution.

451. This assessment is supported by Braintree Historic Environment Characterisation Project 2010 (CD28.1 set C). This report has been produced to assist ECC and the Council in the production of their development plans. It studies the historic landscape character, archaeological character and historic urban character and weaves the three strands together to establish the historic environment character. Discussing the Hatfield Peverel area (HLCA 13) it notes the historically dispersed settlement pattern with Hatfield Peverel being the only nucleated settlement of any size (emphasis added). The post-1950s boundary

loss '…can be described as moderate, however the overall grain of the historic landscape is still clearly visible.'

452. Furthermore, there are a number of studies that have had an assessment of the landscape capacity of various areas of land around the settlement edge to absorb further development as their broad purpose.

453. CD14.1 set B focuses on eight key settlements in the District. Its purpose is to assess the sensitivity and capacity around those settlements to accommodate new development. The application site lies within a study area (HP4) to the east of the settlement and to both sides of the A12.

454. From the analysis set out in summary form in Table 4.1 of the document it is clear that of the four study areas encircling the village this was the one that had the highest capacity to accommodate change without significant effects on landscape character. Contributory points in reaching this conclusion include the lack of distinctiveness along the settlement edge; the moderate contribution to the setting of eastern Hatfield Peverel and the wider landscape because of the enclosure provided by landform and peripheral vegetation; and the influence of the A12 which 'cuts through' the area and introduces movement and noise within the landscape thus reducing its overall sensitivity to change.

455. The Landscape Partnership prepared CD14.4 set B for the Council. This followed and built upon the earlier Chris Blandford Associates document (CD14.1 set B) and has the same broad objective for Hatfield Peverel but at a finer grain of analysis. As Mr Smith notes (paragraphs 83 and 84 DWH3), it did not investigate area HP4 further since this had already been found to have a higher overall potential to accommodate development than the other three study areas (paragraph 2.2, CD14.4 set B).

456. The Landscape Partnership also prepared the Hatfield Peverel Landscape Character Assessment for HPPC (CD28.3 set C). Its purpose is to assist 'the village' in commenting on development proposals coming forward and to support the emerging NDP. One of the aims is to provide an assessment of the landscape character and sensitivity of it around the village building on work undertaken at district level (paragraph 1.4). The application site is within local landscape character area 4 (Wickham Bishops Road – Upper valley slopes with pits/reservoirs). This area is less extensive than study area HP4 being confined to the south of the A12 although it does extend to include a small area of land further to the south east.

457. This study does not assess the capacity of the area to accommodate development. Rather, it sets out a general commentary about the characteristics of the landscape and some landscape guidelines which, on a fair reading, appear to assume development taking place to facilitate them.

458. Of relevance from the general commentary are the sharp transition between the existing residential fringes reflected in the linear garden boundary line of Gleneagles Way and Woodham Drive and the farmland beyond and the broad open views that are possible across the open arable farmland that characterises the area. Guidelines include tree belt planting along the northern boundary to provide a visual break to the A12, enhancement of the ecological value of the area through hedgerow retention and enhancement and safeguarding of open views across arable farmland towards the steep ridge at Wickham Bishops.

459. In my view the above document review demonstrates that the Council has been considering the potential for further edge-of-settlement development at Hatfield Peverel in accordance with the emerging or adopted spatial strategy since at least 2007. Indeed, as set out above [435] this was an explicit purpose of the SFE which states that such development was '…inevitable…' if the OAHN was to be met (paragraph 1.4 CD14.4 set B). The application site would extend the Gleneagles Way cul-de-sac development into what is the next field to the east and, moreover, into a modest part of a larger area that several studies have confirmed has the landscape character capacity to accommodate it subject to development guidelines being met. The Statement of Landscape Principles (ID46) demonstrates that those guidelines can be met. While not subject to a condition [421] it will be for the Council to take these into account at reserved matters stage; this is the expectation of the applicant [107].

460. That is not to say that the development would not have an adverse effect on landscape character. The submitted LVIA acknowledges this (Table D4 SAV16). These effects would however be limited to the loss of the gently sloping landform which would be replaced by a housing estate. That has both a physical effect in that a landscape feature would be lost and aesthetic/ perceptual effects all of which would be negative. They would nevertheless be very localised and largely contained to the site itself, particularly given the mitigation measures that would be put in place. At a wider regional and county level the loss of a small (in context) arable field would have a negligible effect on landscape character.

Visual impact

461. It seems to me that although the landscape character effects and visual impacts that the development would have are not clearly distinguished from one another, this is the nub of the HPPC case on this consideration [284 to 294].

462. During my visit to the area I walked all of the routes that I was invited to [1]. These are shown on HP 003A in the LVIA (SAV16) and on HP/EJS/01 (Appendix 2 DWH4) and allowed a complete circuit of the application site on public land.

463. The application site itself is an open arable field that is devoid of any feature of significance. Its value, in my judgement, is that it enables views across it. Those views will be interrupted by the development but the effect of that varies greatly depending on the viewpoint.

464. Views to the east in the direction of Witham across the site to the farmland beyond are available from a very limited number of places. Walking through the Gleneagles estate it is only possible to see between the houses to the application site when passing the entrances to the three culs-de-sac. Photograph 8 (ID13) shows the type of view that would be available; it is a glimpse only.

465. Photographs 2 and 4 (ID13) and viewpoint 9 (HP 012 SAV16) show views that are representative of those available towards or at the end of each cul-de-sac. They are not representative of the view obtained by people passing through the estate on foot, cycle or in a vehicle or by the vast majority of residents in their homes. Viewpoint 9A (HP 012 SAV16) appears to represent that view but it would only be available to those living at the very end of a cul-de-sac; that would be about six properties. Photographs 3, 5, 6 and 7 (ID13) may represent the view from the gardens of the properties at the ends of each cul-de-sac but, as they do not seem to have been taken from public land, I cannot be sure.

466. What is beyond dispute is that each of these views would be replaced by a view of housing. DWH correctly assess this effect to be 'major' and 'negative' at all assessment dates (Table E3 SAV16).

467. From all other viewpoints on public paths generally to the north, east and south of the application site the proposed development would not be the dominant feature in the view in my judgement.

468. It is only along a short length of the footpath adjacent to the A12 and the off-slip to the village that the application site adjoins a public path. At this point the development would be largely screened by existing planting as shown by representative viewpoint 10 (HP 013 SAV16).

469. From the other representative viewpoints 1, 2, 4, 5, 6, 7 and 8 (respectively HP004A & B, HP 005, HP 007, HP 08A & B, HP 009, HP010 and HP010 SAV16) one view is to the settlement edge of Gleneagles Way and Woodham Drive across the intervening farmland which would remain undisturbed. At points that view is in any event screened by existing planting as the SAV16 photographs show.

470. That is however only one view. As HP003A & B (SAV16) show, viewpoints 1, 4 and 5 are along a footpath that runs parallel to the application site but is separated from it by a further field. While the settlement edge is visible if the walker turns to look that way, turning the other way or looking in the direction of travel would give a view across open countryside. That is also the case from viewpoints 5, 6 and 7. Indeed, travelling north east is moving away from the application site which would be increasingly to the rear and thus not really in the normal view.

471. No evidence was given about the extent to which these paths are actually used. At the time of my site visit a woman was exercising a dog from the path running parallel to the application site and two lads were riding what looked like a trials bike across the fields around the point where the path turns south west towards the village. It is not clear to me how well used the path would be since the end-point is the path alongside the A12; an unpleasant walking experience in my view.

472. Photomontages have been produced to show how the development might look from certain viewpoints after the mitigation planting has become established (HP004A & B, HP008A & B). Taking those and my own observations into account, I consider the applicant's assessment that the visual effects from all these representative viewpoints would ultimately be minor/moderate at worst is fair.

Conclusion

473. There would be a localised adverse effect on the character of the landscape which DWH acknowledge [460]. That harm must, however, be seen in context.

474. Several studies have considered the capacity of the settlement-edge landscape to accommodate the additional development that would be 'inevitable' if the OAHN is to be delivered. The application site is part of an area that independent landscape professionals consider capable of accommodating that development subject to guidelines to mitigate the effects being put in place. At least one of those studies has been prepared for HPPC [456 and 457]; no alternative LVIA has been put in evidence by HPPC.

475. The application site is an arable field with no distinctive features. There is no reason in my view why the landscape principles set out in ID46 could not be achieved at reserved matters stage. While a new settlement edge would be created as a result of extending the existing residential edge the width of a field further into the countryside, all existing boundary trees and hedgerows would be retained and enhanced as appropriate. To the extent that these are distinctive landscape features there would be no detrimental impact upon them. As the new planting matures over time the development would, in my judgement, be successfully integrated into what is a settlement-edge landscape.

476. There would therefore be no conflict with the landscape elements of policy RLP 80.

477. It is only the third paragraph of policy CS8 that is relevant to this consideration. It is clear from the submitted LVIA and the evidence presented to the Inquiry that the applicant has had regard to the character of the landscape and its sensitivity to change. That is what the policy requires and that part is therefore satisfied. Whether the development would enhance the locally distinctive character of the landscape in accordance with the Landscape Character Assessment is a matter of judgement. Appendix 5 of the CS confirms that it is the 2007 study (CD14.1 set B) that is being referred to. In detail, that has been developed or superseded by later studies. In my view, the development would enhance the settlement edge as it appears as a feature in the landscape and thus this part of the policy would be complied with too.

478. Neither of these policies deals explicitly with the visual impact of proposed developments although these are the only two development plan policies that are referred to by HPPC as being breached in respect of this overall consideration [294]. I have found that there would be harm caused by the development with respect to visual impact although that would be limited to the occupiers of the properties along the three culs-de-sac off Gleneagles Way and, even then, mainly to those living at the end of each.

479. To the extent that weight can be attached to the policies of the emerging NDP [431] there would be conflict with policy HPE6 in this regard. However, in addition to the general point concerning progress on the NDP there are specific concerns about the evidence base that underpins the views to be protected and enhanced under policy HPE6 [101 to 103]. Mr Graham addresses this [252 to 259] but in my judgement there is some strength to Mr Tucker's case that this policy has been developed to frustrate development coming forward on the settlement edge [103]. This is nevertheless a matter properly for resolution through the NDP examination and, in any event, the impact and thus the conflict would be limited to a small number of adjoining residents and to users of certain footpaths pending the mitigation planting maturing. While this harm needs to be weighed in the overall balance, it attracts very limited weight in my view.

The effect of the development on community infrastructure

Education facilities

480. The concern relates only to primary school places and has been something of a moving feast as ECC, as education authority, has come to appreciate the full impact of planned and speculative development in Hatfield Peverel and the changing position over time with respect to school rolls (series of letters in CD21

set C). In my view, the SOCG (ID1.8) does not take things much further although the letter dated 1 September 2017 to Priti Patel MP from the ECC chief executive attached to it does. So does the helpful report from EFM that was prepared for GDL/DWH in response to my pre-Inquiry note (INSP1) and is appended to the proof of Mr Dixon (Appendix 8, DWH2).

481. The EFM report explains that estimating the numbers likely to be demanding a place at any particular school in future years is an inexact science. It is compounded, in the author's view, by the inherent contradiction between the duty placed upon education authorities to promote choice and variety of schools on the one hand and the Framework paragraph 38 requirement to locate, where practical, primary schools within walking distance of most properties on the other hand (report paragraph 27). The position in Hatfield Peverel is further complicated as the Council does not have a CIL charging schedule in place.

482. The letter is slightly opaque but, as I understand it, any one of the four residential developments listed in the letter could, in isolation, be accommodated without the need for additional primary school capacity. As two of the potential developments are allocated in the BNLP and the other two are this application scheme and whichever of the schemes put forward by GDL that is implemented (both cannot be), it is unlikely that only one scheme in isolation will come forward. Depending on the decisions made by the Secretary of State, all four could come forward.

483. Both the letter and the EFM report say that in that circumstance it is necessary to look more closely at where the children attending the Braintree Group 10 schools (Hatfield Peverel Infant, St Andrew's Junior and Terling CE Primary) actually live. It appears that some 35% live in the priority admissions areas of other schools but choose to be educated at one of those three named schools.

484. Given that the education authority has a duty to secure sufficient school places (and there is no evidence that it will not do so) the assumption is that this issue will resolve itself over time through the operation of the admissions policy. In short, in-catchment applications will always trump out-of-catchment applications (report paragraph 42) and, while no pupils will be displaced, over time more and more pupils in the Braintree Group 10 schools will come from Hatfield Peverel if that is their choice.

485. In evidence in chief Mr Dixon confirmed that his position on this matter did not differ from that of Mr Lee for GDL whose evidence he had heard. Mr Tucker further sets out the position in his closing submissions [131 and 132]. Mr Lee's position can perhaps be summarised best by his answer to my question when he confirmed that had ECC asked for a contribution to primary school provision it would have been paid. There is therefore no resistance from either GDL or DWH to addressing the issue. Although Mr Graham believes that ECC may have misdirected itself in respect of CIL Regulation 123(3) [276] the fact remains that its understanding of the pooling restriction prevented it from seeking any contributions from the applicant.

486. Nevertheless, while the situation settles down, and there is no indication as to how long that may take, Mr Lee accepted during cross examination by Ms Scott for SPMRG that there would be a short term impact which neither developer would be able to mitigate. That impact is most likely to manifest itself through additional journeys to school, either by bus or private car. In my judgement it is

very unlikely that any pupils would walk to schools in Witham. The walk is by the A12 and unpleasant in my view and likely to be perceived as dangerous even if, in fact, it is not.

Health facilities

487. On this topic too DWH effectively adopts the position of GDL since, once again, in evidence in chief Mr Dixon confirmed that his position did not differ from that of Mr Lee. The consultation response from NHS England is not available but its contents are summarised in the report to Committee (SAV38). The consultation responses by NHS England to the GDL schemes have been submitted in evidence and have the 'feel' of a template letter (CD3.16 set A and CD4.11 set B). At paragraph 5.1 of the response to the 80 dwelling scheme it says that the development would give rise to a need for improvements to capacity by way of 'extension, refurbishment or reconfiguration at the Laurels surgery'. The terms used in the definition of the 'healthcare contribution' in the s106 Obligation [415] are 'extension or reconfiguration of the Sydney House surgery'.

488. It is clear in my view that the impact of the development and the contribution sought to mitigate it is established purely in terms of the need for additional floor space generated. Unchallenged evidence was given by Mr Renow to the effect that Sydney House could not be physically expanded [272]. GDL's response, which has been adopted by DWH, was that capacity can be increased without necessarily having to physically expand the building and could be achieved by, for example, internal alterations.

489. However, a letter from the Practice Manager is somewhat confusing as to what is meant by 'capacity' (CD20.1 set C). One reading is that it is the number of medical staff available that is the issue, not the physical space available. Not only is the concern expressed that the contribution would not be spent by NHS England at that surgery (clearly wrong given the terms of the Obligation) but that it was not recurrent funding. That is suggestive of the concern locally not being one of space constraints.

Conclusion

490. CS policy CS11 says, in essence, that the Council will work with partners, service delivery organisations and developers to provide required infrastructure services and facilities in a variety of functional and service areas that include education and health. Provision is to be funded through among other things, planning obligations and CIL. In the absence of the latter, the Council is reliant in this case on planning obligations.

491. The evidence suggests that there may be some short term harm in terms of additional journeys to schools while a new equilibrium is established in the primary education sector. It may well be that what appear to be current capacity issues at the surgery may be exacerbated if, as HPPC contend (and SPMRG made the same point), the surgery cannot be physically expanded and that is, as NHS England would appear to believe, actually the issue.

492. However, having identified those concerns it must be acknowledged that DWH has obligated to make all the contributions that have been requested to mitigate any effect from the application scheme. In my view, a finding of conflict with policy CS11 in those circumstances would not be appropriate.

Whether the development would erode the gap between Hatfield Peverel and Witham

493. Coalescence of settlements is not a matter that is addressed by any adopted development plan policy. It is addressed by emerging BNLP policy LPP 72 [38] and emerging NDP policy HPE1 [41]. Strictly therefore, this matter has 'material planning consideration' status.

494. The straightforward answer to the question is 'yes' because, as a matter of fact, the development proposed would extend the built development of the village into the open countryside between the two settlements by the width of a field. As a matter of fact there would therefore be a conflict with emerging NDP policy HPE1 as the application site is within the area designated as a green wedge.

495. The key issue that this policy is drafted to address is to prevent the encroachment of the nearest town, Witham and the merging of Hatfield Peverel and Nounsley to protect the uniqueness and separation of these settlements (page 24 CD16.3 set C) (emphasis added). The objectives are to prevent coalescence between Hatfield Peverel and each of the others.

496. However, it is again a matter of fact that Witham is being extended on its southern/south eastern boundary as a result of planned development. Development of the town is therefore eroding the gap. BNLP policy LPP 71 does propose a green buffer for Witham but not between Witham and Hatfield Peverel (CD16.2 set C). As a matter of policy therefore it would appear that the Council does not agree with HPPC that this is a matter of concern that should be addressed through the development plan. I give very little weight to the views of an officer of the Council in this respect [99, 373 and 374].

497. The key issue that policy HPE1 is drafted to address emerged from the October 2015 Residents Survey (paragraph 9.2 HPPC1) with the outcome being shown graphically in Appendix MR29 (HPPC1). In my view there is a significant issue with the way the question that prompted this outcome is framed and the response rate is therefore hardly a surprise.

498. There is a further issue in my view with the extent of the green wedge identified. It falls far short of the NDP Designated Area Boundary (page 5 CD16.3 set C) and, in fact, leaves most of the area between Hatfield Peverel and Witham unprotected by the policy. That can be contrasted with the green wedge between Hatfield Peverel and Nounsley which seems to include almost the whole of the gap. If confirmed in the NDP as now drafted and illustrated on the map, it is not clear to me how the policy will achieve the retention of the kind of gap that HPPC considered to be required to maintain adequate separation [281].

499. However, both of these points will be for the appointed examiner if she considers them to be material.

500. In that context, I have already noted that this policy is subject to objection [431]. The weight that can be given to the policy is again a matter of dispute between DWH [94 to 100] and HPPC [260 to 265]. My view on the weight that can be given to the NDP and therefore the 'in principle' conflict with policy HPE1 is set out above [431]; it is very limited weight (also broadly the view of the Council [374]) but it remains a material consideration.

501. Mr Smith addressed this issue by reference to what have become known as the Eastleigh principles (section 5 DWH3). His analysis was not subject to substantive challenge [104]. My note simply records an agreement by Mr Smith that physically the gap would be eroded slightly and a further answer on the sense of leaving a place in which he disagreed with Mr Graham's example of moving within the urban area of London but nevertheless leaving one distinctive area and arriving in another.

502. In my judgement the A12 is a very significant factor in the sense of leaving Hatfield Peverel and arriving in Witham. I do not believe that it is possible to walk between the two on the shorter route without travelling alongside the A12 for some distance. The quickest route by road both ways requires travel actually along the A12 albeit for a short distance. Therefore in my judgement the A12 would remain a very significant physical and psychological barrier between the two settlements and would continue to give a sense of separation even if the actual separation was less than it is now.

503. Furthermore, there is no inter-visibility between the two settlements because of the intervening ridge (sections 5.3 and 5.8 DWH3). This can be seen on HP/EJS/03 (Appendix 2 DWH4) and is, as I saw for myself, even clearer on the ground.

504. In my judgement, the loss of the field to residential development would have no perceptible effect on the effective gap between Hatfield Peverel and Witham. That was also the view of the Council when considering the application (page 87 SAV38).

Loss of best and most versatile agricultural land

505. Although Mr Dixon confirmed in evidence that no invasive survey had been undertaken to establish the agricultural land classification of the application site he was content to proceed on the basis that is was grade 2 and thus best and most versatile agricultural land. This was because '…in North Essex you don't bother to look because it all is.'

506. That, in essence, was the advice given by the Council's officers in the report to members on the application (page 85 SAV38).

507. The relevant part of policy CS8 simply states that development should protect the best and most versatile agricultural land; the application proposal would not do so. Mr Dixon considers that this part of the policy is inconsistent with Framework paragraph 112 (paragraph 6.45 DWH1) and that would also appear to be the view of the Council officers as they quote the Framework paragraph in full before reminding Members that since most of this part of Essex is land of that quality the loss of the application site to development would not be a sufficient basis for resisting the application.

508. Whether or not the application proposal amounts to significant development of agricultural land is a matter for debate since the term 'significant' in this context is not defined in the Framework. However, what does seem clear is that if development is to take place in accordance with the spatial strategy to direct future development to the A12/Great Eastern Mainline corridor (among other places), there would be little opportunity to use areas of poorer quality

agricultural land since it is not widely present. In my judgement, the application would not conflict with Framework paragraph 112.

509. In my judgement policy CS8 is inconsistent with the Framework in this respect since it does not permit the more considered analysis inherent in the Framework to be undertaken. Applying Framework paragraph 215, I consider limited weight should be given to the conflict with policy CS8.

Conclusion - The extent to which the proposed development is consistent with the development plan for the area

510. I have concluded that the development would accord with the spatial strategy [437]; would not conflict with policy RLP 80 [476] or policy CS8 [477]; and would not conflict with policy CS11 [492]. There would be some visual impact from the development [478]. However, the harm would be limited and very localised in effect. Moreover, this matter does not appear to be subject of a relevant adopted development plan policy. With respect to best and most versatile agricultural land take I do not consider there to be any conflict with Framework paragraph 112 which has greater weight than CS policy CS8 which is inconsistent with its provisions [508 and 509]

511. The sole conflict that I have identified with the development plan is that with policies RLP 2 and CS5. The conflict arises because the application site lies adjacent to but beyond the development boundary of the village. For the reasons set out the weight that should be attributed to this conflict is moderate [438 to 446].

Five year housing land supply

Background

512. For the purposes of the Inquiry there is no challenge to the Council's assessed OAHN of 716 dwellings per annum [64]. The requirement side of the equation is therefore accepted and the focus of the debate is on the extent to which that requirement can be met over the five year period by the supply of specific deliverable sites.

513. Again, for the purposes of this Inquiry only, the Council accepts the 'Sedgefield' method to deal with the shortfall [351 and 352]. It does not agree with GDL/DWH that there has been persistent past under delivery of housing and does not therefore agree that a 20% buffer should be applied [353 to 357]. On supply there is an immaterial difference between the Council and GDL/DWH of 68 dwellings [358].

514. The final and agreed position is that there would be a 3.4 years' supply (GDL/DWH – Sedgefield+20%) or 3.9 years' (Council – Sedgefield+5%) (Appendix 3 ID37). It was agreed during the Inquiry when I summarised my understanding of the position that this was not close enough to 5 years for the Secretary of State to give anything other than substantial weight to the shortfall. However, as it was not possible on even the most favourable assumptions to get below 3 years, GDL/DWH accepted the implications of the Written Ministerial Statement on Neighbourhood Planning if the NDP passed a referendum before the Secretary of State determined the application.

515. In those circumstances it is not necessary to resolve the small difference between the Council and GDL/DWH.

516. HPPC [170] and SPMRG do not agree with this and suggest that there is a 5YHLS. They contend that the 'Liverpool' approach should be used to deal with the shortfall and that the buffer should be 5%. However, as is clear from the SOCG (Appendix 3, ID 37) that alone is not enough to show a 5YHLS. It also requires most, if not all, of the additional supply sites first mentioned by SPMRG during the round table discussion and then confirmed in writing (ID21) to be 'deliverable' within the meaning of Framework footnote 11.

Supply of deliverable sites

517. Except for Mr Tucker's criticism of Mr Graham's specific interpretation of *St Modwen* regarding the term 'realistic' [61], it appears to be agreed between the parties that whether a site is deliverable or not is determined by the ordinary and everyday meaning of the words in Framework footnote 11 and not on the planning status of the site in question. It is in that context that GDL/DWH/the Council have reviewed and commented upon (ID 37) the sites put forward by SPMRG (ID21). ID37 is dated 21 December 2017, the final day of the Inquiry sessions. Ms Scott's first and only opportunity to respond was through her closing submissions although what she says [332 and 333] is, in fact, taken into account in ID37.

518. Appendix 1 to ID37 sets out in detail the positions of both GDL/DWH and the Council in respect of each site. None has planning permission and only three are subject of planning applications. A number are subject of objections and until these are resolved through the BNLP examination they must be considered uncertain notwithstanding their allocation in the draft BNLP. Furthermore, some are owned or part owned by the Council. The mechanism by which they will be developed has yet to be confirmed by the Council and they cannot be considered as available now.

519. Ms Scott puts the additional sites suggested by SPMRG as adding a further 461 dwellings to the supply [328]. In only challenging ID37 in respect of two sites (Sorrell's Field and Gimsons), it must be assumed that SPMRG accept the case made on the others. Even if the SPMRG response to ID37 is agreed, GDL/DWH/the Council say that it adds only about 25 units net to the supply. They further contend that this additional supply makes no material difference to the 5YHLS position.

520. In my view that must be correct. However, the extent of the shortfall below 5 years may still be material and it is therefore necessary to consider the next most significant factor which is whether 'Sedgefield' or 'Liverpool' is the appropriate approach to take to dealing with the shortfall.

Sedgefield or Liverpool?

521. The shortfall arises because the OAHN has been applied, as it should be, from the start of the plan period in 2013 but the plan itself, the strategy and the allocations to deliver it are not yet approved and planned delivery is thus delayed. I appreciate that some of the developments that may come forward as a result of the adoption of the submitted BNLP may do so towards the latter part of the period. That may well be an argument for the Liverpool approach and is

likely to be put by the Council to the examining Inspector. However, that is all for the future and the shortfall exists now. Although Ms Scott argues that the BNLP is now far more advanced than when Inspectors Hill and Gregory considered their respective appeals [321], in practice that is not so as she implicitly acknowledges ('although plainly the Plan has yet to make it through examination').

522. The PPG is quite clear that Sedgefield should be preferred unless there are sound reasons for not doing so. The case made by SPMRG that the Council is simply not able to deliver housing in the numbers required following the Sedgefield approach [318] is attractive at first sight. However, there is no analysis as to why that has not been the case in the past (is it lack of market demand, lack of available sites, lack of planning permissions being granted against a former development plan requirement?) so the past is not necessarily a guide to the future performance. In any event, even an under-shoot would still make up some of the shortfall.

523. The approach advocated by HPPC [159 to 164] makes the plan strategy point referred to above and, referring to *Bloor Homes* (ID61), argues that it is a matter of judgement for the decision taker.

524. In my judgement there has been no material change in circumstances since my colleagues determined the Coggeshall and Steeple Bumpstead appeals. They both concluded that Sedgefield was the appropriate approach to adopt and this has influenced the Council's acceptance of that for the purposes of this Inquiry [350]. There is no cogent evidence before this Inquiry to take a different view.

Conclusion

525. As Mr Tucker put it [84], in order for HPPC and SPMRG to get the 5YHLS 'over the line' all the stars must align. The evidence shows that when the assessed supply of deliverable sites is taken into account and the Sedgefield approach is applied it makes no material difference whether it is 5% or 20% that is applied as the buffer. On either, the best that can be achieved is still less than 4 years' supply.

Framework Paragraphs 49, 14 and the 'tilted balance'

526. In the circumstances that I have just found Framework paragraph 49 is clear that relevant policies for the supply of housing should not be considered up to date. In turn, that means Framework paragraph 14 is engaged. Planning permission should be granted unless either of the limbs of Framework paragraph bullet 4 indicates that the tilted balance should be dis-applied.

527. It is not part of HPPC's case as I understand it that there is any conflict with a policy in either the development plan or the Framework that can be construed as falling within the scope of Framework footnote 9. The tilted balance is not therefore dis-applied by virtue of the second limb of Framework paragraph 14 bullet 4.

528. Turning now to the first limb, the harms that I have identified are set out above [510 and 511] with the conflict with development plan polices identified where appropriate. The totality of the harm or adverse impacts is limited and localised and restricted to visual impact and an 'in principle' conflict with the two development boundary policies. The benefits are set out by Mr Dixon under the

'economic', 'social' and 'environmental' headings found in Framework paragraph 7 (section 8 DWH1). In fairness, Mrs Jarvis for HPPC acknowledges many of these benefits and confirms that appropriate weight should be given to many, including significant weight to the provision of market and affordable housing and economic benefits (paragraphs 6.33 to 6.38 HPPC2). In my judgement that is correct. The limited adverse impacts of the proposal are some distance from significantly and demonstrably outweighing those benefits. Accordingly, I do not consider the first limb dis-applies the tilted balance either.

529. To conclude on this consideration, the tilted balance set out in Framework paragraph 14 applies in this case and is a material consideration that should be given substantial weight in the planning balance.

The planning balance

The development plan

530. The application proposal would conflict with the policies of the development plan. The application site is beyond the development boundary of Hatfield Peverel and it is not a use appropriate to the countryside. There is a conflict therefore with policies RLP 2 and CS5 which attracts moderate weight in the balance [511]. I do not consider there to be any other conflict with the development plan.

531. The application should therefore be determined in accordance with the development plan unless material considerations indicate otherwise. In this case there are a significant number of material considerations to take into account.

Material considerations against the development

Visual impact

532. In my understanding, the effect on landscape character and visual impact are two separate, but related, issues although they are usually considered in a single LVIA. My conclusion on landscape character is part of my assessment of the development against the policies of the development plan.

533. In relation to visual impact, I conclude that there would be some harm caused [478 to 479]. However, that would be limited, affecting very few residential occupiers and users of certain public paths only pending the maturing of mitigation planting. Although I agree with DWH's categorisation of the scale of adverse effect, the harm caused is limited and localised. Given my conclusions on the weight that should be given to the emerging NDP [431] any conflict with emerging policy HPE6 on this consideration can only be given very limited weight, particularly as this is a policy that is subject to objection from GDL and possibly others although there is no evidence about that.

Material considerations in favour of the development

Tilted balance

534. I have concluded that the Council cannot show a 5YHLS [525]. Moreover, at less than 4 years' supply, the shortfall is of some significance. In these circumstances Framework paragraph 14 is engaged by virtue of Framework paragraph 49. There is no reason why the tilted balance should be dis-applied [527 and 528] and I consider that it should attract substantial weight [529].

Housing delivery

535. There is no reason to suppose that the proposal would not deliver a high quality development that includes a mix of market and affordable housing [420 and 422].

536. Mr Graham has raised a concern about housing delivery [295]. What he says accords with my note of Mr Dixon's evidence in chief which Mr Tucker draws upon [135]. This is a dispute between the parties with little firm evidence before the Inquiry to allow a resolution. However, Framework footnote 11 is clear that sites with planning permission (which, as not excluded, must include outline planning permission) should be considered deliverable unless there is clear evidence (examples are set out) to the contrary. In this case at this point in time there is no such evidence. It must be assumed therefore that the whole site could be developed within five years. It is also noteworthy in this context that suggested condition 2 reduces to two years the period within which the reserved matters applications must be submitted. There is no reason therefore not to afford some weight to the delivery of housing over the five year period.

Spatial strategy

537. Notwithstanding any conflict with the development plan arising from the position of the village development boundary, the application proposal would accord with the longstanding and continuing spatial strategy for the area [437]. That attracts some weight in the balance.

Economic, social and environmental benefits

538. These are the three dimensions of sustainable development set out in Framework paragraph 7. The applicant's assessment of each is set out by Mr Dixon (section 8, DWH1).

539. Although not quantified, a range of positive economic benefits are claimed which include an enlarged labour force of economically active residents; extra household spending in the local area and thus improved viability and vitality of local services and facilities; direct support for additional employment in the local area arising from that additional demand; investment in construction and support for construction jobs; New Homes Bonus for local investment; and increased council tax revenues.

540. While it is reasonable to assume that 120 homes will generate additional spending power, there is no evidence in my view to support the contention that this will be spent to the benefit of local businesses and services. However, there is nothing in the Framework to suggest that the economic benefit of a development must be enjoyed by the area in which the development is located to meet this objective. I therefore consider that some weight should be attributed to this set of benefits.

541. I have already accounted for the delivery of a mix of affordable and market housing in the planning balance. The other social benefits claimed are social infrastructure and transport.

542. Under social infrastructure the applicant includes provisions to mitigate the impact of the development on community facilities. First, I do not believe that providing mitigation of a harm that would be caused can be counted as a benefit;

at best it has a neutral effect in the balance. Second, in this case, I do not consider the harm to education and health infrastructure will be mitigated [491]. Nevertheless, I do not consider that there can be a conflict with the development plan policy since DWH has obligated to provide all the contributions sought by the service providers [492].

543. Also included under this heading is the provision of safe access routes to the application site. I accept that some of these measures will be of wider benefit but they arise principally to mitigate what the applicant sees as a potential harm arising from the development taking place.

544. I therefore conclude that very little weight should be attributed to the social benefits claimed.

545. Most of the paragraphs set out under the environmental benefits heading by the applicant in fact explain how the proposal would accord with the policies of the development plan. Such considerations do not amount to benefits in my view.

546. Also claimed are new tree and hedge planting and the creation of additional ecological habitat. I note that in reporting to members on the application, Council officers recognised the potential to add to the ecological value of the site (page 89 SAV38). However, most of the required schemes still need to be worked up and approved [402]. I therefore afford limited weight to this benefit.

Conclusion

547. In my view the conflict with the development plan, which attracts moderate weight applying Framework paragraph 216, and the single material consideration that weighs in favour of determining the application in accordance with it are significantly outweighed by those that indicate it should be determined other than in accordance with the development plan. In my judgement the application represents sustainable development as defined in the Framework and planning permission should be granted.

Recommendation

File Ref: APP/Z1510/V/17/3180729

548. I recommend that planning permission be granted subject to conditions.

Annex C

Suggested Conditions

1) Details of the appearance, landscaping, layout, and scale, (hereinafter called "the reserved matters") shall be submitted to and approved in writing by the local planning authority before any development takes place and the development shall be carried out as approved.

2) Application for approval of the reserved matters shall be made to the local planning authority not later than 2 years from the date of this permission.

3) The development hereby permitted shall take place not later than 2 years from the date of approval of the last of the reserved matters to be approved.

4) The submission of reserved matters applications pursuant to this outline planning permission shall together provide for no more than 120 dwellings, parking, public open space, landscaping, surface water attenuation and associated infrastructure and demonstrate compliance with the approved plans listed below and broad compliance with the approved plans listed below:
Approved Plans:

Location Plan:	1296/01 FINAL
Access Details:	45604-P-SK205

5) Prior to first occupation of the development hereby permitted the provision of the following works shall have been completed, details of which shall have been submitted to and approved in writing by the local planning authority prior to implementation:
- The access to the application site shown in principle on drawing 45604-P-SK205
- The cycle/pedestrian access between Gleneagles Way and Glebefield Road as shown in principle on Drawing 45604-P-SK200
- Improved no entry signage at the end of the A12 southbound off-slip for drivers on The Street, plus improved speed limit signs and road markings for drivers leaving the A12 as show in principle on Drawing 45604-P-SK202
- Improvements to the visibility splay from Gleneagles Way towards the A12 southbound off-slip shown on Drawing 45604-P-SK20 to include trimming/removal of vegetation/trees, relocation/replacement of signs/street furniture/lamp column(s), regrading/hardening of highway land.
- A footway and (A12) road signage improvements at The Street/A12 north bound on-slip junction as shown in principle on Drawing 45604-P-SK201.
- Improvements to the (A12) road signage, kerb alignment and road markings at The Street/Maldon Road as shown in principle on Drawing 45604-P-SK201.
- The provision of dropped kerbs and associated works where the footway from Hatfield Peverel to Witham crosses the A12 northbound on-slip to the south of the Petrol Filling Station (former Lynfield Motors site), Hatfield Road, Witham.
- The provision of a zebra crossing on B1019 Maldon Road in the approximate position shown on Drawing 45604-P-SK207

6) No building erected on the site shall exceed two storeys in height or have a maximum ridge height of more than 9 metres.

7) Any Reserved Matters application relating to scale or layout shall be accompanied by full details of the finished levels, above ordnance datum, of the ground floor(s) of the proposed building(s), in relation to existing ground levels.

   The details shall be provided in the form of site plans showing sections across the site at regular intervals with the finished floor levels of all proposed buildings and adjoining buildings. The development shall be carried out in accordance with the approved levels.

8) Together with any submission of reserved matters, details of sound insulation measures must be submitted to and approved in writing by the local planning authority. The details must demonstrate that internal noise levels do not exceed 35 dB LAeq 16 hour in living rooms during the daytime (07:00 - 23:00) and also do not exceed 30 dB LAeq 8 hour in bedrooms during the night-time period (23:00 - 07:00) as set out in BS 8233: 2014. In addition, the details must demonstrate that maximum night-time noise levels in bedrooms should not exceed 42 dB LAmax more than 10 to 15 times per night. The development must be carried out in accordance with the approved details.

9) Together with any submission of reserved matters, details of the proposed boundary mitigation (noise barrier) must be submitted to and approved in writing by the local planning authority. The details must demonstrate that external noise levels will not exceed 55 dB LAeq 16 hour in any of the private residential gardens. The development must be carried out in accordance with the approved details.

10) Prior to the commencement of development hereby permitted, a wildlife protection plan shall be submitted and approved by the local planning authority identifying appropriate measures for the safeguarding of protected species and their habitats within that Phase. The plan shall include:

    i) an appropriate scale plan showing protection zones where any construction activities are restricted and where protective measures will be installed or implemented;

    ii) details of protective measures (both physical measures and sensitive working practices) to avoid impacts during construction;

    iii) details of how development work will be planned to mitigate potential impacts on protected species, as informed by the project ecologist;

    iv) a person responsible for:

        a) compliance with legal consents relating to nature conservation;

        b) compliance with planning conditions relating to nature conservation;

        c) installation of physical protection measures during construction;

        d) implementation of sensitive working practices during construction;

e) regular inspection and maintenance of physical protection measures and monitoring of working practices during construction; and

f) provision of training and information about the importance of "Wildlife Protection Zones" to all construction personnel on site.

All construction activities shall be implemented in accordance with the approved details and timing of the plan unless otherwise approved in writing by the local planning authority.

11) Any Reserved Matters application relating to landscaping as required by Condition 1 of this permission shall incorporate for the written approval of the local planning authority a detailed specification of hard and soft landscaping works for each phase of the development. This shall include plant/tree types and sizes, plant numbers and distances, soil specification, seeding and turfing treatment, colour and type of material for all hard surface areas and method of laying, refuse storage, signs and lighting. The scheme and details shall be implemented as approved. The scheme and details shall provide for the following:

All areas of hardstanding shall be constructed using porous materials laid on a permeable base.

All planting, seeding or turfing contained in the approved details of the landscaping scheme shall be carried out in phases to be agreed as part of that scheme by the local planning authority.

Prior to the occupation of each dwelling, the hardstanding associated with that dwelling shall be fully laid out.

Any trees or plants which die, are removed, or become seriously damaged or diseased within a period of 5 years from the completion of the development, shall be replaced in the next planting season with others of a similar size and species.

Any Reserved Matters application relating to landscaping shall be accompanied by cross section drawings showing the relative heights of the proposed dwellings in association with landscape features.

12) No development shall commence, including any groundworks, until a Construction Method Statement has been submitted to, and approved in writing by the local planning authority. The Statement shall be implemented as approved. The Statement shall provide for:

- Safe access to/from the site including details of any temporary haul routes and the means by which these will be closed off following the completion of the construction of the development;

- The parking of vehicles of site operatives and visitors;

- The loading and unloading of plant and materials;

- The storage of plant and materials used in constructing the development;

- The erection and maintenance of security hoarding including decorative displays and facilities for public viewing, where appropriate;

- Wheel washing facilities;

- Measures to control the emission of dust and dirt during construction;

- A scheme for recycling/disposing of waste resulting from demolition and construction works.

- A scheme to control noise and vibration during the construction phase

- Provision of a dedicated telephone number(s) for members of the public to raise concerns/complaints, and a strategy for pre-warning residents of noisy activities/sensitive working hours.

13) Demolition or construction works, including starting of machinery and delivery to and removal of materials from the site shall take place only between 08.00 hours and 18.00 hours on Monday to Friday; 08.00 hours to 13.00 hours on Saturday; and shall not take place at any time on Sundays or on Bank or Public Holidays.

14) Details of any proposed external lighting to the site for each phase of the development shall be submitted to, and approved in writing by, the local planning authority as part of any Reserved Matters application. The details shall include a layout plan with beam orientation and a schedule of equipment in the design (luminaire type, mounting height, aiming angles, luminaire profiles and energy efficiency measures). For the avoidance of doubt the details shall also:

- identify those areas/features on site that are particularly sensitive for bats and that are likely to cause disturbance in or around their breeding sites and resting places or along important routes used to access key areas of their territory, for example, for foraging; and

- show how and where external lighting will be installed (through the provision of appropriate lighting contour plans and technical specifications) so that it can be clearly demonstrated that areas to be lit will not disturb or prevent the above species using their territory or having access to their breeding sites and resting places.

All lighting shall be installed, maintained and operated in accordance with the approved details.

15) No piling shall be undertaken on the site in connection with the construction of the development until details of a system of piling and resultant noise and vibration levels has been submitted to and approved in writing by the local planning authority. The approved details shall be adhered to throughout the construction process.

16) No development or preliminary groundworks shall commence until a programme of archaeological evaluation has been secured and undertaken in accordance with a written scheme of investigation which has been submitted to and approved in writing by the local planning authority.

A mitigation strategy detailing the excavation/preservation strategy shall be submitted to the local planning authority following completion of the programme of archaeological evaluation as approved within the written scheme of investigation.

No development or preliminary groundworks shall commence on those areas containing archaeological deposits until the satisfactory completion of fieldwork, as detailed in the mitigation strategy, and which has been approved in writing by the local planning authority.

Within 6 months of the completion of fieldwork a post-excavation assessment shall be submitted to the local planning authority. . This will result in the completion of post-excavation analysis, preparation of a full site archive and report ready for deposition at the local museum and submission of a publication report.

17) No development shall commence until a detailed surface water drainage scheme for the site, based on sustainable drainage principles and an assessment of the hydrological and hydro geological context of the development, has been submitted to and approved in writing by the local planning authority. The approved scheme shall subsequently be implemented prior to occupation.

The scheme shall include but not be limited to:

- Limiting discharge rate to 1.25l/s/ha;

- Providing sufficient storage to manage the 1 in 100 year + 40% climate change storm event on site with no flooding of the formal drainage system during the 1 in 30 year event. Provide sufficient storage so that no flooding will occur during the 1 in 30 year event in the case of pump failure;

- Provide adequate treatment across all elements of the development.

18) No development shall commence until a Maintenance Plan detailing the maintenance arrangements for each phase of the development, including who is responsible for different elements of the surface water drainage system and the maintenance activities/frequencies, has been submitted to and approved in writing by the local planning authority. The Maintenance Plan shall be implemented as approved.

The applicant or any successor in title or adopting authority shall maintain yearly logs of maintenance which shall be carried out in accordance with any approved Maintenance Plan for each phase of the development. These shall be available for inspection upon a request by the local planning authority.

19) No development shall commence until a scheme to minimise the risk of offsite flooding caused by surface water run-off and groundwater during construction works has been submitted to and approved in writing by the local planning authority. The scheme shall be implemented as approved.

20) No development shall commence until a foul water strategy has been submitted to and approved in writing by the local planning authority. No dwellings shall be occupied until the works have been carried out in accordance with the foul water strategy so approved unless otherwise approved in writing by the local planning authority.

21) As part of the submission of the first reserved matters application as detailed within Condition 1, an Arboricultural Method Statement (AMS) shall be submitted and approved in writing by the local planning authority. The AMS will include a Detailed Tree Protection Plan (DTPP) indicating retained trees, trees to be removed, the precise location and design of protective barriers and ground protection, service routing and specifications, areas designated for structural landscaping to be protected and suitable space for access, site storage and other construction related facilities. The AMS and DTPP shall include details of the appointment of a suitably qualified Project Arboricultural Consultant who will be responsible for monitoring the implementation of the approved DTPP, along with details of how they propose to monitor the site (to include frequency of visits; and key works which will need to be monitored) and how they will record their monitoring and supervision of the site.

    The development shall be carried out in accordance with the approved details.

    Following each site inspection during the construction period the Project Arboricultural Consultant shall submit a short report to the local planning authority.

    The approved means of protection shall be installed prior to the commencement of any building, engineering works or other activities within that Phase of the development and shall remain in place until after the completion of the development.

    The local planning authority shall be notified in writing at least 5 working days prior to the commencement of development on site.

22) No above ground works shall commence in the relevant phase of the development until details of the location of refuse bins, recycling materials storage areas and collection points shall be submitted to and approved in writing by the local planning authority. The development shall be implemented in accordance with the approved details prior to the first occupation of each respective unit of the development and thereafter so retained.

23) No clearance of trees, shrubs or hedges in preparation for (or during the course of) development shall take place during the bird nesting season (March - August inclusive) unless a bird nesting survey has been submitted to and approved in writing by the local planning authority to establish whether the site is utilised for bird nesting. Should the survey reveal the

presence of any nesting species, then no development shall take place within those areas identified as being used for nesting during the period specified above.

24) Prior to the commencement of above ground construction of the relevant phase of the development details of a scheme for the provision of nest and roost sites for birds and bats shall be submitted to and approved in writing by the local planning authority. Development shall be implemented in accordance with the approved details prior to the first occupation of the dwellinghouses and thereafter so retained.

25) Prior to submission of the first application for Reserved Matters pursuant to this planning permission an updated survey of the application site will have been carried out by a suitably qualified and experienced ecologist to investigate the potential presence on the application site of badgers, bats, reptiles and Great Crested Newts.

Details of the methodology, findings and conclusions of the survey shall be submitted to the local planning authority for approval as part of the first application for Reserved Matters pursuant to this planning permission.

26) In the event that development is not commenced (or, having commenced, is suspended for more than 12 months) within three years of the planning consent, further surveys for Great Crested Newts as necessary shall be undertaken of all suitable ponds within 500 metres of the application site. Details of the methodology, findings and conclusions of the survey shall be submitted to the local planning authority within 8 months of the completion of the survey and a mitigation/compensation scheme, if required shall be provided for approval prior to the commencement of development. Mitigation/compensation works shall be carried out in accordance with the approved scheme.

27) Prior to the submission of the first reserved matters application, details must be submitted to demonstrate that ambient concentrations of nitrogen dioxide will not exceed the UK annual mean objective concentration of 40µg/m3 at any residential property location within the development.

28) Prior to first occupation of the development hereby approved, the Developer shall be responsible for the provision and implementation of a Residents' Travel Information Pack for sustainable transport, approved by the local planning authority, (to include six one day travel vouchers for use with the relevant local public transport operator).

29) Prior to the first occupation of the development hereby permitted the overhead electricity cables crossing the site east /west shall be diverted underground.

30) No above ground development shall commence in the relevant phase of the development until a schedule and samples of the materials to be used on the external finishes have been submitted to and approved in writing by the local planning authority. The development shall only be implemented in accordance with the approved details.

31) Prior to first occupation of the relevant phase of the development, details of all gates / fences / walls or other means of enclosure within the relevant phase of the development shall be submitted to and approved in writing by the local planning authority. The details shall include position, design,

height and materials of the enclosures. The enclosures as approved shall be provided prior to the occupation of the relevant plot.

Ministry of Housing, Communities & Local Government

RIGHT TO CHALLENGE THE DECISION IN THE HIGH COURT

These notes are provided for guidance only and apply only to challenges under the legislation specified. If you require further advice on making any High Court challenge, or making an application for Judicial Review, you should consult a solicitor or other advisor or contact the Crown Office at the Royal Courts of Justice, Queens Bench Division, Strand,London,WC2 2LL (0207 947 6000).

The attached decision is final unless it is successfully challenged in the Courts. The Secretary of State cannot amend or interpret the decision. It may be redetermined by the Secretary of State only if the decision is quashed by the Courts. However, if it is redetermined, it does not necessarily follow that the original decision will be reversed.

SECTION 1: PLANNING APPEALS AND CALLED-IN PLANNING APPLICATIONS

The decision may be challenged by making an application for permission to the High Court under section 288 of the Town and Country Planning Act 1990 (the TCP Act).

Challenges under Section 288 of the TCP Act
With the permission of the High Court under section 288 of the TCP Act, decisions on called-in applications under section 77 of the TCP Act (planning), appeals under section 78 (planning) may be challenged. Any person aggrieved by the decision may question the validity of the decision on the grounds that it is not within the powers of the Act or that any of the relevant requirements have not been complied with in relation to the decision. An application for leave under this section must be made within six weeks from the day after the date of the decision.

SECTION 2: ENFORCEMENT APPEALS

Challenges under Section 289 of the TCP Act
Decisions on recovered enforcement appeals under all grounds can be challenged under section 289 of the TCP Act. To challenge the enforcement decision, permission must first be obtained from the Court. If the Court does not consider that there is an arguable case, it may refuse permission. Application for leave to make a challenge must be received by the Administrative Court within 28 days of the decision, unless the Court extends this period.

SECTION 3: AWARDS OF COSTS

A challenge to the decision on an application for an award of costs which is connected with a decision under section 77 or 78 of the TCP Act can be made under section 288 of the TCP Act if permission of the High Court is granted.

SECTION 4: INSPECTION OF DOCUMENTS

Where an inquiry or hearing has been held any person who is entitled to be notified of the decision has a statutory right to view the documents, photographs and plans listed in the appendix to the Inspector's report of the inquiry or hearing within 6 weeks of the day after the date of the decision. If you are such a person and you wish to view the documents you should get in touch with the office at the address from which the decision was issued, as shown on the letterhead on the decision letter, quoting the reference number and stating the day and time you wish to visit. At least 3 days notice should be given, if possible.
